Waterloo 1815: Captain Mercer's Journal Bob Carruthers, 2012-10-18 More has probably been written about the Waterloo campaign than almost any other in history It was the climax of the Napoleonic Wars and forms a watershed in both European and world history However the lethal combination of national bias wilful distortion and simple error has unfortunately led to the constantly regurgitated traditional accepted version being significantly wrong regarding many episodes in the campaign Oft repeated claims have morphed into established fact and with the bicentenary of this famous battle soon to be commemorated it is high time that these are challenged and finally dismissed Gareth Glover has spent a decade uncovering hundreds of previously unpublished eyewitness accounts of the battle and campaign which have highlighted many of these myths and errors In this ground breaking history based on extensive primary research of all the nations involved he provides a very readable and beautifully balanced account of the entire campaign while challenging these distorted claims and myths and he provides clear evidence to back his version of events His thoughtful reassessment of this decisive episode in world history will be stimulating reading for those already familiar with the Napoleonic period and it will form a fascinating introduction for readers who are discovering this extraordinary event for the first time
