Theuretzbacher-Fritz, 2011-03-01 Benchmarking has become a key tool in the water industry to promote and achieve performance targets for utilities. The use of this tool for performance improvement through systematic search and adaptation of leading practices has expanded globally during the past decade. Many ongoing projects worldwide aim to address different needs and objectives in varying contexts with outstanding results and impact. The document is presented with a clear practice-oriented approach and can be used as a how-to benchmark guide presented from different perspectives: participants, organizers, supervising bodies. Readers will gain practical insight on real-life benchmarking practices and will benefit from the experiences gained in some of the leading benchmarking projects of the water industry, including the IWA WSAA benchmarking efforts, the European Benchmarking Co-operation, and the several benchmarking projects carried out in Austria and Central Europe. The manual also presents the new IWA Benchmarking Framework, which aims to harmonize the terms used to describe benchmarking and performance indicators, practices in the water industry, guaranteeing a more fluent and efficient communication. This Manual of Best Practice is edited by the IWA Specialist Group on Benchmarking and Performance Assessment and co-published by AWWA and IWA Publishing.
