Alec Nove, 2011 First published in 1964 *Was Stalin Really Necessary* is a thought provoking work which deals with many aspects of the Soviet political economy planning problems and statistics Professor Nove starts with an attempt to evaluate the rationality of Stalinism and discusses the possible political consequences of the search for greater economic efficiency which is followed by a controversial discussion of Kremlinology The author goes on to analyse the situation of the peasants as reflected in literary journals then looks at industrial and agricultural problems There are elaborate statistical surveys of occupational patterns and the purchasing power of wages followed by an examination of the irrational statistical reflection of irrational economic decisions Professor Nove's essay on social welfare was unlike some of his other work used in the Soviet press as evidence against over enthusiastic cold warriors among whom the author was not always popular Finally the author seeks to generalise about the evolution of world communism

Communism and Development (Routledge Revivals) Robert Bideleux, 2014-06-27 First published in 1985 this book provides a comprehensive reappraisal of the diverse Communist development strategies that shaped the twentieth century Robert Bideleux emphasises the appalling human and economic costs of the most widely adopted Stalinist strategies of forced industrialisation and rural collectivisation He also reconsiders the powerful arguments in favour of the most feasible and cost effective alternatives to Stalinism including village communisms and market socialisms A highly readable and challenging study this reissue will be of particular value to students with research interests in Development Studies East European History and Politics

The Soviet Economy (Routledge Revivals) Alec Nove, 2013-02-01 First published in 1961 *The Soviet Economy* is a well informed work which seeks to acquaint students with the structure and problems of the economy of the USSR In a balanced and perceptive analysis Alexander Nove describes the organisation of economic life and of the planning system analysing the practical and theoretical problems within the institutional structure of the Soviet system and introducing the student to Soviet economic ideas and concepts The subject is then related to the growth of the Soviet

economy and to the extent to which both the institutions and the problems reflect the historical peculiarities of the USSR The author does not try to argue for or against the system or to provide answers but aims to stimulate the reader to enquire further into the more important questions raised by the strengths and weaknesses of the Soviet economy *Glasnost' in Action (Routledge Revivals)* Alec Nove, 2013-02-01 First published in 1991 Glasnost in Action Cultural Renaissance in Russia is a comprehensive portrait of a society in transition as Professor Nove reflects on the changes taking place in the USSR at that time While in English Glasnost means openness the author questions what openness actually means in the USSR How is Soviet culture their art literature theatre music and social life affected by the new freedom of speech and thought that resulted from Glasnost Was it Gorbachev's power and charisma that propelled Glasnost or would it build up enough momentum in Soviet society to continue independently Professor Nove uses examples from each area of Soviet life in his exploration of the new openness referring to the release of previously banned films writings plays and works of art while reflecting on the newfound honesty about the country's Stalinist past and the problems faced today Industrial Societies (Routledge Revivals) Richard Scase, 2015-06-03 This book first published in 1989 addresses an issue that stood at the centre of sociological concern the changing character of industrial societies The authors examine the nature of the industrialization process in terms of its impact upon and development within both state socialist and capitalist societies Is industrialism a constant phenomenon within both kinds of society or are distinctive differences apparent In the 1960s it did seem that economic growth and technological change were producing similarities in social structure between the different socio political systems it now appears however that the crisis that have developed during the 1980s how illustrated their contrasts Through the analysis of this trend in the West in Eastern Europe and in China the authors clarify central issues for the student of sociology The changing character of national states organized labour stratification systems and class relationships Processes of social integration cohesion and control The extent to which dominant groups are able to sustain social and economic privileges in different socio economic systems The changing pattern of work and employment relationships The nature of class gender and ethnicity as sources of socio economic division **Can Russia Change? (Routledge Revivals)** Walter Clemens, 2012-12-06 First published in 1990 this ground breaking book sought to determine whether contemporary Russia had the capacity to change and if in so doing it could alter the complex web of East West relations from a zero sum struggle to a state of peaceful competition and mutual security In order to answer this question the author compares advances and setbacks in arms control and security affairs with co operation on less politically salient issues such as environmental degradation He finds that in the nearly seventy years preceding Mikhail Gorbachev's rise to power the Kremlin relied on several basic approaches to foreign relations These policies isolated the Soviet Union from those nations whose co operation it needed to cope with the escalating interdependencies of the time Gorbachev Clemens argues was the first Soviet leader to recognise both the problems and potential benefits of global interdependence and to explore the

possibilities for co operation between East and West to advance mutual security Can Russia Change is unique in its comparative approach and historical perspective and this reissue will prove invaluable to all those interested in the history of Soviet security and foreign policy as well as US Soviet relations

Deconstructing and Reconstructing the Cold War Shahin P. Malik, 2018-12-17 Published in 1999 These essays are not deconstructive in the postmodern sense None of the authors have that depth of scepticism about knowledge claims but they are all concerned that the terms of reference of Cold War enquiry

have been inappropriately bounded The chapters by Murray and Reynolds specifically address the broad theoretical issues involved with paradigms and explanation The chapters by Dobson Marsh Malik Evans and Dix stretch out Cold War paradigms with successive case studies of Anglo American relations the USA Britain Iran and the oil majors the Gulf States and the Cold War South Africa and the Cold War and Indian neutralism All five authors challenge the efficacy of neo realist analysis and explanation and critique the way that assumptions derived from that position have been used in historical explanation The chapters by Ryall Rogers and Bideleux deal with Roman Catholicism in East Central Europe with nuclear matters and with the Soviet perspective Each work goes beyond the limits of Cold War paradigms Finally Ponting places the Cold War in the broad context of world history These essays provide thought provoking scholarship which helps us both to nuance our understanding of the Cold War and to realise that it should not be taken as an all embracing paradigm for the explanation of postwar international relations

