The Archives Aa. Vv., 2015-04-21 T00:00:00+02:00 The digital age has witnessed the development of a new kind of archive immaterial living and moving largely user generated and conceived for managing a wide variety of audio visual materials besides traditional films and videos The first part of this anthology investigates the ways in which media forms like web documentaries video art and digital art web series amateur productions and also mobile films can be stored and preserved within the new digital repositories The second part focuses on archival and preservation practices of the video game This approach understands the archive not simply as a memory box but as a fully contemporary practice that locates new media objects in the present and acknowledges their changing cultural and social configurations The democratic often immaterial living mobile nature of contemporary archives forces us to question whether or not the traditional notion of the archive still has a heuristic value Or if it would be perhaps better to reject any conventional idea of archive and embrace the notion of an archive

The Archive Incarnate Joseph Hurtgen, 2018-10-10 We live in an information economy a vast archive of data ever at our fingertips In the pages of science fiction powerful entities governments and corporations attempt to use this archive to control society enforce conformity or turn citizens into passive consumers Opposing them are protagonists fighting to liberate the collective mind from those who would enforce top down control Archival technology and its depictions in science fiction have developed dramatically since the 1950s Ray Bradbury discusses archives in terms of books and television media and Margaret Atwood in terms of magazines and journaling William Gibson focused on technofuturistic cyberspace and brain to computer prosthetics Bruce Sterling on genetics and society as an archive of social practices Neal Stephenson has imagined post cyberpunk matrix space and interactive primers As the archive is altered so are the humans that interact with ever advancing technology

Rogue Archives Abigail De Kosnik, 2021-12-14 An examination of how nonprofessional archivists especially media fans practice cultural preservation on the Internet and how digital cultural memory differs radically from print era archiving The task of archiving was once entrusted only to museums libraries and other institutions that acted as repositories of culture in material form But with the rise of digital networked media a multitude of self designated archivists fans pirates hackers have become practitioners of cultural preservation on the Internet These nonprofessional archivists have democratized cultural memory building freely accessible online archives of whatever content they consider suitable for digital preservation In Rogue Archives Abigail De Kosnik examines the practice of archiving in the transition from print to digital media looking in particular at Internet fan fiction archives De Kosnik explains that media users today regard all of mass culture as an archive from which they can redeploy content for their own creations Hence remix culture and fan fiction are core genres of digital cultural production De Kosnik explores among other things the anticanonical archiving styles of Internet preservationists the volunteer labor of online archiving how fan archives serve women and queer users as cultural resources archivists efforts to attract racially and

burrough, 2012-05-23 Net Works offers an inside look into the process of successfully developing thoughtful innovative digital media In many practice based art texts and classrooms technology is divorced from the socio political concerns of those using it Although there are many resources for media theorists practice based students sometimes find it difficult to engage with a text that fails to relate theoretical concerns to the act of creating Net Works strives to fill that gap Using websites as case studies each chapter introduces a different style of web project from formalist play to social activism to data visualization and then includes the artists or entrepreneurs reflections on the particular challenges and outcomes of developing that web project Scholarly introductions to each section apply a theoretical frame for the projects A companion website offers further

resources for hands on learning Combining practical skills for web authoring with critical perspectives on the web Net Works is ideal for courses in new media design art communication critical studies media and technology or popular digital internet culture *Broadening Horizon* Matthew Wilhelm Kapell,2025-02-13

Increasingly digital games center their narratives during or after the apocalypse In 2017 the action role playing game Horizon Zero Dawn offered a new take on society after the end of the world Horizon has since become a multimedia franchise with a second video game released in 2022 in addition to comic books a board game and other adaptations in development This collection analyzes the Horizon franchise and its presentation of the apocalypse ecology gender history and more Game story and game mechanics are fundamental to each essay and contributors offer a close reading or close playing of the games from perspectives as diverse as hauntology postcolonialism contemporary feminism and historiography This first collection on the Horizon franchise argues that we now live in an Apocalyptic period in the same way previous periods were known as Romantic Modernist or Realist Periods and makes the case that Horizon belongs at the crest of this new Apocalyptic Period and at the center of contemporary gaming and of game studies **Humanitarianism in the Modern World** Norbert Götz,Georgina Brewis,Steffen

