Under The Strain Of Color:

Under the Strain of Color Gabriel N. Mendes, 2015-08-18 In *Under the Strain of Color* Gabriel N Mendes recaptures the history of Harlem's Lafargue Mental Hygiene Clinic a New York City institution that embodied new ways of thinking about mental health race and the substance of citizenship The result of a collaboration among the psychiatrist and social critic Dr Fredric Wertham the writer Richard Wright and the clergyman Rev Shelton Hale Bishop the clinic emerged in the context of a widespread American concern with the mental health of its citizens Mendes shows the clinic to have been simultaneously a scientific and political gambit challenging both a racist mental health care system and supposedly color blind psychiatrists who failed to consider the consequences of oppression in their assessment and treatment of African American patients Employing the methods of oral history archival research textual analysis and critical race philosophy *Under the Strain of Color* contributes to a growing body of scholarship that highlights the interlocking relationships among biomedicine institutional racism structural violence and community health activism

Under the Strain of Color David Mislin, 2015 This book recaptures the history of a largely forgotten New York City institution that embodied new ways of thinking about mental health race and the substance of citizenship Harlem's Lafargue Mental Hygiene Clinic was founded in 1946 as both a practical response to the need for low cost psychotherapy and counseling for black residents many of whom were recent migrants to the city and a model for nationwide efforts to address racial disparities in the provision of mental health care in the United States

Multifunctional Hydrogels José García-Torres, Carlos Alemán, Ram K. Gupta, 2024-04-19 Hydrogels are important polymer based materials with innate fascinating properties and applications they are three dimensional hydrophilic polymeric networks that can absorb large amounts of water or aqueous fluids and are biocompatible mechanically flexible and soft The incorporation of functionalities to develop smart and bioactive platforms has led to a myriad of applications This book offers a comprehensive overview of multifunctional hydrogels covering fundamentals properties and advanced applications in a progressive way While each chapter can be read stand alone together they clearly describe the fundamental concepts of design synthesis and fabrication as well as properties and performances of smart multifunctional hydrogels and their advanced applications in the biomedical environmental and robotics fields This book Introduces readers to different hydrogel materials and the polymer types used to fabricate them Discusses conducting polymer hydrogels nanocomposite hydrogels and self healing hydrogels Covers synthesis methodologies and fabrication techniques commonly used to confer certain structures and or architectures Shows how hydrogels can be modified to incorporate new functionalities able to respond to physical and or chemical changes Examines applications including bioelectronics sensors and biosensors tissue engineering drug delivery antipathogen applications cancer theranostics environmental applications and soft robotics with chapters showcasing the main advances achieved up to date in every field Multifunctional Hydrogels From Basic Concepts to Advanced Applications serves as a valuable resource for academic and industry researchers from interdisciplinary fields including materials science chemistry chemical engineering bioengineering physics and pharmaceutical engineering

Color Space and Its Divisions Rolf G. Kuehni, 2003-04-28 It has been postulated that humans can differentiate between millions of gradations in color Not surprisingly no completely adequate detailed catalog of colors has yet been devised however the quest to understand record and depict color is as old as the quest to understand the fundamentals of the physical world and the nature of human consciousness Rolf Kuehni s *Color Space and Its Divisions* Color Order from Antiquity to the Present represents an ambitious and unprecedented history of man s inquiry into color order focusing on the practical applications of the most contemporary developments in the field Kuehni devotes much of his study to geometric three dimensional arrangements of color experiences a type of system developed only in the mid nineteenth century Color spaces are of particular interest for color quality control purposes in the manufacturing and graphics industries The author analyzes three major color order systems in detail Munsell OSA UCS and NCS He presents historical and current information on color space developments in color vision psychology psychophysics and color technology Chapter topics include A historical account of color order systems Fundamentals of psychophysics and the relationship between stimuli and experience Results of perceptual scaling of colors according to attributes History of the development of mathematical color space and difference formulas Analysis of the agreements and discrepancies in psychophysical data describing color differences An experimental plan for the reliable replicated perceptual data necessary to make progress in the field Experts
