Systematic Program Design , 2013 **Robot Ethics 2.0** Patrick Lin, Keith Abney, Ryan Jenkins, 2017-09-01 The robot population is rising on Earth and other planets Mars is inhabited entirely by robots As robots slip into more domains of human life from the operating room to the bedroom they take on our morally important tasks and decisions as well as create new risks from psychological to physical This makes it all the more urgent to study their ethical legal and policy impacts To help the robotics industry and broader society we need to not only press ahead on a wide range of issues but also identify new ones emerging as quickly as the field is evolving For instance where military robots had received much attention in the past and are still controversial today this volume looks toward autonomous cars here as an important case study that cuts across diverse issues from liability to psychology to trust and more And because robotics feeds into and is fed by AI the Internet of Things and other cognate fields robot ethics must also reach into those domains too Expanding these discussions also means listening to new voices robot ethics is no longer the concern of a handful of scholars Experts from different

academic disciplines and geographical areas are now playing vital roles in shaping ethical legal and policy discussions worldwide So for a more complete study the editors of this volume look beyond the usual suspects for the latest thinking Many of the views as represented in this cutting edge volume are provocative but also what we need to push forward in unfamiliar territory *Military Review* ,2013