Origins of the Cold War 1941-1949 Martin McCauley, 2015-11-19
Origins of the Cold War 1941 1949 covers the formative years of the momentous struggle which developed between two superpowers the Soviet Union and the United States It not only involved these titans but also the rest of the globe many proxy wars were fought much to the detriment of the developing world In a clear concise manner this book explains how the Cold War originated and developed between 1941 and 1949 The fourth edition is revised updated and expanded to include new material on topics such as the culture wars and Stalin s view of Marxism The introduction looks at the various approaches which have been adopted to analyse the Cold War and the challenges to arrive at a theory which can explain it The book explores questions such as Who was responsible for the Cold War Was it inevitable or could it have been avoided Was Stalin genuinely interested in a post war agreement Illustrated with maps and figures and containing a chronology and who s who of key individuals Origins of the Cold War 1941 1949 incorporates the most recent scholarship theories and information to provide students with an invaluable introduction to a fascinating period that shaped today s world Europe and the Wider World Bernard Waites, 2005-07-19 This book examines the concept of Europe in its relations to those areas of the globe beyond its borders In particular it is concerned with the historical evolution and contemporary setting of Europe vis a vis The United States of America the developing world and the former Soviet Union This involves drawing on the perspectives of international history politics and economics A unifying feature of the analysis included here is provided by the fact that the bi polar world that emerged in the aftermath of the Second World War has effectively been brought to an end with the collapse first of Soviet control in Eastern Europe and then by the break up of the Soviet Union itself and a prospective reduction of American influence in western Europe What will Europe look like in an increasingly multi polar world An answer to this depends not only on the evolving external connections between Europe and other parts of the world but also on the internal development of European political and economic integration The dynamic of this crucial dual relationship is examined here **Soviet Economic Development Since 1917** Maurice Dobb, 2012-06-12 This book follows

on from the author's volume *Russian Economic Development* and although it encompasses some of the same material it charts the history and progress of the Soviet economy down to the efforts at reconstruction after The Second World War. A new chapter was added which covers the post war decade from the end of the war to the announcement of the Sixth Year Plan.

Leadership in East European Communism, 1945-1970 R. Barry Farrell, 2017-07-05 Fifteen eminent social scientists from North America and Eastern Europe met under the auspices of Northwestern University's Comparative Politics Program to discuss the significance and characteristics of changes in political leadership in Eastern Europe and the Soviet Union since World War II. The presentations at the conference were edited and re-written following the discussion. They are incorporated into this comprehensive analysis of political leadership in European communist countries since World War II. This volume is divided up into four parts and fourteen different chapters. Part One examines the theoretical questions of leadership in European socialist countries. Part Two provides a factual perspective including contemporary quantitative data and biographical analysis. Part Three discusses the interaction of the leadership and society. Jan Triska's concluding overview relates specific chapters to the informal discussions at the conference. Some of the notable contributions include: *Historical Development of the Communist Theory of Leadership* Alfred G Meyer, *The Theory of Political Leadership and the Issue of Totalitarianism* Carl J Friedrich, *Marxist Theories of Leadership and Bureaucracy* Andras Hegedus, *Trends in Top Political Leadership in USSR* Frederick C Barghoorn, *Representation of Career Types in Soviet Political Leadership* Frederic Fleron, *The Soviet Apparat* Michael P Gehlen. *Leadership in East European Communism 1945-1970* is essential reading for students of comparative politics and the politics of East European socialist countries and the Soviet Union.

Political Economy and Soviet Socialism (Routledge Revivals) Alec Nove, 2013-02-01 First published in 1979, *Political Economy and Soviet Socialism* is an integrated selection of papers written over the past 12 years of Russian history which offers a unique insight into some important and controversial issues. Professor Nove discusses the ideas of some of the leaders of the Russian revolution: Lenin, Trotsky and Bukharin; the political economy of socialism and the problems of the contemporary USSR. The author addresses the role of traditional Russian ideas in shaping the Soviet Union's social structure and the conceptual problems involved in defining its ruling stratum: whether or not it is a class. He also considers the criteria by which it is reasonable to judge Soviet reality: the performance and prospects of agriculture in communist ruled Europe; the ability of the Eastern bloc to tackle problems of inflation and the obstacles to economic reform. Looking at the important and original developments of economic thought in the USSR and Eastern Europe, Professor Nove dissects the ideas of the new leftists concerning the role of market forces under a feasible socialism. These

papers offer essential reading for students of politics economics and comparative social structure American Foreign Relations Reconsidered Gordon Martel, 2002-11 Brings together 12 scholars of US foreign relations Each contributor provides a concise summary of an important theme in US affairs since the Spanish American War US policy process economic interests relations with the Third World and the nuclear arms race have been highlighted
