Warships And Warship Modelling:

Warships and Warship Modelling David Wooley, William Clarke, 2007 Warships and Warship Modelling offers an overview of the design development and classification of modern warship types In the first section it analyzes the constructors original models explaining why and how they were made The reader is shown how to research and select information on specific ships and how to find and understand plans The book then turns to scale modeling with detailed chapters on choosing a subject a scale methods of construction materials and techniques and the details of fittings and painting Together the two sections give the model builder a deeper insight into the logic of the full sized vessel and the relationship between that vessel and the realistic scale model or working model

Large Scale Warship Models Kerry Jang, 2020-11-12 This illustrated guide presents step by step instructions and techniques for warship modelers ready for the challenge of building at larger scales Many warship modelers who work in smaller scales are daunted by the challenge of tackling something larger But in Large Scale Warship Models expert modeler Kerry Jang demonstrates that it s not as difficult as it may seem In fact any experienced modeler will already possess the basic skills required This volume covers the essential new techniques for working in scales that capture the grandeur of actual ships In the first part of the book Jang discusses how to choose between a kit a semi kit or building from scratch He also covers what conventional kit building skills are transferable to work on large scale projects Novel requirements like research obtaining plans and sourcing material or fittings are also covered The second part describes building methods including the latest techniques like casting fittings in resin These methods apply to both static and radio controlled models Original color photos illustrate each chapter and the book concludes with a gallery of superb models intended to inspire the would be large scale warship modeler to take the plunge

Naval Ship Models of World War II in 1/1250 and 1/1200 Scales Robert K. Liu, 2021-02-28 A guide for collectors and modelers packed with photos technical information practical advice and history The origins of 1 1250 and 1 1200 scale models can be traced back to the first years of the twentieth century and their use as identification aids by the military during the First World War When peace came the manufacturers aimed their increasingly sophisticated products at collectors and ever since then acquiring enhancing modifying or scratch building miniature ship models has been an avidly pursued hobby around the world This new book focuses on models of the ships of the Second World War and the author addresses all the practical issues that might confront collectors who like to enhance convert and modify their models or even scratch build models of ships not commercially available The book covers both Allied and Axis warships naval airplanes merchant conversions and even an Italian armed schooner and provides historic and technical information on the ships represented as well as practical advice on modeling them including twenty five chapters covering everything from initial production techniques such as spin casting silicon mold casting resin casting die casting plastic mold injection and 3D printing through techniques for enhancing and modifying models to eventually researching and scratch building an uncommon ship or type The focus is always on particular

vessels and the vast array covered builds into a fascinating panorama of the vessels that fought across the world's oceans in that era. The combination of intriguing background and historical information combined with detailed practical information and more than 300 stunning photographs makes this book irresistible to collectors, modelers or anyone with an interest in the navies of the Second World War. **Naval Ship Models of World War II in 1/1250 and 1/1200 Scales** Robert K

Liu, 2021-03-15 The origins of 1/1250 and 1/1200 scale models can be traced back to the first years of the twentieth century and their use as identification aids by the military during the World War I. When peace came the manufacturers aimed their increasingly sophisticated products at collectors and ever since then acquiring, enhancing, modifying or scratch building miniature ship models has been an avidly pursued hobby around the world. This book focuses on models of the ships of the World War II, probably the most popular subject for miniature model collectors, and the author, a well-known modeler himself, addresses all the practical issues that might confront those many collectors who like to enhance, convert and modify their models or even scratch build models of ships not commercially available. **Ship Models from Kits** David

