War In Human Civilization:

War in Human Civilization Azar Gat, 2008-03-26 Why do people go to war Is it rooted in human nature or is it a late cultural invention How does war relate to the other fundamental developments in the history of human civilization And what of war today is it a declining phenomenon or simply changing its shape In this truly global study of war and civilization Azar Gat sets out to find definitive answers to these questions in an attempt to unravel the riddle of war throughout human history from the early hunter gatherers right through to the unconventional terrorism of the twenty first century In the process the book generates an astonishing wealth of original and fascinating insights on all major aspects of humankind s remarkable journey through the ages engaging a wide range of disciplines from anthropology and evolutionary psychology to sociology and political science Written with remarkable verve and clarity and wholly free from jargon it will be of interest to anyone who has ever pondered the puzzle of war

War in Human Civilization Azar Gat, 2008 Why do people go to war Is it rooted in human nature or is it a late cultural invention And what of war today is it a declining phenomenon or simply changing its shape This book sets out to find definitive answers to these questions in an attempt to unravel the riddle of war throughout human history

[The Causes of War and the Spread of Peace](#) Azar Gat, 2017 The causes of war why people fight is one of the big questions of human existence Azar Gat s book ranging from the beginning of prehistory to the 21st century offers a definitive answer to the lingering mystery

The Human Civilization Valentin Matcas, 2016-04-20 Were there advanced civilizations on Earth older than what it is currently believed and accepted Because we keep noticing their traces everywhere while authorities deny their presence Are there other civilizations out there among planets and stars Because we keep seeing their people around here pursuing their obscure interests with authorities ignoring everything Are there nonhuman civilizations on Earth in parallel with the human civilization Because they interact from the shadow of the underground with the human civilization while again authorities deny systematically their presence And when authorities are constrained in any way to give an answer they state vaguely that it is a matter of human survival And how can humans defend themselves of anyone and anything as they are held in ignorance and denial Is there life after death Because countless of people had died and came back to tell their story and it is always consistent This implies the existence of higher extraordinary civilizations in parallel with the human civilization from above These higher civilizations could be possible since their niches of life and existence are accurate and already present within other realities Science and academia ignore this topic entirely ridiculing all seekers of higher truth and forcing them in this manner to stop their research What can there be more important to know in this world than the meaning of life itself the meaning of this entire human civilization along with the meaning of the lives and existence of all humans here in this world and in all higher worlds Why postponing disclosure if it is imperative for people s wider existence Who profits and who loses through this entire coverup Who exactly controls the current human authority Why is humanity kept ignorant in what it concerns the most important subject of all life everywhere and life

eternally intelligent and civilized life Because if there are other civilizations on Earth and elsewhere human or not if there are other realities up there besides this one populated and civilized then people s ignorance renders them vulnerable when they die and have to go elsewhere In this manner once you ignore the kind of realities that may be out there you might be tricked to go and live in treacherous dubious unholy worlds claiming that they are in fact the holly lands promised to you by your own religion And so you disappear Because it is stated in religious records to be careful not to follow false deities Yet how can you know anything in this domain if you are kept ignorant the entire time and probably lied to misled and many times tempted with irrelevant material compensations throughout life This book helps you understand civilizations from a rigorous comprehensive perspective including the meaning interests agreements and intentions that civilizations have in the wider world why individuals form civilizations as an end product of their cumulative lifetime efforts and furthermore what meanings these civilizations have in the wider world **Humanity** Barry Brown,2017-01-17 **An Introduction to Global Studies** Patricia J. Campbell,Aran MacKinnon,Christy R. Stevens,2010-03-08 Taking an interdisciplinary approach An Introduction to Global Studies presents readers with a solid introduction to the complex interconnected forces and issues confronting today s globalized world Introduces readers to major theories key terms concepts and notable theorists Equips readers with the basic knowledge and conceptual tools necessary for thinking critically about the complex issues facing the global community Includes a variety of supplemental features to facilitate learning and enhance readers understanding of the material **Most Dangerous Wars in World History** Yknip Ahsi,2025-02-01 Most Dangerous Wars in World History explores the deadliest and most consequential wars that have shaped human civilization Covering conflicts from ancient battles to modern wars it examines military strategies technological advancements and their political social and economic repercussions Without glorifying war the book provides an objective analysis of warfare s impact on history emphasizing the importance of learning from the past to strive for a more peaceful future **War and Civilization (1901)** William Peterfield Trent,2009-08 This scarce antiquarian book is a facsimile reprint of the original Due to its age it may contain imperfections such as marks notations marginalia and flawed pages Because we believe this work is culturally important we have made it available as part of our commitment for protecting preserving and promoting the world s literature in affordable high quality modern editions that are true to the original work **War in the 21st Century** G. D. Bakshi,1997 **Arms and the University** Donald Alexander Downs,Ilia Murtazashvili,2012-02-27 The gap between the U S military and society has widened in recent years posing problems for the constitutional order The gap is especially acute in major universities Arms and the University probes various dimensions of the tense relationship between the military and the university Developing and applying a theory of civic and liberal education this book shows how some military presence on campus can contribute to the diversity of ideas and the education of all students Covert Wars and Clash of Civilizations Joseph P. Farrell,2020-07-24 Oxford educated historian Joseph P Farrell delivers the sequel to his best selling Covert Wars and

