War In Heaven The Arms Race In Outer Space:

War in Heaven Helen Caldicott, Craig R. Eisendrath, 2007 When most of us think about the potential of outer space for future generations we think of world communications satellite navigation and scientific exploration U S Space Command however thinks about weapons Believing that conflict in space and wars fought from space are inevitable the president has called on the agency to weaponize outer space and thus provoke an arms race that could cost the United States trillions of dollars and could lead to the demise of the human race In War in Heaven a Nobel Prize nominated peace activist and a former U S foreign service officer who helped write the Outer Space Treaty of 1967 look at the history of military uses of space and the current plans for militarizing the heavens including kinetic laser nuclear bombardment and anti satellite weapons Contrary to the claims of Secretary of Defense Donald Rumsfeld that the United States faces a space Pearl Harbor Caldicott and Eisendrath show that the United States itself is today the principal obstruction to passage of an international treaty banning weapons from outer space At a time when plans to build and deploy space weapons are on the administration s agenda but only just becoming known to the general public this book will help launch a national discussion of a critical issue

Capital and the Cosmos Peter Dickens, 2023-01-01 This book offers a new understanding of society s relations with the cosmos Entrepreneurs such as Jeff Bezos and Elon Musk receive a great deal of publicity but offer unlikely and implausible visions of space tourism for the general public Meanwhile asteroids are seen as rare materials which will be extracted and used to produce untold riches for earthbound citizens The reality is rather different First there is no evidence that owners of capital are attempting to extract rare materials in the cosmos The costs would be out of this world But capital not governments is determining how outer space should be used Capital s investments in aerospace companies are actively determining forms of military interventions and the equipment used And satellite television pumps out forms of culture aimed at a global audience But these are being ignored and subverted by for example indigenous peoples In short this book sets out a new understanding of our relations with the cosmos The forces of capital are certainly powerful but at the same time they are being challenged subverted and even overturned

Reconceptualising Arms Control Neil Cooper, David Mutimer, 2014-01-02 The theory and practice of arms control seemed to have its heyday during the height of the Cold War with its focus on the East West conflict and nuclear arms In the past twenty years both arms technologies and various practices aimed at their control have continued to develop but scholarly thinking has not kept up This volume seeks to redress this scholarly neglect of the range of issues associated with the control of the means of violence by asking the question what does arms control mean in the 21st Century In asking this question the volume examines issues surrounding sovereignty geopolitics nuclear disarmament securitization of space technological developments human rights the clearance of landmines the regulation of small arms and the control of the black market for arms and nuclear secrets The book discusses terrorism with reference to the case of the suicide attacks in Beirut in 1983 and how the Obama administration is

orientating its posture on nuclear arms This book was published as a special issue of Contemporary Security Policy

Yearbook on Space Policy 2006/2007 Kai-Uwe Schrogl,Charlotte Mathieu,Nicolas Peter,2008-10-20 The Yearbook on Space Policy aims to be the reference publication analyzing space policy developments Each year it presents issues and trends in space policy and the space sector as a whole Its scope is global and its perspective is European *The Province of All Mankind* Stephen Buono,2025-07-15 The Province of All Mankind is the story of a powerful idea about the cosmos Born in the science fiction literature of the nineteenth century and maturing in the Age of Apollo this idea held that outer space should be preserved as a sanctuary from human strife free from weapons warfare and political rivalry If humanity could somehow leave violence behind as it moved into space perhaps peace would finally reign Bucking a half century of space race scholarship Stephen Buono argues that despite waging a totalizing Cold War the United States achieved stunning diplomatic successes that heralded the cosmos as a realm of peace and cooperation The early story of space politics is not primarily one of militarization but rather of political prescience and restraint The Province of All Mankind demonstrates that space became a unique domain of American foreign relations and international law and provides lessons for the Second Cold War unfolding over the horizon

Original Sin Bleddyn E. Bowen,2023-01-01 Space technology was developed to enhance the killing power of the state The Moon landings and the launch of the Space Shuttle were mere sideshows drawing public attention away from the real goal military and economic control of space as a source of power on Earth Today as Bleddyn E Bowen vividly recounts thousands of satellites work silently in the background to provide essential military intelligence and economic capabilities No major power can do without them Beyond Washington Moscow and Beijing truly global technologies have evolved from the ground floor of the nuclear missile revolution to today s orbital battlefield shaping the wars to come World powers including India Japan and Europe are fully realizing the strategic benefits of commanding Earth s cosmic coastline as a stage for war development and prestige Yet as new contenders spend more and more on outer space there is scope for cautious optimism about the future of the Space Age if we can recognize rather than hide its original sin

