Treating The Trauma Of Rape Treating The Trauma Of Rape:

Treating the Trauma of Rape Edna B. Foa, Barbara Olasov Rothbaum, 2001-10-24 After reviewing the relevant treatment literature the authors detail how to assess and treat PTSD using a cognitive behavioral approach Complete instructions are given for planning treatment as well as for introducing the patient to the various interventions Nine exposure and stress management techniques are then detailed including imaginal exposure trauma reliving in vivo exposure relaxation training thought stopping cognitive restructuring covert modeling and role playing Enhancing the books clinical utility are numerous case examples illustrating how to implement the techniques as well as explanations of how to cope with common problems and complications in treatment The final chapter presents detailed outlines of three suggested treatment programs **The Trauma of Sexual Assault** Jenny Petrak, Barbara Hedge, 2003-07-07 The psycho social needs of victims of rape and sexual assault are increasingly recognised and there is a need for a critical synthesis of knowledge and practice to support the development of training and best practice in the mental health and sexual health professions The Trauma of Sexual Assault provides an understanding of the theoretical underpinning of the wide range of clinical problems that can follow sexual assault Focusing on adult victims of sexual assault this book brings together research findings theoretical perspectives and implications for treatment longer term management and future policy The first text to consider the psychological impact of sexual assault on women and men Incorporates a comprehensive flow through model of psychological and social management from the initial presentation of the assaulted person onwards A much needed reference accessible to a wide range of professionals Part of the Wiley Series in Clinical Psychology **Treating Trauma Survivors With PTSD** Rachel Yehuda, 2008-08-13 In recent years considerable research as well as clinical guidelines based on study findings has been published on the treatment of posttraumatic stress disorder PTSD A gap remains however between the controlled environments and protocols used in intervention research and the more complex and often imperfect settings and situations that clinicians must navigate in daily practice Moreover clinicians routinely see patients whose comorbid substance abuse self destructive behavior or medical illness would likely exclude them from research studies In short although the extensive literature is certainly helpful in articulating the various treatment modalities available to clinicians the strength of the evidence for the efficacy of the treatments and the recommendations and personal preferences of experts the literature does not address the real life dilemmas that clinicians face in attempting to treat trauma survivors What is needed is a way to bridge the gap between research and practice to translate study findings into everyday clinical realities Treating Trauma Survivors With PTSD answers that need Its authors experienced researchers and clinicians who are at the forefront of conceptual discourse on trauma and PTSD are uniquely qualified to offer guidance on these issues Among the specific topics covered are the following Diagnosis and assessment of and treatment planning for trauma survivors with PTSD including clinical presentations related to trauma exposure and PTSD and the implications of comorbid symptoms and disorders

Treatment matching in clinical practice how treatment outcome findings can be used to develop profiles for predicting which patients are most likely to respond to which treatments Medications useful in the treatment of PTSD and the strength of the empirical evidence for their efficacy Trauma in children and the efficacy of various treatments including a discussion of how treatment for children differs from that for adults Assessment and treatment of multiply traumatized patients those with both recent trauma and a history of childhood trauma or abuse Treatment of trauma survivors in the acute aftermath of traumatic events including a review of some of the exciting developments in the field regarding risk factors e g normal vs pathological coping responses that influence which individuals are most likely to develop PTSD after such events These topics have never been more relevant than now in the wake of the attacks that shook our country on September 11 2001 It is the authors hope that by reading this book mental health practitioners will gain more confidence in applying the specialized techniques described in empirical studies to their own practices and clinical realities

Reclaiming Your Life After Rape : Cognitive-Behavioral Therapy for Posttraumatic Stress Disorder Client Workbook Barbara Olasov Rothbaum Associate Professor in Psychiatry and Director of the Trauma and Anxiety Recovery Program Emory University School of Medicine, and Director Edna B. Foa Professor, Center for Treatment and Study of Anxiety Allegheny University of Health Sciences, 2004-11-11 This powerful client workbook is written in an encouraging and easy to understand style specifically for women who have been sexually assaulted and have developed chronic symptoms of posttraumatic stress disorder PTSD Clients learn how cognitive behavioral therapy has helped other victims and how it can work for them This book explains how to distinguish PTSD symptoms from other disorders and teaches powerful techniques for overcoming these symptoms In writing this book the authors aim to address two goals First they want to present information about PTSD and related problems in language understandable to nonprofessionals This information will include a review of the studies on posttrauma problems and on the effectiveness of different treatments They also describe why some survivors develop PTSD and others do not The second goal of the book is to provide a detailed client workbook for the treatment of trauma related problems especially PTSD to assist clients working with a therapist The authors are aware of the fact that people have different problems and different needs What works for one person may not work for another Therefore they describe several different treatment techniques The book is organized around the different cognitive behavioral techniques that have been studied and proven effective with women sufferers of PTSD following an assault Throughout the book the authors focus mainly on women who have been sexually assaulted and as a result developed chronic symptoms of PTSD which have disturbed their daily functioning and cause them emotional distress Most of the examples they use to demonstrate the cognitive behavioral techniques are drawn from their experience in treating rape survivors However the cognitive behavioral procedures outlined here have been as successful in helping women who have been sexually abused in childhood and adult female survivors of nonsexual assaults like aggravated assault and robbery Other survivors of traumas such as natural disasters and car
