ICEL 2018 13th International Conference on e-Learning Professor Eunice Ivala, 2018-07-05 **An African Research Ethics Reader**, 2024-06-11 Cultural research ethics is in a nascent phase within the field of research ethics as a whole and requires more attention and in depth articulation With specific case studies this vital volume provides unique perspectives on topics such as social autonomy vis a vis interests of individuals This volume assembles needed resources and case studies in cultural research ethics practices providing insight into current developments and future research directions It is a valuable contribution to cultural research ethics given the dearth of published literature available in this emerging field It is designed with two broad audiences in mind 1 African researchers and research organizations that want homegrown guidance about research ethics and 2 research ethicists worldwide who can use it to learn about cultural research ethics especially with respect to Africa Intelligent Systems and Applications Kohei Arai, Supriya Kapoor, Rahul Bhatia, 2020-08-25 The book Intelligent Systems and Applications Proceedings of the 2020 Intelligent Systems Conference is a remarkable collection of chapters covering a wider range of topics in areas of intelligent systems and artificial intelligence and their applications to the real world The Conference attracted a total of 545 submissions from many academic pioneering researchers scientists industrial engineers students from all around the world These submissions underwent a double blind peer review process Of those 545 submissions 177 submissions have been selected to be included in these proceedings As intelligent systems continue to replace and sometimes outperform human intelligence in decision making processes they have enabled a larger number of problems to be tackled more effectively This branching out of computational intelligence in several directions and use of intelligent systems in everyday applications have created the need for such an international conference which serves as a venue to report on up to the minute innovations and developments This book collects both theory and application based chapters on all aspects of artificial intelligence from classical to intelligent scope We hope that readers find the volume interesting and valuable it provides the state of the art intelligent methods and techniques for solving real world problems along with a vision of the future research **Decolonising Journalism Education in South Africa** Ms Zubeida Jaffer ,Prof. Ylva Rodny-Gumede ,Dr Mvuso Ponono ,Prof. Colin Chasi ,2021-12-20 With 342 years of colonialism and apartheid in South Africa a book of this calibre is essential to contribute to scholarly debates on the decolonisation of the media After the democratic dispensation in 1994 there was a narrow pursuit of transformation and media freedom while neglecting decolonisation patriarchal tendencies and the plight of black women journalists who are often vilified while discharging their duties It was two decades after democracy that the RhodesMustFall movement which later evolved into FeesMustFall movement reignited debates on decoloniality in the academia Moreover the book is published during the second wave of FeesMustFall student protests and the demand for decolonised free education is inevitable as no permanent solution to student funding crisis was crafted In the same vein the book advocates for decolonised pedagogy in universities including

journalism curriculum That ownership of the media is still skewed towards white and with only few black companies gradually joining the industry also brings into doubt media freedom editorial independence ethics and integrity among media practitioners Therefore the decoloniality movement seeks to confront these structural challenges head on via dialogue to ensure the integrity of the journalism profession Decolonising journalism in South Africa is published at a time in which journalism serves a watchdog and a critique of a democratic government and needs to follow a bottom up social justice approach and become a voice to the voiceless Therefore this book seeks to revolutionise the media in a way that even the language of reporting of certain issues needs to be changed to a balanced kind of reporting characterised by principles of no fear or favour

(editor), Surapati Pramanik (editor), 2016-11-05 Neutrosophic theory and applications have been expanding in all directions at an astonishing rate especially after the introduction of the journal entitled Neutrosophic Sets and Systems. New theories, techniques, algorithms have been rapidly developed. One of the most striking trends in the neutrosophic theory is the hybridization of neutrosophic set with other potential sets such as rough set, bipolar set, soft set, hesitant fuzzy set, etc. The different hybrid structures such as rough neutrosophic set, single valued neutrosophic rough set, bipolar neutrosophic set, single valued neutrosophic hesitant fuzzy set, etc. are proposed in the literature in a short period of time. Neutrosophic set has been a very important tool in all various areas of data mining, decision making, e learning, engineering, medicine, social science, and some more. The book *New Trends in Neutrosophic Theories and Applications* focuses on theories, methods, algorithms for decision making and also applications involving neutrosophic information. Some topics deal with data mining, decision making, e learning, graph theory, medical diagnosis, probability theory, topology, and some more. 30 papers by 39 authors and coauthors.

Being a Teacher in Post-Apartheid South Africa Yusuf Sayed, Marcina Singh, 2025-05-01 In a compelling exploration of the challenges faced by newly qualified teachers (NQTs) in South Africa's evolving educational landscape, this book provides an empirically grounded account of their experiences. Drawing on extensive research, it offers a poignant narrative that seeks to illuminate the nuanced journey these educators embark upon as they transition from teacher education spaces to the complex reality of classrooms in post-Apartheid South Africa. The book acts as a crucial platform for the voices of NQTs, shedding light on the myriad enablers and disablers they encounter during this transformative period. Timely and relevant, it tackles pressing questions about the readiness of teacher education to prepare students for the demands of South African schools. The book charts the transition from teacher education to active teacher for NQTs. The lessons distilled from this research present a clarion call for a re-assessment of teacher education policies and practices. This book arrives at a pivotal moment as South Africa reviews its teacher education policies. With the quality of initial teacher education programmes under scrutiny, the book's critiques, findings, and recommendations serve as indispensable tools for policymakers, arguing for the need to reconceptualise South African teacher education policies. As South Africa strives to avoid a cycle of developing new teachers only to lose them due to inadequate support, this book seeks to support educators, policymakers, and all those invested in the future of South African education toward creating a more socially just education system, recognising the highly unequal society in which teachers work.
