Understanding Assisted Suicide

John Barry Mitchell,2007 Assisted suicide remains one of the most emotionally charged and controversial topics and the issue isn't going away any time soon As the baby boomer generation ages many of us will watch as our parents and ourselves grow older and wonder at the decisions that lie ahead Understanding Assisted Suicide provides both a fresh take on this important topic and the framework for intelligent participation in the discussion Uniquely the author frames the issue using his own experience watching both his parents die which led him to ask fundamental questions about death dying religion and the role of medicine and technology in alleviating human suffering In concerns about assisted suicide each person's big picture has largely been created out of picking and choosing from nine separate snapshot albums Understanding this offers a perspective for quickly determining the sources of another's opinion on assisted suicide as well as the issues they are not considering Most importantly Understanding Assisted Suicide offers a clear easy to traverse landscape over which those who are sincerely looking for their own answers can navigate The nine issue structure allows both careful exploration of separate issues and a view of the full spectrum of ideas involved

and afterlife beliefs by asking them to apply this content to their lives and to the world around them. Students see differing cultural experiences discussed in context with key theories and research. The text's pedagogy delivers relevant multi and cross cultural applications and connections across topics. This helps students evaluate their personal assumptions and appreciate how the content applies to their own current and future roles as individuals, family members, work colleagues and as part of a community. The text simultaneously challenges learners to consider their own perspectives and to think critically about the parallels between their own lives and different cultures. Included with this title, The password protected Instructor Resource Site, formally known as SAGE Edge, offers access to all text specific resources including a test bank and editable chapter specific PowerPoint slides.

Understanding Suicide and Its Prevention Federico Sanchez, 2010-06-15. Finally a book that explains suicide using the latest research in suicidology. A must read for mental health professionals and the survivors of suicide who want to understand why suicide happens. The material in this book should be incorporated into the curriculum of psychology and psychiatry because suicide is such a vital topic that is hardly covered in medical schools due to the lack of a coherent theory of the brain in general and suicide in particular. This is an important book for all professionals who deal with mental disorders in general and suicide in particular. It is the author's fifth book where suicide is explained not as a mysterious process but as a natural consequence of the reactions of the brain under certain conditions when suffering mental disorders. The author begins with a brief summary of the statistics of the whos, the hows and the wheres of suicide. This gives us a clear idea of the magnitude of the problem of suicide, of the cost not only in lives but of the emotional toll of the survivors as well as the financial burdens on society as a whole. Then as an important first step to understanding the medical community's standard approaches to mental disease, he reviews briefly the current psychiatric terminology and the diagnostic tools concerning mental disorders. He presents the most accepted current theories and models of suicide. He explains what a psychiatric emergency is and what to expect if one ever encounters such a situation. And he explains how suicide risk assessment is currently done along with other important considerations. He proceeds to explain in everyday language where possible his theory of how the brain works, beginning with a simple explanation of how neurons communicate with each other. Later he explains how the brain controls the body and how we see with the back of our heads, how memory systems become a logical extension or expansion of our sensory and motor systems. Awareness and attention are introduced first as an evolutionary tool that aids the senses gather more information from the environment and ultimately as tools that aid in thinking, reasoning and constructing our past, our lives and our identities. But all this would mean nothing without the introduction of emotions and how the brain constructs contexts. He explains how emotions are an integral part of memories and how these are related to contexts, how basically the brain has created a very

concise and compact filing memory system A clear explanation of how emotions are triggered regulated and dissipated is next These lead to a learned discussion of how these various systems can go haywire causing mental disorders A brief but perhaps new and revolutionary approach to these mental disorders is presented next including Obsessive Compulsive Disorder Delirium Dementia and Other Amnestic Disorders Manic Depression and Depression and Schizophrenia Ultimately it becomes clear how under certain conditions these disorders can lead to suicide The difference between attempters and completers is also explained He then presents a suicide autopsy as an exercise to show how varied the opinions of experts in the field of suicidology are and compares it to his own theories and lets the reader decide for himself who is closer to the truth The fallacy of many expert opinions of where research needs to go is presented The book gives a few words of advice on various therapies and the rationality of their approaches and cautions against their limitations The book devotes a chapter to suicide prevention in the military and how these efforts are bound to fail and another chapter on suicide prevention The author makes important suggestions of how to prevent suicide and lessen suicide rates particularly among the young And lastly a chapter is devoted to the specifics of grief for suicide survivors
