Under New Management Universities Administrative Labor And The Professional Turn:

Under New Management Randy Martin, 2011-06-17 Randy Martin takes a novel even handed approach to this gulf between professors who feel a loss of autonomy and administrators Martin imagines a political future for academic labour based on a critical understanding of the administrative work that faculty already undertake **Mass Intellectuality of the Neoliberal State** Nicolas Fleet, 2021-07-19 This book addresses the political effects of the massification of higher education and intellectual labor in the neoliberal state Using the case of Chile the author argues that public professionalism emerges in the mass university system producing excesses of knowledge which infuse the state with political purpose at many levels The emergence of the student movement in 2011 then the major social mobilization against the neoliberal state since the restoration of democracy in 1990 provided a clear manifestation of the politicization and ideological divisions of the mass university system In conditions of mass intellectuality public professionals mobilize their political affinities and links with society eventually affecting the direction of state power even against neoliberal policy Through several interviews with academics public professionals and other documentary and statistical analyses the book illustrates the different sites of political socialization and the ideological effectiveness of the emergent mass intellectuality of the neoliberal state The Law of International Lawyers Wouter Werner, Wouter G. Werner, Marieke de Hoon, Alexis Galán, 2017-03-30 This book provides original perspectives on the work of one of the most important thinkers in international law today *Transforming Classes* Leo Panitch, Greg Albo, 2014-12-22 For more than half a century the Socialist Register has brought together some of the sharpest thinkers from around the globe to address the pressing issues of our time Founded by Ralph Miliband and John Saville in London in 1964 SR continues their commitment to independent and thought provoking analysis free of dogma or sectarian positions Transforming Classes is a compendium of socialist thought today and a clarifying account of class struggle in the early twenty first century from China to the United States *A Companion to Critical and Cultural Theory* Imre Szeman, Sarah Blacker, Justin Sully, 2017-07-07 This Companion addresses the contemporary transformation of critical and cultural theory with special emphasis on the way debates in the field have changed in recent decades Features original essays from an international team of cultural theorists which offer fresh and compelling perspectives and sketch out exciting new areas of theoretical inquiry Thoughtfully organized into two sections lineages and problematics that facilitate its use both by students new to the field and advanced scholars and researchers Explains key schools and movements clearly and succinctly situating them in relation to broader developments in culture society and politics Tackles issues that have shaped and energized the field since the Second World War with discussion of familiar and under theorized topics related to living and laboring being and knowing and agency and belonging The Ethics Rupture Will C. van den Hoonaard, Ann Hamilton, 2016-01-01 For decades now researchers in the social sciences and humanities have been expressing a deep dissatisfaction with the process of research ethics review in academia Continuing the ongoing critique of ethics review begun

in Will C van den Hoonaard's *Walking the Tightrope* and *The Seduction of Ethics* *The Ethics Rupture* offers both an account of the system's failings and a series of proposals on how to ensure that social research is ethical rather than merely compliant with institutional requirements. Containing twenty-five essays written by leading experts from around the world in various disciplines, *The Ethics Rupture* is a landmark study of the problems caused by our current research ethics system and the ways in which scholars are seeking solutions. *Shaping for Mediocrity* David Harvie, 2024-08-30 In 2021, as part of a programme called Shaping for Excellence, bosses at the University of Leicester made redundant numerous scholars in what was simultaneously an attack on academic freedom and trade union organisation. The authors of *Shaping for Mediocrity* not only had front row seats in the campaign against these mass redundancies; they were in the ring both as targeted employees and as trade union officers and negotiators. *Shaping for Mediocrity* tells the inside story of these attacks and the campaign against them. It situates this story within a longer history of struggle to make the university a place where critical thinking is possible, showing how events in Leicester are both reflective of higher education in the UK following four decades of neoliberal reform and a particularly egregious instance of the increasingly authoritarian management of public institutions such as universities. *The Alienated Academic* Richard Hall, 2018-08-25 Higher education is increasingly unable to engage usefully with global emergencies as its functions are repurposed for value. Discourses of entrepreneurship, impact and excellence realised through competition and the market mean that academics and students are increasingly alienated from themselves and their work. This book applies Marx's concept of alienation to the realities of academic life in the Global North in order to explore how the idea of public education is subsumed under the law of value. In a landscape of increased commodification of higher education, the book explores the relationship between alienation and crisis before analysing how academic knowledge, work, identity and life are themselves alienated. Finally, it argues that through indignant struggle, another world is possible, grounded in alternative forms of organising life and producing socially useful knowledge, ultimately requiring the abolition of academic labour. This pioneering work will be of interest and value to all those working in the higher education sector as well as those concerned with the rise of neoliberalism and marketization within universities.

