Provided by publisher **Religion** Robert Cummings Neville, 2015-01-08 Religion is the third and final volume in Robert Cummings Neville's systematic development of a new philosophical theology. Unfolding through his earlier volumes *Ultimates* and *Existence* and now in *Religion*, philosophical theology considers first order questions generally treated by religious traditions through philosophical methods while reflecting Neville's long engagement with philosophy, theology, and Eastern and Western religious traditions. In this capstone to the trilogy, Neville provides a theory of religion and presents a sacred worldview to guide religious participation. His philosophical theory of value enlightens religions' approaches to ethics, spirituality, and religious institutional living and collaboration. With a detailed examination of plausibility conditions for sacred worldviews, the book concludes with an exploration of religionless religion for which institutions of religion are of penultimate value. Through the development of philosophical theology, Neville has built a unique multidisciplinary comparative nonconfessional theological system, one that addresses concerns and provides tools for scientific and humanistic scholars of religion, postmodern thinkers, intellectuals from both secular and religious backgrounds, and those interested in the global state of religion today.

Defining Religion Robert Cummings Neville, 2018-01-18 Provides a new orientation to philosophy of religion and a new theory of how religion ought to be defined. In this collection of essays written over the past decade, Robert Cummings Neville addresses contemporary debates about the concept of religion and the importance of the comparative method in theology while advancing and defending his own original definition of religion. Neville's hypothesis is that religion is a cognitive, existential, and practical engagement of ultimate realities, five ultimate conditions of existence that need to be engaged by human beings. The essays, which range from formal articles to invited lectures, develop this hypothesis and explore its ramifications in religious experience, philosophical theology, religious studies, and the works of important thinkers in philosophy of religion. *Defining Religion* is an excellent introduction to Neville's work, especially to the systematic philosophical theology presented in his magisterial three-volume set *Philosophical Theology*.

C.S. Peirce and the Nested Continua Model of Religious Interpretation Gary Slater, 2015 This study develops resources in the work of Charles S. Peirce, 1839-1914, for the purposes of contemporary philosophy. It contextualizes Peirce's prevailing influences and provides greater context in relation to the currents of nineteenth-century thought. Dr. Gary Slater articulates a nested continua model for theological interpretation, which is indebted to Peirce's creation of Existential Graphs, a system of diagrams designed to provide visual representation of the process of human reasoning. He investigates how the model can be applied by looking at recent debates in historiography. He deals respectively with Peter Ochs and Robert C. Neville as contemporary manifestations of Peircean philosophical theology. This work concludes with an assessment of the model's theological implications.

Metaphysics of Goodness Robert Cummings Neville, 2019-10-15 Develops a theory of culture based on a metaphysics that elaborates on the Platonic and Confucian traditions. In *Metaphysics of Goodness*, Robert Cummings Neville extends Alfred

North Whitehead's project of cultural studies which was based on a new metaphysics that Whitehead developed in *Adventures of Ideas*. Neville's focus is value or goodness in many modes. The metaphysics treated in this book derive from the Platonic and Confucian traditions with significant modifications of Whitehead, Peirce, Dewey, Confucius, Xunzi, and Zhou Dunyi. Part one develops a theory of form based on a metaphysics of harmony. Part two elaborates a theory of art based on a metaphysics of beauty. Part three sketches a theory of personhood based on a metaphysics of obligation. Part four discusses civilization in a systematic way based on a metaphysics of flourishing. Throughout the book, Neville elaborates a theory of interpretation that is inspired by Peirce, Dewey, and Xunzi but is not limited to their ideas. While the reasoning of the book is concise, it employs methodologies from many kinds of philosophy, art criticism, ethics, and cultural studies and sees philosophy as needing to learn from all these disciplines. Neville's work is informed by a lifelong engagement with the most important philosophers in history, including Plato, Aristotle, Whitehead, and Dewey. Here he offers an important argument that there is beauty not only in how people see the world but also in the world itself. Kevin Schilbrack, Appalachian State University

The Good Is One, Its Manifestations Many Robert Cummings Neville, 2016-09-30. Presents a twenty-first century progressive liberal Confucianism. Building on his long-standing work in metaphysics and Asian philosophy, Robert Cummings Neville presents a series of essays that cumulatively articulate a contemporary progressive Confucian position as a global philosophy. Through analysis of the metaphysical and moral traditions of Confucianism, Neville brings these traditions into the twenty-first century. According to Confucianism, rituals define most of our relations with other individuals, social institutions, and nature, and while rituals make possible the positive institutions of high human civilization, they may also lead to harmful behaviors, including racism, xenophobia, and sexism. Neville argues that the amendment of rituals that institutionalize oppression is a positive task which should be undertaken from within a skillfully ritualized life rather than in the form of external criticism. Confucianism in Neville's hands is a left-wing progressive liberal political philosophy, one that can address institutionalized oppression and suggest a path for moving forward.

Diversifying Philosophy of Religion Nathan R. B. Loewen, Agnieszka Rostalska, 2023-06-01. Much philosophical thinking about religion in the Anglophone world has been hampered by the constraints of Eurocentrism, colonialism, and orientalism. Addressing such limitations, head on, this exciting collection develops models for exploring global diversity in order to bring philosophical studies of religion into the globalized 21st century. Drawing on a wide range of critical theories and methodologies and incorporating ethnographic, feminist, computational, New Animist, and cognitive science approaches, an international team of contributors outlines the methods and aims of global philosophy of religion. From considering the importance of orality in African worldviews to interacting with Native American perspectives on the cosmos and investigating contemplative studies in Hinduism, each chapter demonstrates how expertise in different methods can be applied to various geographical regions, building constructive options for philosophical reflections on religion. *Diversifying Philosophy of Religion* raises important questions regarding who speaks for

and represents religious traditions setting the agenda for a truly inclusive philosophy of religion that facilitates multiple standpoints

Theology Without Walls Jerry L. Martin, 2019-10-01 Thinking about ultimate reality is becoming increasingly transreligious This transreligious turn follows inevitably from the discovery of divine truths in multiple traditions Global communications bring the full range of religious ideas and practices to anyone with access to the internet Moreover the growth of the nones and those who describe themselves as spiritual but not religious creates a pressing need for theological thinking not bound by prescribed doctrines and fixed rituals This book responds to this vital need The chapters in this volume each examine the claim that if the aim of theology is to know and articulate all we can about the divine reality and if revelations enlightenments and insights into that reality are not limited to a single tradition then what is called for is a theology without confessional restrictions In other words a Theology Without Walls To ground the project in examples the volume provides emerging models of transreligious inquiry It also includes sympathetic critics who raise valid concerns that such a theology must face This is a book that will be of urgent interest to theologians religious studies scholars and philosophers of religion It will be especially suitable for those interested in comparative theology inter religious and interfaith understanding new trends in constructive theology normative religious studies and global philosophy of religion
