Name _____

1. A wave front is the portion of the medium's surface in which all particles are _____. The front is always _____ to the direction the wave is traveling.

Use dotted lines to draw the wave fronts created by these adjacent waves. Use an arrow to show the direction of the wave.

2. The turning back of a wave at a boundary of a new medium is called _____. If the new medium is very similar to the old, (most, little) will be transmitted and (most, little) will be reflected. For the following examples, consider the new medium to be very different from the old, so almost all of the wave will be _____.

Draw the reflected waves:

3. The Law of Reflection states: Both angles are drawn from the wave to the _____, which is _____ to the boundary. For the following, draw the normal, the reflected wave, labeling $\angle i$ and $\angle r$ reflection. With dotted lines, draw the wave fronts.