The Cambridge Handbook of Service Learning and Community Engagement Corey Dolgon, Tania D. Mitchell, Timothy K. Eatman, 2017-02-01 With contributions from leading experts across disciplinary fields, this book explores best practices from the field's most notable researchers as well as important historically based and politically focused challenges to a field whose impact has reached an important crossroads. The comprehensive and powerfully critical analysis considers the history of community engagement and service learning, best teaching practices and pedagogies, engagement across disciplines and current research and policies, and contemplates the future of the field. The book will not only inform faculty, staff and students on ways to improve their work but also suggest a bigger social and political focus for programs intended to seriously establish democracy and social justice in their communities and campuses. Power and Protest at an

American University Ellen Carnaghan, Kathryn E. Kuhn, 2020-10-27 This book examines the successful no confidence movement led by faculty at Saint Louis University in 2013 in an effort to unseat the university president considering the reasons for success when similar movements often fail Through a series of chapters written by faculty from many disciplines at the university it uses a particular episode of faculty protest to shed light on wider issues concerning the circumstances in which faculty are likely to be motivated to protest the institutional frameworks that make protest possible and the strategies that get results As such it will appeal to scholars of social movements with interests in protest and mobilization in the field of education

The SAGE Handbook of Research Management Robert Dingwall, Mary Byrne McDonnell, 2015-08-17 The Handbook of Research Management is a unique tool for the newly promoted research leader Larger scale projects are becoming more common throughout the social sciences and humanities housed in centres institutes and programmes Talented researchers find themselves faced with new challenges to act as managers and leaders rather than as individual scholars They are responsible for the careers and professional development of others and for managing interactions with university administrations and external stakeholders Although many scientific and technological disciplines have long been organized in this way few resources have been created to help new leaders understand their roles and responsibilities and to reflect on their practice This Handbook has been created by the combined experience of a leading social scientist and a chief executive of a major international research development institution and funder The editors have recruited a truly global team of contributors to write about the challenges they have encountered in the course of their careers and to provoke readers to think about how they might respond within their own contexts This book will be a standard work of reference for new research leaders in any discipline or country looking for help and inspiration The editorial commentaries extend its potential use in support of training events or workshops where groups of new leaders can come together and explore the issues that are confronting them

Justice Is an Option Robert Meister, 2021-04-19 More than ten years after the worst crisis since the Great Depression the financial sector is thriving But something is deeply wrong Taxpayers bore the burden of bailing out too big to fail banks but got nothing in return Inequality has soared and a populist backlash against elites has shaken the foundations of our political order Meanwhile financial capitalism seems more entrenched than ever What is the left to do *Justice Is an Option* uses those problems and the framework of finance that created them to reimagine historical justice Robert Meister returns to the spirit of Marx to diagnose our current age of finance Instead of closing our eyes to the political and economic realities of our era we need to grapple with them head on Meister does just that asking whether the very tools of finance that have created our vastly unequal world could instead be made to serve justice and equality Meister here formulates nothing less than a democratic financial theory for the twenty first century one that is equally conversant in political philosophy Marxism and contemporary politics *Justice Is an Option* is a radical invigorating first page of a new and sorely needed leftist playbook

Motivations for Refusal Mark Gawne, 2025-05-01 In *Motivations for Refusal* Work Value

and the Limits of Postworkerism Mark Gawne develops a critical account of how the affective politics of capital and class are formed and contested in contemporary arrangements of work and offers a comprehensive critique of the postworkerist school of autonomist Marxism Drawing on value critique and class composition analysis the book challenges core assumptions of postworkerism and related theories of affective labour while retaining their core insights Moving beyond the limits of postworkerism Gawne analyses how the integration of the affective sciences into management and workplace technologies constitutes a terrain of contestation in conditions of immaterial production Motivations for Refusal explores how affective politics emerge in the contestation between labour and capital in their affective modes

Backstage Practices of Transnational Law Lianne J.M. Boer, Sofia Stolk, 2019-04-16 This book explores the backstage of transnational legal practice by illuminating the routines and habits that are crucial to the field yet rarely studied Through innovative discussion of practices often considered trivial the book encourages readers to conceptualise the backstage as emblematic of transnational legal practice Expanding the focus of transnational legal scholarship the book explores the seemingly mundane procedures which are often taken for granted despite being widely recognized as part of what it means to do transnational law Adopting various methodologies and approaches each chapter focuses on one specific practice for example mootng exercises for law students international travel transnational time the social media activities of lawyers and legal scholars and the networking at the ICC s annual Assembly of States Parties In and of themselves these chapters each provide unique insights into what happens before the curtain rises and after it falls on the familiar outputs of transnational law It does more however than provide a range of different practices it takes the next step in theorizing on the importance of the marginal and the everyday for what we know to be the law and what the international legal field looks like Furthermore by interrogating undiscussed academic practices it provides students with a candid view on the perils and promises of transnational legal scholarship inviting them to join the discussion and to practice their discipline in a more reflexive way Written in an accessible format containing a readable collection of personal and recognizable accounts of transnational legal practice the book provides an everyday insight into transnational law It will therefore appeal to international legal scholars alongside any reader with an interest in transnational law

