The Wealth Of Oceans Environment And Development On Our Ocean Planet:

The Wealth of Oceans Michael L. Weber, Judith Gradwohl, 1995 An adjunct to Ocean Planet a major traveling exhibition opening at the Smithsonian Institution in 1995 this fascinating book is the first to explore the newest discoveries in oceanography and marine ecology in the context of the global economy and human population growth For thousands of years humanity has seen the oceans as a mysterious and limitless source of treasures to be fished harvested mined and salvaged Now accelerating developments in ocean studies offer a new understanding of the oceans their role in a global ecosystem and their vulnerability to threats from human action Drawing on the latest research this book offers a fascinating tour of the complex reaches of our ocean world and points the way toward changes that will preserve rather than squander the wealth of oceans

Fish, Markets, and Fishermen Suzanne Iudicello, Michael L. Weber, Robert Wieland, 2012-06-22 A significant number of the world's ocean fisheries are depleted and some have collapsed from overfishing Although many of the same fishermen who are causing these declines stand to suffer the most from them they continue to overfish Why is this happening What can be done to solve the problem The authors of Fish Markets and Fishermen argue that the reasons are primarily economic and that overfishing is an inevitable consequence of the current sets of incentives facing ocean fishermen This volume illuminates these incentives as they operate both in the aggregate and at the level of day to day decision making by vessel skippers The authors provide a primer on fish population biology and the economics of fisheries under various access regimes and use that information in analyzing policies for managing fisheries The book provides a concise statistical overview of the world's fisheries documents the decline of fisheries worldwide gives the reader a clear understanding of the economics and population biology of fish examines the management issues associated with regulating fisheries offers case studies of fisheries under different management regimes examines and compares the consequences of various regimes and considers the implications for policy making The decline of the world's ocean fisheries is of enormous worldwide significance from both economic and environmental perspectives This book clearly explains for the nonspecialist the complicated problem of overfishing It represents a basic resource for fishery managers and others fishers policymakers conservationists the fish consuming public students and researchers concerned with the dynamics of fisheries and their sustenance

Vast Expanses Helen M. Rozwadowski, 2018-10-15 Much of human experience can be distilled to saltwater tears sweat and an enduring connection to the sea In *Vast Expanses* Helen M Rozwadowski weaves a cultural environmental and geopolitical history of that relationship a journey of tides and titanic forces reaching around the globe and across geological and evolutionary time Our ancient connections with the sea have developed and multiplied through industrialization and globalization a trajectory

that runs counter to Western depictions of the ocean as a place remote from and immune to human influence Rozwadowski argues that knowledge about the oceans created through work and play scientific investigation and also through human ambitions for profiting from the sea has played a central role in defining our relationship with this vast trackless and opaque place It has helped us to exploit marine resources control ocean space extend imperial or national power and attempt to refashion the sea into a more tractable arena for human activity But while deepening knowledge of the ocean has animated and strengthened connections between people and the world s seas to understand this history we must address questions of how by whom and why knowledge of the ocean was created and used and how we create and use this knowledge today Only then can we can forge a healthier relationship with our future sea Marine Conservation News ,1994 **The Futurist** ,1994 **Britannica Book of the Year** ,1996 Managing Our Ocean and Wildlife Resources in a Dynamic Environment United States. Congress. House. Committee on Natural Resources. Subcommittee on Insular Affairs, Oceans, and Wildlife,2009 For All Generations J. Patrick Madden,Scott G. Chaplowe,1996 The public has begun to challenge the wisdom of industrialized farming systems that promise short term gains but yield long term destruction deplete and ruin natural resources and threaten the health of both the people and their ecosystems Donors and government officials are turning more often to non governmental organizations NGOs and innovative farmers in efforts to develop and encourage adoption of more sustainable farming methods Successful efforts are highlighted and persistent barriers are explored Part 1 includes 13 chapters on topics such as Expanding the vision of sustainable agriculture Farmer centered development Overcoming hunger and food insecurity Urban agriculture Public policies promoting sustainable agriculture Community Supported Agriculture Dominance by transnational corporations The increasing role of NGOs Can organic agriculture feed the world Amazon com edit desc
