Trimble Tsc3 Data Collector User Manual:

Rulership in 1st to 14th century Scandinavia Dagfinn Skre, 2019-12-16 This book seeks to revitalise the somewhat stagnant scholarly debate on Germanic rulership in the first millennium AD. A series of comprehensive chapters combines literary evidence on Scandinavia's politics, kings, and other rulers with archaeological, documentary, toponymical, and linguistic evidence. The picture that emerges is one of surprisingly stable rulership institutions, sites, and myths, while control of them was contested between individuals, dynasties, and politics. While in the early centuries Scandinavia was integrated in Germanic Europe, profound societal and cultural changes in 6th century Scandinavia and the Christianisation of Continental and English kingdoms set northern kingship on a different path. The pagan heroic warrior ethos essential to kingship was developed and refined only to recur overseas embodied in 9th-10th century Vikings. Three chapters on a hitherto unknown masonry royal manor at Avaldsnes in western Norway, excavated in 2017, concludes this volume with discussions of the late medieval peak of Norwegian kingship and its eventual downfall in the late 14th century. This book's discussions and results are relevant to all scholars and students of 1st millennium Germanic kingship, politics, and societies. **User's Manual for**

ProbeCorder (Version 1.0) Data Collection Software James Zeidler, Construction engineering research lab (army) Champaign, IL, 1997. ProbeCorder is a pen-based software tool designed to maximize the logistical efficiency of subsurface soil testing by automating the routine collection, integration, and storage of probe data in the field. It is especially targeted at intensive landscape-scale investigations related to archeology, pedology, and/or soils geomorphology. This user's manual provides complete documentation for implementing the software on a pen computing platform, either as a stand-alone program or as an application module within the mobile GIS/GPS software environment known as Field Notes™. PerMetrics Inc., Corvallis, OR. It contains ten chapters that provide detailed instructions for electronic recording of sediment profile data using a linked series of Windows dialog boxes and utilizing other ProbeCorder features such as pick list customization, SQL querying, and report generation. Separate appendices cover the topics of pen-based hardware and software selection and the data requirements typically involved in sediment profile description.