Griffith, 2011-02-28 In the past thirty years the world of model kits has undergone a veritable revolution. New techniques in injection moulding have improved the scale accuracy and surface detail of the humble plastic kit, while many specialist companies now produce top quality resin models, vastly broadening the range of subjects on the market. However, the really radical change has been the advent of photo-etched brass fret, which allows the finest detail to be reproduced to scale. In ship modelling this has resulted in a new form of the hobby, mid-way between traditional build from the box, simplicity and the time-consuming demands of fabricating everything from scratch. These new materials have prompted innovative techniques which are comprehensively demonstrated in this new manual. Designed for those wishing to achieve the best results from their ship kits in the 1/700 to 1/350 range of scales, it uses step-by-step photographs to take the reader through the building of two models, one in plastic and one in resin, from basic construction, fittings and detailing to painting, finishing and display. Written by a highly experienced award-winning ship modeller, the book is a showcase for the contemporary approach to the hobby. Modelling Naval Ships in Small Scales Mike McCabe, 2021-04-26 This book provides a wealth of practical guidance

on building and painting realistic model naval ships, aimed at those who are new to this hobby through to the experienced modeller. An in-depth look at the creation of four models is included: the Type 45 destroyer HMS Daring, Dragon, the pre-war aircraft carrier USS Wasp, Aoshima, the River class frigate HMS Nadder, Starling Models, and the pocket battleship Admiral Graf Spee Academy. With a focus on the popular kit scales of 1/700 and 1/350 in the waterline style, this book demonstrates the techniques used in building model ships from the basic to the more complex, larger scale models requiring many differing skills. There are chapters on the fundamentals such as building resin kits, painting and weathering, rigging and creating a water effect. It provides guidance on more advanced techniques such as the use of photo-etched parts and creating rough water effects. Finally, it is packed with helpful tips and finishing touches such as making flags and how to take professional

standard photographs of your completed model **Building Warship Models** P. C. Coker,1974 Designing and Building Model RC Warships Glynn Guest,2024-06-24 Warships are often appealing subjects for working models especially if there is a personal or family connection with a vessel However models based on warships can have a reputation for being difficult to build and safely operate This can be avoided if the idea of Stand Off Scale is used This is where the model will have the appearance of the full size when sailing but is a practical working model boat To successfully build this type of working boat and minimize the problems that might occur it is important to have some understanding of how such ships work With this in mind this book not only details all the information needed to design outfit and operate a model warship but also supplies information about how the boats operate *Wooden Warship Construction* Brian Lavery,2017-04-30 A wonderful book detailing the construction of the Royal Navy s sailing warships from the maritime historian and author of Nelson s Navy Pirates and Privateers The National Maritime Museum in Greenwich houses the largest collection of scale ship models in the world many of which are official contemporary artifacts made by the craftsmen of the navy or the shipbuilders themselves and ranging from the mid seventeenth century to the present day As such they represent a three dimensional archive of unique importance and authority Treated as historical evidence they offer more detail than even the best plans and demonstrate exactly what the ships looked like in a way that even the finest marine painter could not achieve This book takes a selection of the best models to both describe and demonstrate the development of warship construction in all its complexity from the beginning of the 18th century to the end of wooden shipbuilding For this purpose it reproduces a large number of model photos all in full color and including many close up and detail views These are captioned in depth but many are also annotated to focus attention on interesting or unusual features which can be shown far more clearly than described Although pictorial in emphasis the book weaves the pictures into an authoritative text producing an unusual and attractive form of technical history This book includes plentiful visual representations of actual ships in model form and the accompanying graphics make for wonderful reading I cannot express enough how enjoyable this book is to read Spotter Up A high quality book which is recommended to all ship historians and modellers Military Modelling *Modeling Ships and Space Craft* Gina Hagler,2012-10-09 Modeling Ships and Space Craft The Science and Art of Mastering the Oceans and Sky begins with the theories of Aristotle and Archimedes moving on to examine the work of Froude and Taylor the early aviators and the Wright Brothers Goddard and the other rocket men and the computational fluid dynamic models of our time It examines the ways each used fluid dynamic principles in the design of their vessels In the process this book covers the history of hydrodynamic aero and fluid theory and its progression with some very accessible science examples including seminal theories Hydrodynamic principles in action are also explored with examples from nature and the works of man This is a book for anyone interested in the history of technology specifically the methods and science behind the use of scale models and hydrodynamic principles in the marine and aeronautical designs of today *Ship Models from the Age of Sail* Kerry

