This book is an attempt to pay deliberate attention to some silences on issues of social cultural and political importance that have remained unattended in the field of Computer Assisted Language Learning CALL Using an analytical framework developed by the French philosopher and cultural theorist Michel de Certeau the author demonstrates how silences can actively shape the boundaries of a scholarly field He argues that a geography of the forgotten in the field of CALL undermines the transformative and social justice potential of language teaching by using digital technologies The book will appeal to graduate students teacher educators and academic researchers who are looking for fresh perspectives and innovative ideas for integrating technologies into the curriculum and pedagogy of language education **Gray Market**
