Under New Ownership Privatizing Chinas State Owned Enterprises:

Under New Ownership Shahid Yusuf, 2006 *Under New Ownership* Shahid Yusuf, Kaoru Nabeshima, Dwight Heald Perkins, 2006 Although China's centrally planned economy is a little more than a shadow of its former self the closely inter linked reforms of the enterprise and banking sectors are still incomplete The relative size of the state owned enterprise sector has been much reduced however the sector remains the dominant borrower from the banking system and is responsible for the majority of bank non performing assets Thus in the interests of financial stability it is crucial to implement the remaining reform agenda The accession to the WTO has also made it more urgent for China's most dynamic state owned en

Under New Ownership Connie Boswell, Shahid Yusuf, 1977 **Resurging Asian Giants** Asian Development Bank, 2010-07-01 The economies of the People's Republic of China and India have seen dramatic growth in recent years As their respective successes continue to reshape the world's economic landscape noted Chinese and Indian scholars have studied the two countries development paths in particular their rich and diverse experiences in such areas as education information technology local entrepreneurship capital markets macroeconomic management foreign direct investment and state owned enterprise reforms Drawing on these studies the Asian Development Bank has produced a timely collection of lessons learned that serves as a valuable refresher on the challenges and opportunities ahead for developing economies especially those in Asia and the Pacific

Urban China in Transition John Logan, 2011-07-22 Using an innovative approach this book interprets the unprecedented transformation of contemporary

China's major cities. It deals with a diversity of trends and analyzes their sources. Offers a multi-dimensional analysis of urban life in China. Highlights a diversity of trends in the areas of migration, criminal victimization, gated communities and the status of women, suburbanization and neighbourhood associations. Each chapter includes input from both an expert on urban life in China and an outside expert from the fields of sociology, geography, economics, planning, political science, history, demography, architecture or anthropology. An alternative theoretical perspective comparing the Chinese experience with other urban settings in the United States, Poland, Russia, Vietnam, East and South East Asia and South America. *Accidental Conflict* Stephen Roach, 2022-11-08. The misguided forces driving conflict escalation between America and China and the path to a new relationship. A timely, fluid, readable assessment of a testy and rapidly changing global relationship. Kirkus Reviews starred review. In the short span of four years, America and China have entered a trade war, a tech war and a new Cold War. This conflict between the world's two most powerful nations wouldn't have happened were it not for an unnecessary clash of false narratives. America falsely blames its trade and technology threats on China, yet overlooks its shaky saving foundation. China falsely blames its growth challenges on America's alleged containment of market-based socialism, ignoring its failed economic rebalancing. In a hard-hitting analysis of both nations' economies, politics and policies, Stephen Roach argues that much of the rhetoric on both sides is dangerously misguided, amplified by information distortion and more a reflection of each nation's fears and vulnerabilities than a credible assessment of the risks they face. Outlining the disastrous toll of conflict escalation between China and America, Roach offers a new road map to restoring a mutually advantageous relationship.

Disenfranchised Joel Andreas, 2019. In the decades following World War II, factories in many countries not only provided secure employment and a range of economic entitlements but also recognized workers as legitimate stakeholders, enabling them to claim rights to participate in decision making and hold factory leaders accountable. In recent decades, as employment has become more precarious, these attributes of industrial citizenship have been eroded, and workers have increasingly been reduced to hired hands. As Joel Andreas shows in *Disenfranchised*, no country has experienced these changes as dramatically as China. Drawing on a decade of field research, including interviews with both factory workers and managers, Andreas traces the changing political status of workers inside Chinese factories from 1949 to the present, carefully analyzing how much power they have actually had to shape their working conditions. The Dictator's Dilemma Bruce Dickson, 2016-05-16. Many observers predicted the collapse of the Chinese Communist Party following the Tiananmen Square crackdown in 1989 and again following the serial collapse of communist regimes behind the Iron Curtain. Their prediction, however, never proved true. Despite minor setbacks, China has experienced explosive economic growth and relative political stability ever since 1989. In *The Dictator's Dilemma*, eminent China scholar Bruce Dickson provides a comprehensive explanation for the regime's continued survival and prosperity. Dickson contends that the popular media narrative of the party's impending implosion ignores some basic facts. The regime's policies may generate resentment and protest, but the CCP still enjoys a surprisingly high level of

popular support Nor is the party is not cut off from the people it governs It consults with a wide range of specialists stakeholders and members of the general public in a selective yet extensive manner Further it tolerates and even encourages a growing and diverse civil society even while restricting access to it Today the majority of Chinese people see the regime as increasingly democratic even though it does not allow political competition and its leaders are not accountable to the electorate In short while the Chinese people may prefer change they prefer that it occurs within the existing political framework In reaching this conclusion Dickson draws upon original public opinion surveys interviews and published materials to explain why there is so much popular support for the regime This basic stability is a familiar story to China specialists but not to those whose knowledge of contemporary China is limited to the popular media

