Wannabe U Inside The Corporate University:

Wannabe U Gaye Tuchman, 2011-08-22 Based on years of observation at a large state university Wannabe U tracks the dispiriting consequences of trading in traditional educational values for loyalty to the market Aping their boardroom idols the new corporate administrators at such universities wander from job to job and reductively view the students there as future workers in need

How the Neoliberalization of Academia Leads to Thoughtlessness Justin Pack, 2018-11-15 Universities across the US have committed to a process of neoliberalization that is radically altering higher education academia is increasingly being run like a business As a result the university is becoming less and less a place of wonder self cultivation and thinking and instead is becoming more and more a place to specialize strategize produce and profit Students race through coursework to bolster job prospects while facing massive debt Faculty scramble for the biggest grants and angle for the most prestigious journals Sink or swim publish or perish triumph and win there is no longer time to think and to wonder This undermines the opportunity for students to develop into good citizens that can truly think critically and judge carefully Thinking and judgment are according to the philosopher Hannah Arendt the only things that can save us if the powerful machines of science or capitalism begin to work in ways they should not Arendt saw Nazi Germany use the newest science and the best economic management to systematically kill six million Jews She saw the disturbing inability of the populace and the intellectuals to capably resist the Nazi machine once it got rolling Applying Arendt's insights to modern academia Pack argues that unless checked neoliberalization threatens to turn the university into a place that discourages thinking and the development of judgment in favor of hyper specialization and strategic action

The Toxic University John Smyth, 2017-06-23 This book considers the detrimental changes that have occurred to the institution of the university as a result of the withdrawal of state funding and the imposition of neoliberal market reforms on higher education It argues that universities have lost their way and are currently drowning in an impenetrable mush of economic babble spurious spin offs of zombie economics management speak and militaristic corporate jargon John Smyth provides a trenchant and excoriating analysis of how universities have enveloped themselves in synthetic and meaningless marketing hype and explains what this has done to academic work and the culture of universities specifically how it has degraded higher education and exacerbated social inequalities among both staff and students Finally the book explores how we might commence a reclamation It should be essential reading for students and researchers in the fields of education and sociology and anyone interested in the current state of university management

Higher Education, Stratification, and Workforce Development Sheila Slaughter, Barrett Jay Taylor, 2015-11-17 This work analyses how political economic shifts contribute to competition within

higher education systems in the US EU and Canada The authors highlight competition for prestige and public and private subsidies exploring the consequences of these processes through theoretical and empirical analyses Accordingly the work highlights topics that will be of interest to a wide range of audiences Concepts addressed include stratification privatization of formerly public subsidies preference for high tech academic fields and the vocationalization of the curriculum i e Science Technology Engineering and Mathematics STEM fields selected professions and business rather than the liberal arts or the Humboldtian vision of the university Across national contexts and analytic methods authors analyze the growth of national policies that see universities as a sub set of economic development casting universities as corporate research laboratories and education as central to job creation Throughout the volume the authors make the case that national and regional approaches to politics and markets result in different experiences of consequences of academic capitalism While these shifts serve the interests of some institutions others find themselves struggling to meet ever greater expectations with stagnant or shrinking resource bases
