Vision qui d'une certaine façon les aveugle eux-mêmes et miracle vertueux de la dialectique les empêchent parfois de voir et de contrer la libération de ceux qu'ils considèrent comme intrinsèquement faibles et fatalement incapables de révolte et d'émergence historique. The Pakistan National Bibliography, 2011 *Psychoanalytic Perspectives on Fundamentalism, Radicalisation and Terrorism* Jessica Yakeley, Paul Cundy, 2020-06-04 Terrorism is no longer woven into the backdrop of our daily lives but rather it has been pushed to centre stage an ongoing tragedy in which comprehension of the perpetrators motivations is eclipsed by the impact of horror and devastation on its victims and wider society. Attempting to make sense of these atrocities and their antecedents a body of literature has accumulated since 9/11 which offers a psychoanalytic perspective on terrorism. This research provides a reflective space within which the unconscious motivations

primitive conflicts fantasies and impulses that underpin the extreme mindsets and violent actions of the individuals and groups involved may be explored offering insights complementary to those of different disciplines sociological political cultural and other This book brings together contemporary psychoanalytic writers and practitioners involved in the study of radicalisation fundamentalism and terrorism Some of the authors have worked with terrorists thus grounding their reflections and insights in direct clinical contact with these individuals Understanding the motivations of the perpetrators includes elucidation of the wider group dynamics of minority populations where the perpetuation of violence that is seen as terrorism may be viewed by its perpetrators as a justifiable response to collective experiences of subjugation humiliation and injustice suffered over generations Understanding such perspectives is not colluding with the aggressors but rather it may contribute to interventions at both individual and global levels that attempt to break the deadly cycle of violence This book was originally published as two special issues of Psychoanalytic Psychotherapy

Mobilization for Violent Politicized Islam Hawa Noor, 2024-08-05 This book focuses on the involvement of some Kenyans in al Shabaab an affiliate of Al Qaeda based in Somalia despite their country's relative stability compared to Somalia It discusses the origin of the Kenyan state and how colonization created social stratification that benefited elites closer to the center while excluding marginalized groups at the periphery The argument is that this pattern still prevails despite attempts to enhance equality such as the adoption of a new constitution in 2010 promoting the devolution of power and resources The persistence of this condition it is argued is what initially handed al Qaeda and later al Shabaab opportunities for mobilization enabled by its creative politicization of religion The heavy handed tactics employed by security forces under the auspices of the War on Terror

further catalyzed this process resulting in more Kenyan individuals joining the group Using an historical and political process approach the book shows how the interplay of structural conditions and al Shabaab s mobilization strategy linked with individuals motivations for joining the group Based on individuals own narratives about their participation the latter is empirically demonstrated to be non linear incorporating motivations beyond rational ones contrary to the overemphasis on ideology in the literature on participation in groups similar to al Shabaab This book will of much interest to students of political violence African politics Islamic studies and International Relations

Ripsman, 2025-07-31 This book introduces the near crisis phase of conflict and escalation These time sensitive disputes between states and even with violent non state actors do not involve significant risk of military escalation at least in the moment Investigating how and why some near crises escalate while others do not requires an explanation of the different dynamics of international disputes and the policy tools that states and international institutions can employ We ask an expanded set of questions about specific cases and general patterns of conflict behavior such as why did Israeli leaders respond to Hezbollah s 2006 cross border raid with escalation resulting in the Second Lebanon War while in previous instances the Israelis limited their retaliation Why didn t the 2015 Iranian Ballistic Missile Test or the 1995 Norwegian Black Brant Missile Launch escalate while the 2009 North Korea Missile Movement and the 1995 Taiwan Straits dispute tipped into a full blown crisis and why did the 2008 Russia Georgia conflict escalate from near crisis to war We use primary sources and newly created data on near crises to answer these questions and others The overall conclusion is that an ounce of prevention at the near crisis phase is worth a pound of cure in averting a full blown crisis or war This book will be of great interest to students of security studies conflict studies foreign policy and international relations
