Judd, Eona Bell, 2020-05-26 When humans cooperate what are the social and psychological mechanisms that enable them to do so successfully Is cooperativeness something natural for humans built in to our species over the course of evolution or rather something that depends on cultural learning and social interaction This book addresses these central questions concerning human nature and the nature of cooperation

The editors present a wide range of vivid anthropological case studies focused on everyday cooperation in Chinese communities for example between children in Nanjing playing a ballgame parents in Edinburgh organising a community school villagers in Yunnan dealing with common pool resource problems and families in Kinmen in Taiwan worshipping their dead together On the one hand these case studies illustrate some uniquely Chinese cultural factors such as those related to kinship ideals and institutions that shape the experience and practice of cooperation They also illustrate on the other hand how China s recent history not least the rise and fall of collectivism in various forms continues to shape the experience of cooperation for ordinary people in China today Finally they show that in spite of the cultural and historical particularity of Chinese cooperation it does share some underlying features that would be familiar to people coming from radically different backgrounds

Young Adults in Urban China and Taiwan Désirée Remmert,2019-08-22 This book compares aspirations and life choices among educated young adults in urban China and Taiwan As two places that share a cultural heritage but very different political and economic systems it assesses how the socio economic and political trajectories of China and Taiwan have influenced young people s decision making and the strategies they apply to realize their goals Drawing upon ethnographic research this book analyzes young adults choices in the areas of education career and marriage considering their individual social backgrounds and economic resources In this context it also discusses how feelings of hope doubt and disenchantment are mitigated by the specific societal atmospheres and ideological discourses Whereas stable employment and marriage appeared to be universal goals this book demonstrates how young adults in Beijing had more autonomy in decision making concerning individual life choices than those in Taipei Among other things China s demographic controls and urban migration policies appear to increase the independence of young people from their parents Further the prevalence of boarding school education in China compared to Taiwan provides an opportunity for earlier autonomy for young people in China Taking a comparative approach *Young Adults in Urban China and Taiwan* will be a valuable resource to students and scholars of Chinese Studies and Taiwan Studies as well as social and cultural anthropology and youth culture

Low Fertility and Population Aging in Japan and Eastern Asia Toru Suzuki, 2014-02-04. This book provides a unique comparative view of the extremely low fertility and drastic population aging in Eastern Asian countries. After discussing demographic and political developments of Japan in detail as a reference case, accelerated changes in Korea, Taiwan and China are interpreted with a comparative cultural view. In addition to the well-known cultural divide between countries with strong and weak family ties, this book proposes another divide between offspring of the feudal family and that of the Confucian family. Included is a discussion of how the discrepancy between the compressed change in the socioeconomic system and the slow change in the family system has resulted in extremely low fertility in Eastern Asia. A comparison of policy development reveals that the sense of overpopulation has caused difficulty in launching pro-natal policy interventions in Eastern Asia, especially in China. Impacts of fertility decline on population aging, total dependency ratio and the timing of population decline in Eastern Asia are analyzed with a stylized model. The remaining Confucian family pattern is especially important in understanding and predicting political development to cope with accelerated population aging. This book is a valuable resource for researchers who are interested in the latest and most surprising demographic phenomena in the region.