The Dictator's Dilemma an engaging synthesis of how the CCP rules and its future prospects will enlighten both audiences and will be essential for anyone interested in understanding China's increasing importance in world politics

Renewing International Labour Studies Marcus Taylor, 2013-09-13 This volume seeks to re energise the paradigm of the New International Labour Studies by detailing how struggles over the construction reproduction utilisation and restructuring of labour forces are the contested social foundations upon which the global economy stands Through a combination of theoretical works and a series of case studies the volume highlights the cutting edge of international labour studies Its expands on three pivotal areas of study within the discipline 1 the social construction of new labour forces across an expanding international division of labour 2 the self organising potential of workers particularly within non traditional sectors and 3 the possibilities for transborder labour movements to help address the asymmetrical power relationships between globalised capital and localised labour In addressing these themes the volume helps explain not only how the contemporary international division of labour is produced and reproduced but also the strengths and limits to current attempts to overcome its unequal and divisive nature This book was published as a special issue of Third World Quarterly

State-Led Privatization in China Jin Zeng, 2013-10-01 Large scale privatization did not emerge spontaneously in China in the late 1990s Rather the Chinese state led and carefully planned ownership transformation with timetables and measurable privatization quotas not for the purpose of extracting the state from the economy but in order to strengthen the rule of the Party While it is widely believed that authoritarian regimes are better suited than democracies to carry out economic reform this book provides a more nuanced understanding of reform in China demonstrating that the Chinese state's capacity to impose unpopular reform is contingent on its control over local state agents and its adaptability to societal demands Building on rich fieldwork data gathered in three Chinese cities Shenyang Shanghai and Xiamen this book offers the first comparative study of China's privatization processes at the local level Instead of focusing solely on political elites Jin Zeng adopts a multi level interaction approach to examine how the complex interplay of the central leadership grassroots officials and state owned enterprise managers and workers shaped the contour of privatization in China The book advances three central arguments First local economic structure and cadre

evaluation system mediated local officials incentives to initiate privatization Second local officials relied on mobilization campaigns and various appeasement measures to implement privatization Finally the dynamics of privatization were fundamentally driven by the central government's reactions to social opposition and by the subsequent responses of local officials to the changed political regulatory environment As a detailed analysis of the dual transformation of the property regime and state society relations in China this book will be invaluable to students and scholars of Chinese politics economic reform as well as those interested in comparative political economy and economic development more broadly

China's Rise in the Age of Globalization Jianyong Yue, 2018-01-12 This book deconstructs a series of myths surrounding China's economic rise The first myth is that globalization led directly to China's rise the second is that China is another East Asian developmental state the third that China's market reform had been implemented in an incremental way and fourth that China's resilient authoritarianism has been effective in ensuring the country's economic and political transformation Yue argues that the China model is one of crony comprador capitalism that has hindered the country's attempts at economic and political modernity It is argued that the United States strategy of integrating China into the international system is self-defeating in the long run not because such an approach has created a restless empire capable of challenging US primacy but because the Chinese miracle has subsequently backfired on the liberal order created after World War Two Covering the entire reform period from the end of the Cultural Revolution in 1976 to the present day the author calls for readers to rethink globalization and leave more policy space for China and the developing nations to pursue national development through internal integration which is more conducive to democratic transition and global peace

Tiger Girls Minglu Chen, 2012-03-29 The existing scholarship on women in China suggests that gender inequality still exists against the background of the country's reform and opening in recent years However the situation of women in enterprise ownership and leadership seems to indicate that despite such notions of disadvantage amongst women some of them are playing a more active and significant role in China's economic development Based on a series of interviews with female enterprise owners wives of enterprise owners and women managers conducted in diverse locations in three different provinces of China Tiger Girls examines the deeper realities of women entrepreneurs in China and by extension the role of leading women in the workforce By analyzing information on these women's personal experiences careers and families this book investigates their status at work and at home as well as their connections with local politics The research results suggest that although traces of gender inequality can still be found in these women's lives they appear to be actively engaged in the business establishment and operation and gradually casting off the leash of domestic responsibilities This book will be of interest to students and scholars of Chinese Studies Chinese Business Chinese Economics and Asian Studies Minglu Chen is ARC Postdoctoral Fellow in the Department of Government and International Relations at Sydney University Australia

Catch-up and Radical Innovation in Chinese State-Owned Enterprises Xieliu Liu, Xiao Wang, Yimei Hu, 2021-02-26 This original book is a unique and original

study on how in the past decade Chinese state owned enterprises SOEs have achieved technological innovation in the large infrastructure sector It reveals a new world of Chinese innovations showing that SOEs are willing to innovate and more than capable of doing so Based on findings from first hand data and years of in depth observations this book shows how the innovation ecosystem perspective incentivizes and facilitates Chinese SOEs innovation and highlights entrepreneurial role of the government
