Water Wars Privatization Pollution And Profit:

Water Wars Vandana Shiva, 2016-07-26 Acclaimed author and award winning scientist and activist Vandana Shiva lucidly details the severity of the global water shortage calling the water crisis the most pervasive most severe and most invisible dimension of the ecological devastation of the earth She sheds light on the activists who are fighting corporate maneuvers to convert the life sustaining resource of water into more gold for the elites and uses her knowledge of science and society to outline the emergence of corporate culture and the historical erosion of communal water rights Using the international water trade and industrial activities such as damming mining and aquafarming as her lens Shiva exposes the destruction of the earth and the disenfranchisement of the world s poor as they are stripped of rights to a precious common good Revealing how many of the most important conflicts of our time most often camouflaged as ethnic wars or religious wars are in fact conflicts over scarce but vital natural resources she calls for a movement to preserve water access for all and offers a blueprint for global resistance based on examples of successful campaigns Featuring a new introduction by the author this edition of *Water Wars* celebrates the spiritual and traditional role water has played in communities throughout history and warns that water privatization threatens cultures and livelihoods worldwide

Water Wars Vandana Shiva, **BRICS and the New American Imperialism** Vishwas Satgar, Ferriar Adam, Samir Amin, Patrick Bond, William K Carroll, Christopher Chase-Dunn, Alexander Gallas, Ana Garcia, Karina Kato, Nivedita Majumdar, Keamogetswe Seipato, 2020-03-01 Challenges the mainstream understanding of BRICS and US dominance to situate the new global rivalries engulfing capitalism BRICS is a grouping of the five major emerging economies of Brazil Russia India China and South Africa Volume five in the Democratic Marxism series BRICS and the New American Imperialism challenges the mainstream understanding of BRICS and US dominance to situate the new global rivalries engulfing capitalism It offers novel analyses of BRICS in the context of increasing US induced imperial chaos deepening environmental crisis tendencies such as climate change and water scarcity contradictory dynamics inside BRICS countries and growing subaltern resistance The authors revisit contemporary thinking on imperialism and anti imperialism drawing on the work of Rosa Luxemburg one of the leading theorists after Marx who attempted to understand the expansionary nature of capitalism from the heartlands to the peripheries The richness of Luxemburg s pioneering work inspires most of the volume s contributors in their analyses of the dangerous contradictions of the contemporary world as well as forms of democratic agency advancing resistance While various forms of resistance are highlighted among them water protests mass worker strikes anti corporate campaigning and forms of cultural critique this volume grapples with the challenge of renewing anti imperialism beyond the NGO driven World Social Forum and considers the prospects of a new horizontal political vessel to build global convergence It also explores the prospects of a Fifth International of Peoples and Workers

Water Trading and Global Water Scarcity Josefina Maestu, 2013 Water scarcity is an increasing problem in many parts of the world yet conventional supply side economics and management are insufficient to

deal with it In this book the role of water trading as an instrument of integrated water resources management is explored in depth It is also shown to be an instrument for conflict resolution where it may be necessary to reallocate water in the context of increasing scarcity Recent experiences of implementation in different river basins have shown their potential as instruments for improving allocation These experiences however also show that there are implementation challenges and some limitations to trading that need to be considered This book explores the various types of water trading formulas through the experience of using them in different parts of the world The final result is varied because in most cases trading is conditioned by the legal and institutional framework in which the transactions are carried out The role of government and the definition of water rights and licenses are critical for the success of water trading The book studies the institutional framework and how transactions have been undertaken drawing some lessons on how trading can improve It also analyses whether trading has really been a positive instrument to manage scarcity and improve water ecosystems and pollution emission problems in those parts of the world which are most affected The book concludes by making policy proposals to improve the implementation of water trading

Water Communication Analysis of Strategies and Campaigns from the Water Sector Editor Celine Herve Bazin Celsa Sorbonne University Paris France

