The Palgrave Handbook of

Breakthrough Technologies in Contemporary Organisations Mahmoud Moussa, Adela McMurray, 2025-03-08 This handbook traverses the broad spectrum of ICT management engaging readers to consider not only the beneficial transformations triggered by these technologies but also the organisational challenges they present From the disruption brought about by machine learning to the vast opportunities unleashed by the evolution of big data analytics to the revolution of financial technology FinTech this handbook offers a thorough and comprehensive journey through the landscape of ICT The focus is not solely on the breakthrough technologies themselves but the intricate patterns of their evolution adoption management and the subsequent ripples they create in the organisational fabric The handbook challenges current views provokes new insights and inspires a futuristic view of managing ICT in the ever evolving business landscape **What else do Managers do?** , What do Managers do? , *What do Organisations look like?* , Deductive Irrationality Stephen McCarthy, David Kehl, 2008-04-29 Deductive Irrationality examines and critiques economic rationalism from the perspective of political philosophy The essays in this collection analyze not only the work of founders of the discipline of economics but also political philosophers influential in this founding and select contributors of seminal theories in modern economic thought namely Thomas Hobbes John Locke Adam Smith Alfred Marshall John Maynard Keynes Friedrich Hayek Gunnar Myrdal Robert E Lucas Jr and John F Muth The main theme linking all of the essays together is that economics is a product of modern rationalism and shares with that rationalism the belief that the only real knowledge is scientific knowledge Derived from a scientific method modeled on mathematics this method gives both modern political science and modern economics their abstract character Adam Smith's contribution to Western thought was more than mere economics his innovations and his variance from previous thinkers follows Machiavelli in finding human nature in the realistic conception of examining men as how they are rather than the classical view that we should look to the idea of man's formal excellence To Smith humanity emerges from a desire for self preservation where every worker competes to exchange the fruits of their labor with that of others The result is a gap between the world of common sense and the world of theory that practitioners in both fields no longer truly understand By adopting the perspective of political philosophy the contributors take an approach that is alien to most economists and in doing so address many of the currents and tensions that underlie modern economic theory and by implication the rational choice theory in political science Innovative Applications of Big Data in the Railway Industry Kohli, Shruti, Kumar, A.V.
