Neutrosophic Sets and Systems, Vol. 34, 2020. Special Issue: Social Neutrosophy in Latin America Florentin Smarandache, Mohamed Abdel-Basset, Maikel Leyva Vazquez, Neutrosophy as science has inclusive attributes that make possible to extract the contributions of neutral values in the analysis of data sets it builds a unified field of logic for transdisciplinary studies that transcend the boundaries between natural and social sciences Neutral philosophy seeks to solve the problems of indeterminacy that appear universally to reform the current natural or social sciences with an open methodology to promote innovation The research products related in this special issue start from the premise that the difficulty is not the complexity of the social environment but the instrumental obsolescence to observe interpret and manage that complexity there are bold approaches and proposals for valid solutions that come to enrich the universe of resolution through the use of neutral methods In the last year the use of tools related to neutrosophy and its application to the social sciences modeling of social phenomena based on simulation agents problems associated with health psychology education environmental management and sustainability solutions and legal sciences has increased in the events organized by the Asociacion Latinoamericana de Ciencias Neutrosóficas ALCN in Spanish The methods of higher incidence are cognitive maps neutral Iadovs neutral Delphi analytical hierarchy process methods neutral statistics neutral personality models among the most significant In this special issue there is a predominance of research from Ecuadorian universities demonstrating how neutrosophy and its methods are consolidated as instruments of analysis inference and research validation

Neutrosophic Sets and Systems, vol. 69/2024 {Special Issue on Neutrosophy and Plithogeny: Fundamentals and Applications} Florentin Smarandache, Mohamed Abdel-Basset, Maikel Leyva-Vázquez, Said Broumi, 2024-07-01 A special issue of the International Journal in Information Science and Engineering Neutrosophic Sets and Systems vol 69 2024 is

dedicated to the Neutrosophic approaches in research on the occasion of the international and multidisciplinary conference held at the Universidad César Vallejo in Lima Peru on July 8 and 9 This event marks a significant milestone as it is the first time that the Andean region and Latin America host scholars and researchers dedicated to studying various theoretical and applicative issues in the expansive and diverse field of Neutrosophic approaches Since its conception Neutrosophic theory has proven to be an interdisciplinary and innovative field notably growing with the introduction of several generalizations of Neutrosophic Sets such as Plithogenic Sets Hypersoft Sets Indeterministic Soft Sets SuperHyperSoft Sets and MultiAlism These advanced conceptualizations have further expanded the versatility and application range of Neutrosophic theory allowing its adoption in an ever increasing spectrum of disciplines The conference with its international and multidisciplinary character has brought together experts and scholars from various fields providing a unique platform for the discussion and exchange of ideas on the multiple applications of Neutrosophic approaches This special issue also addresses how scientific production in Neutrosophy focuses on social issues specific to Latin American philosophy In the regional context of Latin America it is possible to state that Neutrosophic tools and knowledge are used for the identification analysis and resolution of social problems offering unique approaches or distinctive contributions to the field of Neutrosophy influenced by its cultural and philosophical context Neutrosophic science in Latin America shows a clear pattern of how scientific production addresses social problems standing out for its innovative approaches that reflect the cultural and philosophical particularities of the region This approach has allowed Neutrosophy not only to advance in theoretical terms but also to provide practical and contextually relevant solutions to social challenges This special issue compiles works presented at the conference reflecting the richness and diversity of current research in this field We hope that these articles not only contribute to the advancement of knowledge in Neutrosophic theory but also inspire new research and applications in multiple disciplines

Federal information system controls audit manual. Volume I financial statement audits. ,1999 Recent Developments in Decision Support Systems Clyde W. Holsapple,Andrew B. Whinston,2013-06-29 Over the past two decades many advances have been made in the decision support system DSS field They range from progress in fundamental concepts to improved techniques and methods to widespread use of commercial software for DSS development Still the depth and breadth of the DSS field continues to grow fueled by the need to better support decision making in a world that is increasingly complex in terms of volume diversity and interconnectedness of the knowledge on which decisions can be based This continuing growth is facilitated by increasing computer power and decreasing per unit computing costs But it is spearheaded by the multifaceted efforts of DSS researchers The collective work of these researchers runs from the speculative to the normative to the descriptive It includes analysis of what the field needs designs of means for meeting recognized needs and implementations for study It encompasses theoretical empirical and applied orientations It is concerned with the invention of concepts frameworks models and languages for giving varied helpful perspectives It involves the discovery of principles

methods and techniques for expeditious construction of successful DSSs It aims to create computer based tools that facilitate DSS development It assesses DSS efficacy by observing systems their developers and their users This growing body of research continues to be fleshed out and take shape on a strong but still developing skeletal foundation