Legal Geographies of Water Cristy Clark, 2025-06-30 This book deepens our understanding of humanity's diverse relationships with water and the law providing a critical assessment of this relationship and charting the course towards a more sustainable and just water future By using legal geography this book pays particular attention to the place based inter relationships between water people and law both formal and informal and to the ways that law both constitutes and is constituted by the relationship between people and place Starting in the 1980s Chapter 2 investigates the

early commodification of water through the liberalisation of rural water markets in Chile and the urban water supply and sanitation systems of England and Wales Chapter 3 then examines the global expansion of neoliberal water governance in the 1990s starting with donor driven reforms in the global south and particularly Manila in the Philippines Chapters 4 and 5 document both the grassroots response to these neoliberal water reforms and the inherent tensions in the attempts of the early 2000s to reconcile the recognition of a human right to water with the ongoing rollout of market mechanisms both in the domestic context of South Africa and within the United Nations human rights system Moving forward again Chapter 6 examines the recent intensification of neoliberal water governance through financialisation and considers its specific impacts in Detroit and Flint Michigan Chapter 7 then considers the renewed global emphasis on living waters and Indigenous ontologies of water by examining the new legislative arrangements for the Whanganui River in Aotearoa New Zealand The book concludes in Chapter 8 by highlighting the stories of hope that can be found in many of the case studies explored in the book and in emerging examples from around the world This book is essential reading for students and scholars interested in water law security and justice from across a wide range of disciplines including environmental studies law geography human rights and political ecology

Contesting World Order? Joe Wills, 2017-04-13 What do equality dignity and rights mean in a world where eight men own as much wealth as half the world's population Contesting World Order Socioeconomic Rights and Global Justice Movements examines how global justice movements have engaged the language of socioeconomic rights to contest global institutional structures and rules responsible for contributing to the persistence of severe poverty Drawing upon perspectives from critical international relations studies and the activities of global justice movements this book evaluates the counter hegemonic potential of socioeconomic rights discourse and its capacity to contribute towards an alternative to the prevailing neo liberal common sense of global governance

The Human Right to Water Nandita Singh, 2016-10-06 The discourse on the human right to water presents deliberations on the concept content and rationale for the right with little attention to the practical question of translating the right into reality This book aims to fill this void by focusing on realization of the right by its holders examining how effective the mechanisms are for implementing the right in enabling its universal realization In a quest to answer this question the book draws a conceptual differentiation between implementation and realization of the right arguing that unlike implementation which is an objective process of creation and implementation of measures such as legal frameworks institutional structures or policy and action guidelines realization of the right is a subjective process that extends much beyond It takes shape within specific contextual settings which may include varied situations yet remains neglected in the related academic and action forums This book attempts to address this void by discussing some of the most significant contexts and the underlying problems and concerns that strongly influence realization of the human right to water It contends that if the right is to be truly realized these different contexts which can be further classified as objective and subjective must be understood analysed and appropriately addressed before framing

and implementing relevant action The book further situates the human right to water discourse in a broader interdisciplinary perspective expanding its scope beyond the narrower legal dimensions linking it to the wider field of water resources management governance Through the novel ideas it proposes the book makes an innovative and unique contribution in the field of human right to water which is of great scientific value

The No-nonsense Guide to Water Maggie Black,2004

Water sustains life without it humans cannot survive for more than a few days And yet this precious fluid is becoming increasingly politicized as the debates about control and ownership of water itself and of the many organizations which govern its use gain force Maggie Black explores the many roles water plays in human life and as the defense of water rights looks set to become an explosive issue provides a clear overview on the vital issues of distribution technology irrigation land use and commodification

Water Julian Caldecott,2008-09-04 All known forms of life depend on water Covering 71 per cent of the Earth s surface water seems to be plentiful But there are 1 2 billion people who currently live without a safe water supply the amount of available drinking water is shrinking and the need for it is increasing relentlessly While some regions are receiving too much rain others are receiving too little We are approaching a global water emergency Julian Caldecott examines the vital role this fascinating substance plays on our planet and explores the historical scientific political and economic reasons behind the looming water crisis He reveals where the water we use comes from and at what social and environmental cost This is an intriguing and sometimes unsettling portrait of the future of water in our changing world and what we can all do to make a difference

