The Watchmans Rattle A Radical New Theory Of Collapse

William Meisel

The Watchmans Rattle A Radical New Theory Of Collapse:

The Watchman's Rattle Rebecca D. Costa, 2012-11-13 Why can't we solve our problems anymore? Why do threats such as the Gulf oil spill, worldwide recession, terrorism, and global warming suddenly seem unstoppable? Are there limits to the kinds of problems humans can solve? Rebecca Costa confronts and offers a solution to these questions in her highly anticipated and game-changing book *The Watchman's Rattle*. Costa pulls headlines from today's news to demonstrate how accelerating complexity quickly outpaces that rate at which the human brain can develop new capabilities. With compelling evidenced-based research in the rise and fall of Mayan, Khmer, and Roman empires, Costa shows how the tendency to find a quick solution leads to frightening long-term consequences. Society's ability to solve its most challenging intractable problems becomes gridlocked; progress slows and collapse ensues. A provocative new voice in the tradition of thought leaders Thomas Friedman, Jared Diamond, and Malcolm Gladwell, Costa reveals how we can reverse the downward spiral. Part history, part social science, part biology, *The Watchman's Rattle* is sure to provoke, engage, and incite change.

Patterns Of The Future: Understanding The Next Wave Of Global Change Markku Wilenius, 2017-03-24 *Patterns of the Future* explains the current world using the theory of long-term development waves. Kondratiev waves, Markku Wilenius, Professor of Futures Studies, argues that we are now entering the sixth wave, the age of intelligent integrated technologies helping to restore the balance between humans, technology, and nature by radically improved material and energy efficiency and a wiser use of human potential. The unfolding sixth wave will challenge our current values, institutions, and business models. Using a systems-based approach, *Patterns of the Future* analyses how corporations and the public sector can navigate in the sixth wave. Case studies look at specific examples of this using high-profile companies to demonstrate both the best and worst case scenarios of innovation for change. This book spans concepts from multiple disciplines in the social sciences, making it relevant not only to undergraduate and graduate students in futures studies, environmental studies, economics, and business, but also national policymakers, think tanks, corporate operators, and indeed for any one seriously interested in the future.

Entertaining Futility Andrew McMurry, 2018-08-06 In playfully pessimistic and thought-provoking essays, author Andrew McMurry explores a vital but fundamentally perverse human practice: destroying our planet while imagining we are not. How are humans able to do this? *Entertaining Futility: Despair and Hope in the Time of Climate Change* investigates the discourses of hope, progress, and optimism in the era of climate change, concepts that McMurry argues are polite names for blind faith, greed, and wishful thinking. The itemized list of humanity's arrogance can quickly lead to despair, so McMurry compensates by presenting the news in a darkly comic and irreverent style. McMurry believes human culture relies on a full suite of rhetorical tricks to distract us from our own demise. He investigates the role language, discourse, media, and technology play in shaping perceptions and misperceptions of our complex environmental crises. Writing in a mode that freely mixes the scholarly, fictive, poetic, and personal, McMurry draws on philosophy, history, ecology, film, science fiction, and pop culture to raise questions that

are difficult to face let alone answer In the author s words our age is utterly paralyzing unless you can crack jokes about it Entertaining Futility offers no easy solutions to today s environmental calamities and in fact claims that perhaps the continual proposing of solutions is part of the problem Instead McMurtry encourages readers to examine their own deeply held beliefs about the environment and the future and to look more closely at where those beliefs originate By pulling back the curtain he reveals the rhetorical and cultural ruses that distract us from the reality of our environmental crises *The Software Society* William Meisel,2013-01-31 Software is driving most technology today from PCs to mobile phones to thermostats Software can evolve quickly and that factor is driving an accelerating pace of change in technology Software is also becoming more tightly connected to humans through advances in dealing with speech and human language as well as being always available through mobile devices As our connection to technology tightens it drives rapid cultural evolution in effect changing what it means to be human Technological change driven by software also impacts our economy in basic ways as computer technology drives more aspects of production marketing services and sales Software advances allow technology to do more tasks formerly requiring humans creating efficienciesproductivity enhancementsthat can grow the economy On the other hand the rapid changes are affecting the economy at a pace that is overcoming human abilities to adapt to the job opportunities available and companies ability to adapt to rapid market changes We are seeing today the impact of that fundamental economic change in persistent unemployment and in stress on some major companies that have historically been solid performers The Software Society digs into these fundamental trends of softwares impact on our culture and our economy It explains the trend to use computer intelligence to enhance our human intelligence and discusses its potential and limitations The book digs into the economic risk caused by automation moving faster than peoples ability to adapt to the change and suggests solutions to address this danger *Metamodern Leadership* James Surwillo,2017-07-11 Metamodern Leadership outlines the seven values that identify the character of our future leaders based on the circumstances that make the Millennial Generation who they are It is at once an attempt to implore youth to seize their potential by tying their values to ancient wisdom as well as a warning to everyone else to understand the impacts of disregarding the inevitable tendencies of a very distinct new demographic This is the untold story of the personal responsibility required of the Millennial Generation against the messaging and memes that portray them as entitled and lazy It is an optimistic and pragmatic interpretation on the leadership mandates in the near future The ancient virtue of leadership required broad knowledge as the basis for critical thinking and self examination The late twentieth century required myopic versions of leadership which neglected the truths of centuries of wisdom Our younger generations will lead and follow based on new foundations that seem counterintuitive to most yet will be the status quo within a decade This distinction will lead to pragmatism and problem solving for the future rather than the dogma and gridlock of today We will require a generation of leaders who can once again link the complexities of the future with the ancient wisdom of progress **The Enlightened Marriage** Jed

Diamond,2025-09-12 Love and marriage are two of the greatest gifts life has to offer yet too many marriages fail because couples don't fully understand the five stages of relationships Because most of us have had hurtful experiences in past relationships often going back to childhood we develop an inaccurate love map that causes us to get off track when the stresses of life increase For more than 40 years Jed Diamond has been helping couples repair even the most damaged relationships and reweave the broken strands of marriage In *The Enlightened Marriage* Dr Diamond will help you Get through Stage Three Disillusionment without losing your love Understand that when your partner says I love you but I'm not in love with you anymore it is not the end but the beginning of Stage Four Real Lasting Love Learn why healing childhood wounds is the greatest gift of love you can give and receive from your partner Recognize and address the mid life stresses of menopause irritable male syndrome and male type depression Follow your calling in Stage Five to make a real difference in the world Rocket Man: Nuclear Madness and the Mind of Donald Trump John Gartner, Steven Buser, Leonard Cruz,
