Name: _____

Date: _____

Period: _____

Amplitude – Height of wave. Measured from the equilibrium position to the top of a crest or the bottom of a trough (see vertical arrow)

Wavelength – length of a single wave cycle (horizontal arrow). Measure distance between 2 identical points on consecutive waves.

Frequency – # of waves that pass a point in a given amount of time **Units = Hz = waves/second**

Speed = wavelength x frequency

****The time from the beginning to the end of the wave in each situation is 1 second.**

Applied Science: Studies of God's Design in Nature Parent Lesson Planner, 2014-03-01. Applied Science Studies of God's Design in Nature Course Description. This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student. Materials for each semester are independent of one another to allow flexibility. Made in Heaven Science shamelessly steals from God's creation yet refuses to give God the glory. Discover how the glow of a cat's eyes innovates road reflectors, the naturally sticky inspirations for Velcro and barbed wire as well as a fly's ear, the lizard's foot, the moth's eye, and other natural examples are inspiring improvements and new technologies in our lives. Engineers and inventors have long examined God's creation to understand and copy complex proven mechanics of design in the science known as biomimicry. Much of this inspiration is increasingly drawn from amazing aspects of nature including insects to plants to man in search of wisdom and insight. We are surrounded daily by scientific advancements that have become everyday items simply because man is copying from God's incredible creation without acknowledging the Creator. Champions of Invention: The great minds of the past are still with us today in many ways. Individuals who explored the natural world hundreds and thousands of years ago have given us a treasure of knowledge in all the sciences. In this exciting series from educator-author John Hudson, Tiner short biographies of the world's most gifted thinkers will inspire the leaders of tomorrow. Study the life of the forgotten inventor Joseph Henry whose exploration of electricity set the standard for later innovators. Find out how a personal tragedy paved the way for Samuel F B Morse to put aside his painting and develop the telegraph. These valuable learning guides will give students accurate accounts of lives from the halls of science and explain what those scientists believed about the world around them. Discovery of Design: From the frontiers of scientific discovery, researchers are now taking design elements from the natural world and creating extraordinary breakthroughs that benefit our health, our quality of life, and our ability to communicate and even help us work more efficiently. An exciting look at cutting edge scientific advances. Discovery of Design highlights incredible examples that include: How things like batteries, human organ repair, microlenses, automotive engineering paint, and even credit card security all have links to natural designs. Innovations like solar panels in space unfurled using technology gleaned from beech tree leaves and optic research rooted in the photonic properties of opal gemstones. Current and future research from the fields of stealth technology, communications, cosmetics, nanotechnology, surveillance, and more. Take a fantastic journey into the intersection of science and God's blueprints for life.