Breakaway Civilizations part of his book series on suppressed technology Nazi survival secret finance and postwar hidden conflicts His customary meticulous research and sharp analysis blow the lid off of a worldwide web of nefarious financial and technological control that very few people even suspect exists Farrell delves deeper into the breakaway civilizations created by the Nazis in South America and other parts of the world He elaborates on the advanced technology that they took with them at the end of World War II and shows how they created a huge system of hidden finance with the involvement of leading financial institutions around the world He exposes the secret space programs used by the breakaway civilizations and reveals the clash of civilizations a virtual secret war going on around us He investigates the current space secrecy that involves UFOs suppressed technologies and the hidden oligarchs who control planet Earth for their own gain and profit Farrell probes the mystery surrounding Dr Kurt Debus and his links to NASA and Werner von Braun He uncovers the covert operations of Richard Bissell the flying saucer designs of Alfred Loedding and T Townsend Brown and strange activity on Mars involving UFOs He explains the magneto hydrodynamic anti gravity drives that would easily power such craft He includes a continued discussion of emulational technologies those that can imitate acts of god nature like earthquakes and storms from the standpoint of the culture of full spectrum dominance and the culture of plausible deniability Farrell includes plenty of astounding accounts documents and speculation on the amazing alternative history of hidden conflicts secret oligarchies and super technology

The Culture of War Richard A. Gabriel, 1990-04-23 Although war has been analyzed from many perspectives no scholar has satisfactorily explained why the human race fights and how we came to create a degree of military sophistication capable of destroying the entire species Gabriel addresses these questions in his study of the origins and development of warfare He looks particularly at the relationship between the evolution of the social institution of war and the development of the military institutions tactical sciences and technology required for organized conflict Beginning with a discussion of the biological and evolutionary history of man Gabriel investigates the proposition that the human race is genetically predisposed to warlike behavior He next reviews the archaeological record to test the common assumption that war has existed from the earliest times He traces the evolution of the social institutions and technology of war in a succession of ancient cultures beginning with the Bronze Age The development of armies tactics logistics and weapons is examined together with the psychological and social implications of mankind's choice to use them The work concludes with a discussion demonstrating how the practice of war in modern times relates to the perpetuation of values and institutional forms created by earlier societies especially those of classical Greece and Rome The first study to integrate the findings of cultural anthropology with the concerns of military analysis this work will be of interest to students and academics in these and related fields

The Performance of Video Games Kelly I. Aliano, 2022-11-10 When viewed through the context of an interactive play a video game player fulfills

the roles of both actor and spectator watching and influencing a game's story in real time This book presents video gaming as a virtual medium for performance scrutinizing the ways in which a player's interaction with the narrative informs personal historical social and cultural understanding Centering the author's own experiences as both video game player and performance scholar the book thoroughly applies concepts from theatre and performance studies Chapters argue that the posthuman player position now challenges what can be contextualized as a lived experience and how video games can change players relationships with historical events and contemporary concerns ultimately impacting how they develop a sense of self Using the author's own gaming experiences as a framework the book focuses on the intersection between player and narrative exploring what engagement with a storyline reveals about identity and society