Werther,2020-07-23 This is an innovative new history of famine relief and humanitarianism The authors apply a moral economy approach to shed new light on the forces and ideas that motivated and shaped humanitarian aid during the Great Irish Famine the famine of 1921 1922 in Soviet Russia and the Ukraine and the 1980s Ethiopian famine They place these episodes within a distinctive periodisation of humanitarianism which emphasises the correlations with politico economic regimes the time of elitist laissez faire liberalism in the nineteenth century as one of ad hoc humanitarianism that of Taylorism and mass society from c 1900 1970 as one of organised humanitarianism and the blend of individualised post material lifestyles and neoliberal public management since 1970 as one of expressive humanitarianism The book as a whole shifts the focus of the history of humanitarianism from the imperatives of crisis management to the pragmatic mechanisms of fundraising relief efforts on the ground and finance This book is also available as Open Access on Cambridge Core

Inventory of Federal Archives in the States ,1938 **Against the Carceral Archive** Damien Sojoyner,2023-04-25

Against the Carceral Archive is a meditation upon what author Damien M Sojoyner calls the carceral archival project offering a distillation of critical theoretical and activist work of prison abolitionists over the past three decades Working from collections at the Southern California Library Black Panthers LA Chapter the Coalition Against Police Abuse Urban Policy Research Institute Mothers Reclaiming Our Children and the collection of geographer Clyde Woods it builds upon theories of the archive to examine carcerality as the dominant mode of state governance over Black populations in the United States since the 1960s Each chapter takes up an element of the carceral archive and its destabilization destruction and containment of Black life its notion of the human and the production of pejorative blackness the intimate connection between police and military in the protection of racial capitalism and its fossil fuel based economy the role of technology in counterintelligence

and counterinsurgency logics. Importantly, each chapter also emphasizes the carceral archive's fundamental failure to destroy Black communal logics and radical Black forms of knowledge production, both of which contest the carceral archive and create other forms of life in its midst. Concluding with a statement on the reckoning with the radical traditions of thought and being which liberation requires, Sojoyner offers a compelling argument for how the centering of Blackness enables a structuring of the mind that refuses the violent exploitative tendencies of Western epistemological traditions as viable life-affirming practices.

The Book of Buechner W. Dale Brown, 2006-01-01 The most thorough and extensive investigation ever written on the much beloved writer, *The Book of Buechner* explores the ways in which Frederick Buechner's writing, particularly his fiction, presents the possibilities of grace in the midst of the ambiguities of human existence and introduces themes of Christian faith. Both long-time readers and neophytes seeking a guide through his writings will delight in the illuminating analysis Dale Brown has to offer. Intelligent and gratifying, *The Book of Buechner* is a much overdue literary journey through one of the most significant American writers of the last fifty years.

The Black Prairie Archives Karina Vernon, 2020-02-19 *The Black Prairie Archives: An Anthology* recovers a new regional archive of Black prairie literature and includes writing that ranges from work by nineteenth-century Black fur traders and pioneers, all of it published here for the first time, to contemporary writing of the twenty-first century. This anthology establishes a new Black prairie literary tradition and transforms inherited understandings of what prairie literature looks and sounds like. It collects varied and unique work by writers who were both conscious and unconscious of themselves as Black writers or as prairie people. Their letters, recipes, oral literature, autobiographies, rap, and poetry provide vivid glimpses into the reality of their lived experiences and give meaning to them. The book includes introductory notes for each writer in non-specialist language and notes to assist readers in their engagement with the literature. This archive and its supporting text offer new scholarly and pedagogical possibilities by expanding the nation's and the region's archives. They enrich our understanding of Black Canada by bringing to light the prairies' Black histories, cultures, and presences.