Sex, Politics, and Religion in Star Wars Douglas Brode,Leah Deyneka,2012-07-02 In 1977 Star Wars blazed across the screen to become one of the highest grossing and most beloved movies of all time spawning an unprecedented merchandising phenomenon It was followed by two sequels and three prequels all of which became blockbusters Comic books novels graphic novels and magazines devoted to the films added to the mythology of George Lucas s creation Despite the impact of the franchise on popular culture however discussion of the films from a scholarly perspective has not kept pace with the films In *Sex Politics and Religion in Star Wars* An Anthology Douglas Brode and Leah Deyneka have assembled a provocative collection of essays exploring some of the more intriguing aspects of the Star Wars phenomenon Contributors to the volume tackle such hot topics as race and racism in the Star Wars galaxy Judeo Christian and Eastern religious themes homosexual romance and philosophical and political implications both earthbound and otherworldly These essays interpret

the Star Wars universe from a variety of perspectives including feminist and Freudian offering insights from writers who bring a new passion to the subject A companion volume to Myth Media and Culture in Star Wars Sex Politics and Religion in Star Wars is an authoritative anthology incorporating scholarly analysis with engaging insights It will engross readers both fans and scholars alike [Sleepwalking to Armageddon](#) Helen Caldicott,2017-11-07 A frightening but necessary assessment of the threat posed by nuclear weapons in the twenty first century edited by the world s leading antinuclear activist With the world s attention focused on climate change and terrorism we are in danger of taking our eyes off the nuclear threat But rising tensions between Russia and NATO proxy wars erupting in Syria and Ukraine a nuclear armed Pakistan and stockpiles of aging weapons unsecured around the globe make a nuclear attack or a terrorist attack on a nuclear facility arguably the biggest threat facing humanity In Sleepwalking to Armageddon pioneering antinuclear activist Helen Caldicott assembles the world s leading nuclear scientists and thought leaders to assess the political and scientific dimensions of the threat of nuclear war today Chapters address the size and distribution of the current global nuclear arsenal the history and politics of nuclear weapons the culture of modern day weapons labs the militarization of space and the dangers of combining artificial intelligence with nuclear weaponry as well as a status report on enriched uranium and a shocking analysis of spending on nuclear weapons over the years The book ends with a devastating description of what a nuclear attack on Manhattan would look like followed by an overview of contemporary antinuclear activism Both essential and terrifying this book is sure to become the new bible of the antinuclear movement to wake us from our complacency and urge us to action **Winning Space** Brandon J. Weichert,2020-09-15 When President Donald J Trump announced the creation of America s sixth branch of the military the United States Space Force many in Washington scoffed But U S rivals in China Russia Iran and North Korea took notice Since the end of the Cold War these American foes have chafed under the full spectrum dominance that the American superpower has enjoyed globally They have identified space as a key strategic domain where they can challenge and possibly defeat the United States military And depriving the U S military and or its economy of access to space during an international crisis could spell doom for the United States in other strategic domains land sea air and cyberspace After all space is critical for America s vaunted information dominance Satellites overhead are the backbone of America s global military Remove them from orbit and U S forces worldwide are rendered deaf dumb and blind What s more space is a more than 1 trillion economy just waiting to be developed Whichever country gets there first will have considerable economic and geopolitical power on Earth Despite President Trump s creation of the Space Force Swamp Dwellers in Washington continue resisting his reforms to U S space and technology policy Winning Space tracks the increasing competition the United States is facing in the technology sector and depicts how the United States has been engaged in a Second Space Race and how it has been losing Author Brandon Weichert warns how the United States is at risk for a Pearl Harbor type event in space Weichert advocates for the full embrace of Trump s reforms for America s flailing space policy while also calling for a

minimum 1 trillion investment in advanced research and development here in the United States to stay ahead of America's advancing foes. Contrary to what many Americans may think, the United States has been declining in space and the high technology development sector. Should it lose its dominance in these areas, it will surely lose its superpower status. The next decade presents U.S. policymakers one last chance to preserve the superpower status that America fought two world wars and the Cold War to build. Time is not on our side. We are on notice, but we have not noticed.