Crises of Imagination, Crises of Power Max Haiven, 2014-03-13 Today when it seems like everything has been privatized when austerity is too often seen as an economic or political problem that can be solved through better policy and when the idea of moral values has been commandeered by the right how can we re imagine the forces used as weapons against community solidarity ecology and life itself In this stirring call to arms Max Haiven argues that capitalism has colonized how we all imagine and express what is valuable Looking at the decline of the public sphere the corporatization of education the privatization of creativity and the power of finance capital in opposition to the power of the imagination and the growth of contemporary social movements Haiven provides a powerful argument for creating an anti capitalist commons Capitalism is not in crisis it is the crisis and moving beyond it is the only key to survival Crucial reading

for all those questioning the imposition of austerity and hoping for a fairer future beyond it **Making Policy Move** John Clarke, Dave Bainton, Noémi Lendvai, Paul Stubbs, 2015-04-15 Written by key people in the field this timely and accessible book argues that treating policy's movement as an active process of translation in which policies are interpreted inflected and reworked as they change location is of critical importance for studying policy Reinventing the Library for Online Education Frederick Stielow, 2014 Have changes such as cloud computing search engines the Semantic Web and mobile applications rendered such long standing academic library services and functions as special collections interlibrary loans physical processing and even library buildings unnecessary Can the academic library effectively reconceive itself as a virtual institution Stielow who led the library program of the online university American Public University System argues most emphatically that it can His comprehensive look at web based academic libraries synthesizes the changes wrought by the Web revolution into a visionary new model grounded in history as well as personal experience He demonstrates how existing functions like cataloging circulation collection development reference and serials management can be transformed by entrepreneurship human face electronic communicator relations web apps and other innovations Online education can ensure that libraries remain strong information and knowledge hubs and his timely book Shows how the origins and history of the academic library have laid the foundation for our current period of flux Identifies practices rooted in print based storage to consider for elimination and legacy services ready to be adapted to virtual operations Discusses tools and concepts libraries will embrace in a networked world including new opportunities for library relevance in bookstore textbook operations compliance library archival museum functions e publishing and tutorial services Offers a thorough examination of the virtual library infrastructure crucial for an online learning program with a special look at the particular needs and responsibilities of online librarians Looks at the evolving relationship between higher education and copyright and posits how educational technology will bring further changes Bursting with stimulating ideas and wisdom gleaned from first hand experience Stielow's book presents a model for offering outstanding higher education library services in an increasingly online environment *Cultures of Financialization* M. Haiven, 2014-10-10 Drawing on a wide range of case studies *Cultures of Financialization* argues that in our age of crisis the global economy is more invested than ever in culture and the imagination We must take the idea of fictitious capital seriously as a way to understand the power of finance and what might be done to stop it *After Sound* G Douglas Barrett, 2016-08-11 *After Sound* considers contemporary art practices that reconceive music beyond the limitation of sound This book is called *After Sound* because music and sound are in Barrett's account different entities While musicology and sound art theory alike typically equate music with pure instrumental sound or absolute music Barrett posits music as an expanded field of artistic practice encompassing a range of different media and symbolic relationships The works discussed in *After Sound* thus use performance text scores musical automata video social practice and installation while they articulate a novel aesthetic space for a radically engaged musical practice Coining the

term critical music this book examines a diverse collection of art projects which intervene into specific political and philosophical conflicts by exploring music's unique historical forms Through a series of intimate studies of artworks surveyed from the visual and performing arts of the past ten years Pussy Riot Ultra red Hong Kai Wang Peter Ablinger Pauline Boudry and Renate Lorenz and others *After Sound* offers a significant revision to the way we think about music The book as a whole offers a way out of one of the most vexing deadlocks of contemporary cultural criticism the choice between a sound art effectively divorced from the formal historical coordinates of musical practice and the hermetic music that dominates new music circles today

Knowledge LTD Randy Martin, 2015-04-17 Catastrophes ranging from the travesties of financial markets and the explosion of the Deepwater Horizon oil well to the tsunami that struck northern Japan and the levees breaking in New Orleans are examples of the limits of knowledge Author Randy Martin insists that the expertise erected to prevent these natural and social disasters failed in each case In *Knowledge LTD* Martin explores how both the limits of knowledge and the social constructions of culture reflect the way we organize social life in the face of disasters and their aftermath He examines this crisis of knowledge as well as the social movements that rose up in its wake Martin not only treats derivatives as financial contracts for pricing risk but also shows how the derivative works in economic terms where the very unity of the economy is undone *Knowledge LTD* ultimately points to a more comprehensive reordering of the once separate spheres of economy polity and culture Martin provides a new way of understanding the social significance of the all pervasive derivative logic
