Human-computer Interaction, INTERACT '03

Matthias Rauterberg,Marino Menozzi,Janet Wesson,2003 This work brings together papers written by researchers and practitioners actively working in the field of human computer interaction It should be of use to students who study information technology and computer sciences and to professional designers who are interested in User Interface design

Advances in Self-Organizing Maps J.C. Principe,Risto Miikkulainen,2009-06-04 th These proceedings contain refereed papers presented at the 7 WSOM held at the Casa Monica Hotel St Augustine Florida June 8 10 2009 We designed the workshop to serve as a regular forum for researchers in academia and industry who are interested in the exciting field of self organizing maps SOM The program includes excellent examples of the use of SOM in many areas of social sciences economics computational biology engineering time series analysis data visualization and computer science as well a vibrant set of theoretical papers that keep pushing the envelope of the original SOM Our deep appreciation is extended to Teuvo Kohonen and Ping Li for the plenary talks and Amaury Lendasse for the organization of the special sessions Our sincere thanks go to the members of the Technical Committee and other reviewers for their excellent and timely reviews and above all to the authors whose contributions made this workshop possible Special thanks go to Julie Veal for her dedication and hard work in coordinating the many details necessary to put together the program and local arrangements Jose C Principe Risto Miikkulainen

Artificial Intelligence in Higher Education Vladimír Mařík,Olga Štěpánková,1990-08-08 This volume presents the written versions of talks delivered at the symposium The advent of AI in Higher Education held in Prague Czechoslovakia October 23 25 1989 Contributions review the current impact of AI on the educational process stressing the problems and needs of universities Particular systems projects and methodologies are described with the aim of gathering and generalizing the experience obtained The latest developments prove that AI offers interesting methods which could be used with success across a wider range in the domain of education The nature and spirit of AI forms a new phenomenon which necessitates reconsidering the whole educational process Papers in this volume describe sophisticated tutoring systems as well as suggestions for new curricula

Libraries Without Walls 6 Peter Brophy,Jenny Craven,Margaret Markland,Manchester Metropolitan University. Centre for Research in Library and Information Management,2006 This edited collection is drawn from the sixth Libraries Without Walls Conference held in 2005 From their beginnings in 1995 the Libraries Without Walls conferences have mapped a major change in the practice of librarianship While library services are still concerned to provide users with physical access to their buildings electronic access often from remote locations is becoming ever more dominant Papers presented at previous LWW conferences have provided examples of how libraries are pushing out the frontiers of their services In 2005 a different approach was taken The question was asked How do we know whether these new services are having a positive impact on our users In response papers written by leading professionals worldwide followed these broad themes theoretical approaches to the evaluation of the new services with an emphasis on qualitative methods the user experience what do we know about the users of these services assessment of the usability

including the accessibility of the services measuring the outcomes and impact Readership These state of the art papers will enable library managers and information professionals in all sectors to keep abreast of the latest developments in this vital area The book will also assist educational specialists and course developers in increasing their understanding of the role and importance of information in the learning process

Questions and Information Systems Thomas W. Lauer,Eileen Peacock,Arthur C. Graesser,2013-04-15 The design and functioning of an information system improve to the extent that the system can handle the questions people ask Surprisingly however researchers in the cognitive computer and information sciences have not thoroughly examined the multitude of relationships between information systems and questions both question asking and answering The purpose of this book is to explicitly examine these relationships Chapter contributors believe that questions play a central role in the analysis design and use of different kinds of natural or artificial information systems such as human cognition social interaction communication networks and intelligent tutoring systems Their efforts show that data structures and representations need to be organized around the questioning mechanisms in order to achieve a quick retrieval of relevant useful information

Classification and Knowledge Organization Rüdiger Klar,Otto Opitz,2013-03-14 Large collections of data and information necessitate adequate methods for their analysis The book presents such methods proposes and discusses recent approaches and implementations and describes a series of practical applications

Empirical Research on Semiotics and Visual Rhetoric Danesi, Marcel,2018-02-23 The study of symbols has long been considered a necessary field to unravel concealed meanings in symbols and images These methods have since established themselves as staples in various fields of psychology anthropology computer science and cognitive science Empirical Research on Semiotics and Visual Rhetoric is a critical academic publication that examines communication through images and symbols and the methods by which researchers and scientists analyze these images and symbols Featuring coverage on a wide range of topics such as material culture congruity theory and social media this publication is geared toward academicians researchers and students seeking current research on images symbols and how to analyze them