Death by Moderation David A. Koplow, 2010. This book addresses an important but little noticed phenomenon in the revolutionary world of military technology. Across a wide range of otherwise unrelated weapons programs, the Pentagon is now pursuing arms that are deliberately crafted to be less powerful, less deadly, and less destructive than the systems they are designed to supplement or replace. This direction is historically anomalous: military forces generally pursue ever bigger bangs, but the modern conditions of counterinsurgency warfare and military operations other than war, such as peacekeeping and humanitarian assistance, demand a military capable of modulated force. By providing a capacity to intervene deftly yet effectively, the new generations of useable weaponry should enable the U.S. military to accomplish its demanding missions in a manner consistent with legal obligations, public relations realities, and political constraints. Five case studies are provided regarding precision-guided smart bombs, low-yield nuclear weapons, self-neutralizing anti-personnel land mines, directed energy anti-satellite weapons, and non-lethal weapons.

North of Empire Jody Berland, 2009-10-07. Theorizes the relationship between nation, media, and globalization by way of Canadian cultural studies.

Peace and Conflict Studies David P. Barash, Charles P. Webel, 2021-08-27. Peace and Conflict Studies sets the standard for an accessible introduction, a comprehensive exploration and analysis of 21st-century world events, including updated coverage of the COVID-19 pandemic, the Middle East, the Social Justice movements within the US, and Global Climate Change. The text examines current conflicts, explores the important aspects of positive peace, individual violence, nationalism, and terrorism, provides numerous visual aids, questions for further study, and suggested readings, and furnishes a comprehensive range of material to enlighten and enrich future discussion and encourage further academic pursuit. With a broad and authoritative scope, this introductory text chronicles a plethora of important global topics from pre-history to the present.

BEYOND PERMANENCE Craig Eisendrath, 2011-02-17. Beyond Permanence: The Great Ideas of the West covers the full range of Western thought. The first part reviews Western thought from its earliest beginnings in the civilization of Sumer through the philosophy of Hegel. After Sumer, it covers Egypt, Judaism, Classical philosophy focusing on Plato and Aristotle, Christianity and the Gnostics, the medieval church, and the mystics, and the final attempt by philosophers like Rene Descartes and Immanuel Kant to pin down the world in a comprehensive philosophy. The aim was permanence of explanation, describing a world of permanence whose actions reflected the essential nature of its constituents. The second part moves into the modern age with the new physics and biology and the philosophies of William James and Alfred North Whitehead. It shows, for example, how the mind is not the permanent soul but is rather the

manifestation of the body particularly the brain Through the work of John Dewey and others it outlines a new activism whereby people don't accept society as a permanent order but think of it as constantly subject to improvement We are not in society but society is in us and is open to our needs and desires **Phantom Democracy** C. Boggs, 2011-08-15 In a powerful new book Boggs traces the historical evolution of American politics by focusing on the gradual triumph of corporate and military power over democratic institutions and practices The consequences of expanding United States global presence since World War II involving an integrated and interwoven system of power based in the permanent war economy national security state and corporate interests has meant erosion of democratic politics strengthening of the imperial presidency increased corporate and military influence over elections and legislation weakening of popular governance and diminution of citizenship The events of 9/11 and their aftermath including the War on Terror two lengthy wars and foreign occupations new threats of war and massive increases in Pentagon spending have only deepened the trend toward ever more concentrated forms of power in a society that ostensibly embraces democratic values Such developments Boggs argues have deep origins in American history going back to the founding documents ideological precepts of the Constitution early oligarchic rule slavery the Indian wars and westward colonial expansion [Loving This Planet](#) Helen Caldicott, 2011-07-26 Conversations on sustainability renewable energy and other pressing issues A level of intellectual discussion all too absent in our national discourse Booklist A co-founder of Physicians for Social Responsibility named one of the most influential women of the twentieth century by the Smithsonian Institute Helen Caldicott presents a valuable collection of her interviews with prominent figures and environmentalists in which she scrutinizes our unsustainable dependence on nuclear energy Explores how the United States could transition to renewable energy Raises awareness about issues such as deforestation and sea level rise Extending well beyond the scope of conventional environmental discussions this book gives us Martin Sheen on grassroots movements and unionized labor Chris Hedges on the costs of standing up for your morals and award winning actress Lily Tomlin on contemporary politics in a sarcastic and witty exchange at once hilarious and inspiring and also includes interviews with Maude Barlow Bill McKibben Jonathan Schell Daniel Ellsberg Lester Brown Frances Fox Piven Bob Herbert and more A treasure trove of anecdotes featuring high profile politicians academics and celebrities Surprising statistics about nuclear waste storage rising sea levels and military spending serve as an alarm but Caldicott and her collaborators also offer many innovative solutions Publishers Weekly God bless Helen Caldicott Los Angeles Times