Jang,2022-03-15 Most period ship models are built from kits usually primarily of wood with some ready made fittings Although these commercial offerings have improved significantly in recent years all of them can be enhanced in accuracy or detail by an experienced modelmaker This book by an expert ship modeler distills lessons gleaned from a lifetime practicing the hobby to the highest standards setting out methods of improving basic kits and gradually developing the skills and confidence to tackle the construction of a model from scratch Using a variety of kits as the starting point each chapter demonstrates a technique that can be readily improved or a feature that can be replaced to the advantage of the finished model Topics include hull planking representing copper sheathing many aspects of more accurate masting and rigging and how to replace kit parts and fittings from scratch Ultimately the impact of a period model depends on its accuracy and the book also provides guidance on plans and references where to find them and how they are best used Offering advice expertise and inspiration Ship Models from the Age of Sail has something for anyone interested in building a period ship model whatever their level of skill

Airfix Models Jeremy Brook,2015-06-30 The best known and most important manufacturer of plastic model kits in the UK Airfix has been at the forefront of the industry since 1955 when the first Airfix aircraft kit appeared in UK branches of Woolworth s The kits were made to a constant scale and covered a wide variety of subjects from aircraft to birds and from tanks to dinosaurs In 1981 the famous London based company closed down and only the kits survived intact For the next twenty five years Airfix was run by Palitoy and later Humbrol but suffered from a lack of investment In 2006 Hornby Hobbies Ltd the train and Scalextric manufacturer bought the ailing company and transformed it Money and resources were ploughed into the range and today Airfix releases around twenty new kits per year designed to an incredibly high standard The old kits

of the 1950s and 1960s are gradually being replaced by new state of the art tooling all bearing that most prestigious name Airfix Published to coincide with the sixtieth anniversary of the first Airfix aircraft kit Sixty Years of Airfix Models tells the full story year by year of the company and its products Illustrated throughout with colour photographs of kits box art and completed models

Sailing Ships from Plastic Kits Kerry Jang, 2024-10-30 Models of sailing ships with their towering masts and billowing sails have always held a special fascination for model makers because they capture all the romance of the sea shipboard life and a fighting spirit However many would be modelers are discouraged by the inherent complexity of the subject especially the masts and rigging as well as the often sumptuous decoration Plastic kit manufacturers were quick to capitalize on this interest and produced kits that were advertised as easy and reasonably quick to assemble featuring ready made detail that is easily tackled by modelers of varying skills and ages with the promise of a good result Plastic sailing ship kits are affordable especially in comparison to wooden ship kits and building a fleet of the most famous ships in history is easily achieved Despite their ease of assembly plastic models of sailing ships like the ships themselves remain complicated to build Manufacturers devised several simplifications of the most difficult aspects such as molding the lower upper and topmasts in one piece offering preformed molded plastic shrouds and ratlines or sails in vacuum formed plastic However modelers have long complained that these simplifications the physical limitations of injected plastic moldings and the very medium of styrene plastic itself have resulted in often crudely detailed and unrealistic finished models This book is the remedy It describes and demonstrates techniques unique to plastic sailing ship models that overcome these limitations allowing the construction of authentic and personally satisfying models Each modeler has a different expectation for their model Some will want a simple build with some straightforward refinements whereas others will want a more detailed build that takes advantage of the many new aftermarket items and there are those who seek the most accurate and detailed replica possible Sailing Ships from Plastic Kits aims to give every modeler regardless of skill and experience a range of fundamental and advanced techniques to choose from when transforming a plastic kit into an authentic sailing ship model Heavily illustrated in color throughout this book is an ideal addition to the purchase of any plastic ship kit

Taiwan's Maritime Security Martin Edmonds, Michael M. Tsai, 2005-06-27 The relationship between Taiwan and the People's Republic of China is regarded as a very serious potential source of conflict in East Asia especially now that the questions of Hong Kong and Macau have been settled and increased democratisation in Taiwan is seen as a threat by mainland China This book which brings together leading international scholars of maritime security and also strategic thinkers from within Taiwan itself examines a wide range of questions concerning Taiwan's perception of the naval threat from mainland China and how Taiwan's navy and naval strategic thinking is responding including discussions of the strength of Taiwan's naval forces mainland China's claims and ambitions in the South China Sea and the controversial question of Theatre Missile Defence
