Understanding Climate Change Science Policy And Practice:

Understanding Climate Change Sarah L. Burch, Sara E. Harris, 2014-01-01 Understanding Climate Change examines climate change as both a scientific and a public policy issue Sarah L Burch and Sara E Harris explain the basics of the climate system climate models and prediction and human and biophysical impacts as well as strategies for reducing greenhouse gas emissions enhancing adaptability and enabling climate change governance The authors examine the connections between climate change and other pressing issues such as human health poverty and other environmental problems and they explore the ways that sustainable responses to climate change can simultaneously address those issues

Understanding Climate Change Sarah Burch, Sara E. Harris, 2021-06-01 Conversations about climate change are filled with challenges involving complex data deeply held values and political issues Understanding Climate Change examines climate change as both a scientific and a public policy issue Sarah L Burch and Sara E Harris explain the basics of the climate system climate models and prediction and human and biophysical impacts as well as strategies for climate change adaptation and mitigation The second edition has been fully updated throughout including coverage of new advances in climate modelling and of the shifting landscape of renewable energy production and distribution A brand new chapter discusses global governance including the United Nations Framework Convention on Climate Change and the Paris Agreement as well as mitigation efforts at the national and subnational levels This new chapter makes the book even more relevant to climate change courses housed in social sciences departments such as political science and geography An effective and integrated introduction to an urgent and controversial issue this book is well suited to adoption in a variety of introductory climate change courses found in a number of science and social science departments Its ultimate goal is to equip readers with the tools needed to become constructive participants in the human response to climate change

Research Handbook on Climate Change, Oceans and Coasts Jan McDonald, Jeffrey McGee, Richard Barnes, 2020-12-25 This topical Research Handbook examines the legal intersections of climate change oceans and coasts across multiple scales and sectors covering different geographies and regions With expert contributions from Europe Australasia the Pacific North America and Asia it includes insightful chapters on issues ranging across the impacts of climate change on marine and coastal environments It assesses institutional responses to climate change in ocean and marine governance regimes adaptation to climate impacts on ocean and coastal systems and communities and climate change mitigation in marine and coastal environments Through a plurality of voices disciplinary and geographical perspectives this Research Handbook explores cross cutting themes of institutional complexity fragmentation scale and design trade offs **Securing Canada's Future** Aisha Ahmad, 2024-12-16 After decades of uncontested dominance the era of American hegemony is ending and a new multipolar world order is emerging in its place This transformation is also occurring alongside uncontrolled climate change and the development of volatile new technologies Together these factors dramatically complicate the global threat

landscape *Securing Canada's Future* offers a comprehensive analysis of the most serious challenges that Canada will face in the near future. Written by leading Canadian women scholars and security experts, this collection covers the most critical risks and threats on the horizon, including rising Chinese power, resurgent Russian aggression, escalating competition in the Arctic, the near irreversibility of climate change, disaster management and mitigation, evolving cybersecurity threats, and gendered violence. *Securing Canada's Future* explores what this future threat landscape will look like for Canadians and shows how Canada can prepare for and mitigate upcoming risks. This practical forward thinking volume maps out the most urgent national and international security issues that Canada is destined to face in the foreseeable future. *Picture Ecology* Alan C. Braddock, Maura Coughlin, T. J. Demos, Rachael Z. DeLue, Mónica Domínguez Torres, Finis Dunaway, Stephen F. Eisenman, Emily Gephart, De-nin D. Lee, Gregory Levine, Anne McClintock, James Nisbet, Andrew Patrizio, Sugata Ray, Greg M. Thomas, 2021-10-26 Seeking a broad reexamination of visual culture through the lenses of ecocriticism, environmental justice, and animal studies, this compendium offers a diverse range of art historical criticism formulated within an ecological context. *Picture Ecology* brings together scholars whose contributions extend chronologically and geographically from 11th century Chinese painting to contemporary photography of California wildfires. The book's 17 interdisciplinary essays provide a dynamic cross-cultural approach to an increasingly vital area of study, emphasizing the environmental dimensions inherent in the content and materials of aesthetic objects. *Picture Ecology* provides valuable new approaches for considering works of art in ways that are timely, intellectually stimulating, and universally significant. **The Canadian Environment in Political Context, Second Edition** Andrea Olive, 2019-08-20 *The Canadian Environment in Political Context* uses a non-technical approach to introduce environmental politics to undergraduate readers. The second edition features expanded chapters on wildlife, water pollution, land, and energy. Beginning with a brief synopsis of environmental quality across Canada, the text moves on to examine political institutions and policymaking, the history of environmentalism in Canada, and other crucial issues, including Indigenous peoples and the environment, as well as Canada's North. Enhanced with case studies, key words, and a comprehensive glossary, Olive's book addresses the major environmental concerns and challenges that Canada faces in the twenty-first century. **Beyond the Forecast** Alisha Chandran, 2024-11-01 *Beyond the Forecast* explores climate change and sustainability in a way that aims to bridge the gap between academic research and public discourse. This insightful new book delves into the scientific underpinnings of climate change, offering a detailed examination of its causes, impacts, and the urgent need for comprehensive solutions. It navigates through the complexities of climate science, presenting research and solutions that underscore the potential for transformative action across global and local scales. A particular feature is the focus on community initiatives and individual action in driving sustainable change. This means that the author is able to present engaging and actionable initiatives. This book's aim is to both educate and empower, offering a compelling call to action for all who wish to contribute to a more sustainable and equitable future. *Transdisciplinary Research for*

Understanding and Transforming Food Systems Alexandros Gasparatos, Laura M. Pereira, Cyrille Rigolot, 2023-10-30 Food systems are currently facing tremendous challenges and changes globally On the one hand population growth urbanization and increased affluence are expected to catalyze dietary shifts and broader changes to food systems in the coming decades On the other hand food systems and changes therein have major environmental and social ramifications As a result fostering the sustainable transformation of food systems is seen as one of the major challenges for meeting the Sustainable Development Goals SDGs However understanding food systems and transforming them in a sustainable manner is far from straightforward especially as our food systems have multiple intersecting economic social technological and cultural dimensions Moreover food systems encompass different stakeholders operating at different levels with enormously different interests and worldviews
