Dillingham, 1994 A casebook in environmental ethics that presents the classic cases with adequate detail so the students experience real situations in order to learn how serious and complex the issues are The authors present a balanced impartial account of these events that will interest and challenge students *Scapegoat* Clare Follmann, 2026-03-03 The problem with invasive species is a problem of capitalism A caste of plants and animals labeled invasive species are charged with being a key cause of habitat degradation that must be eradicated at any cost an ethically questionable and often futile approach While some invasive species cause great environmental damage recent developments in the study of ecology have found that

intervention efforts themselves have frequently proved more harmful than helpful to their local ecosystems Yet the outdated narrative of species management persists in both public belief and conservation policy distracting from and even justifying a far greater threat to biodiversity the global capitalist system that is destroying our planet Drawing on environmental science and semiotics Scapegoat recounts how the use of biased rhetoric and inaccessible language has created support for a popular but misleading war of native against invasive that does nothing to address the root cause of biodiversity loss Instead these are plastic words that lose their precise scientific origins with their introduction to everyday language yet still carry the weight of authority becoming persuasive and dangerously malleable In her surprising and clear eyed polemic Clare Follmann challenges the received wisdom on invasive species in light of the true ecological crisis we face This book poses moral and political questions to make us rethink our relationship with nature and each other in a rapidly changing world