Water in World History Ellen F. Arnold,2024-10-22 This book takes a thematic approach to the global history of water covering a wide range of human interactions with water and the ways in which it carries both life and death Water is one of the most common and valuable natural resources for the survival of individual people and civilizations As the Anthropocene brings the unpredictable challenges of climate change population growth and global industrialization and urbanism issues of water scarcity and availability will be ever growing and both the presence and absence of water can be sources of far reaching disaster The book argues that a deeper understanding of water s history is essential for navigating these changes The chapters discuss water and religion floods and disasters water engineering and waterpower the history of drinking water water parks and leisure the history of underwater exploration and the history of drought and water scarcity Each chapter is global in scope and is told over a broad chronology with complementary case studies *Water in World History* is an accessible introduction to water history and is an ideal resource for undergraduate students in environmental history and world history courses

Privatizing Water Karen Bakker,2013-02-15 Water supply privatization was emblematic of the neoliberal turn in development policy in the 1990s Proponents argued that the private sector could provide better services at lower costs than governments opponents questioned the risks involved in delegating control over a life sustaining resource to for profit companies Private sector activity was most concentrated and contested in large cities in developing countries where the widespread lack of access to networked water supplies was

characterized as a global crisis In *Privatizing Water* Karen Bakker focuses on three questions Why did privatization emerge as a preferred alternative for managing urban water supply Can privatization fulfill its proponents expectations particularly with respect to water supply to the urban poor And given the apparent shortcomings of both privatization and conventional approaches to government provision what are the alternatives In answering these questions Bakker engages with broader debates over the role of the private sector in development the role of urban communities in the provision of public services and the governance of public goods She introduces the concept of governance failure as a means of exploring the limitations facing both private companies and governments Critically examining a range of issues including the transnational struggle over the human right to water the commons as a water supply management strategy and the environmental dimensions of water privatization *Privatizing Water* is a balanced exploration of a critical issue that affects billions of people around the world

Just Water Zenner, Christiana, 2018-11-15 *Just Water* explores the necessity and availability of a supply of fresh water from the perspective of Christian ethics This revised edition includes new data and updates on social developments related to water crises as well as insights from Pope Francis s encyclical *Laudato Si* and a discussion of water justice from the perspective of the events at Standing Rock

Contesting Water Rights Mangala Subramaniam, 2018-04-21 As globalization processes and related neoliberal agendas promote privatization through state action people s struggles for rights to water have intensified In this context this book examines the role of the ambivalent state in local struggles for water which are deeply intertwined with global forums that support and or challenge the privatization of water resources These local global struggles have redefined the relationships between the state corporations and other social actors that impact the local politics of inequality and marginalization

Water, Rhetoric, and Social Justice Theresa R. Castor, Casey R. Schmitt, Christopher S. Thomas, 2020-01-20 *Water Rhetoric and Social Justice A Critical Confluence* examines how individuals and communities have responded on a global scale to present day water crises as matters of social justice through oratory mass demonstration deliberation testimony and other rhetorical appeals This book applies critical communication methods and perspectives to interrogate the pressing yet mind boggling dilemma currently faced in environmental studies and policy that clean water the very stuff of life which flows freely from the tap in affluent areas is also denied to huge populations materially and fluidly exemplifying the currents of justice liberty and equity Contributors highlight discourse and water justice movements in nonofficial spheres from activists artists and the grassroots In extending the technical economic moral and political conversations on water justice this collection applies special focus on the novel rhetorical concepts and responses not necessarily unique to but especially enacted in water justice situations Scholars of rhetoric sociology activism communication and environmental studies will find this book particularly useful

The Right to Water Farhana Sultana, Alex Loftus, 2013-10-18 The right to clean water has been adopted by the United Nations as a basic human right Yet how such universal calls for a right to water are understood negotiated experienced and struggled over remain key

challenges The Right to Water elucidates how universal calls for rights articulate with local historical geographical contexts governance politics and social struggles thereby highlighting the challenges and the possibilities that exist Bringing together a unique range of academics policy makers and activists the book analyzes how struggles for the right to water have attempted to translate moral arguments over access to safe water into workable claims This book is an intervention at a crucial moment into the shape and future direction of struggles for the right to water in a range of political geographic and socio economics contexts seeking to be pro active in defining what this struggle could mean and how it might be taken forward in a far broader transformative politics The Right to Water engages with a range of approaches that focus on philosophical legal and governance perspectives before seeking to apply these more abstract arguments to an array of concrete struggles and case studies In so doing the book builds on empirical examples from Africa Asia Oceania Latin America the Middle East North America and the European Union
