Whats Smaller Than A Pygmy Shrew Wells Of Knowledge Science:

What's Smaller Than a Pygmy Shrew? Robert E. Wells, 1995-01-01 1996 CBC NSTA Outstanding Science Trade Book A pygmy shrew is small it s among the littlest mammals A ladybug is even smaller but it hardly seems tiny when you compare it to a protozoa And there are many things smaller still so small that we can see them only with a microscope Would you believe there are particles that are so tiny that we can t measure their exact size Explore the huge world of the very small Wells of Knowledge Science Series Collection Grade 1-2 Robert E. Wells, 2022-11-30 Using fun facts and creative comparisons science author Robert E Wells answers some of humankind s biggest questions about the world we live in This collection of twelve STEM picture books by award winning author Robert E Wells will spark kids curiosity in our universe from the time of dinosaurs to the present day This collection includes e book editions of Can We Share the World with Tigers Can You Count to a Googol Did a Dinosaur Drink This Water How Do You Know What Time It Is How Do You Lift a Lion Is a Blue Whale the Biggest Thing There Is Polar Bear Why Is Your World Melting What s Faster Than a Speeding Cheetah What s Older Than a Giant Tortoise What s Smaller Than a Pygmy Shrew What s So Special about Planet Earth and Why Do Elephants Need the Sun **Is a Blue Whale the Biggest Thing There Is?** Robert E. Wells, 1993-01-01 The blue whale is the biggest creature on Earth But a hollow Mount Everest could hold billions of whales And though Mount Everest is enormous it is pretty small compared to the Earth This book is an innovative exploration of size and proportion **What's Faster Than a Speeding Cheetah?** Robert E. Wells, 1997-01-01 What s faster than a cheetah no animal on earth can run faster But a peregrine falcon can swoop faster than a cheetah can run And the falcon can t compare to an airplane a rocket or the speed of light Lively text and watercolors will make children laugh while they learn all about speed What's Older Than a Giant Tortoise? Robert E. Wells, 2004-01-01 If medals were awarded to animals for living a long time then a giant tortoise would certainly win one Some giant tortoises have lived for more than 150 years Still there are things on this planet much older than giant tortoises Some of the giant sequoia trees that grow in California would be more than 3 000 years old But the trees aren t that old compared to the Barringer Crater in Arizona that was made about 49 000 years ago And it s almost impossible to imagine that 65 million years ago the T Rex dinosaur roamed this planet but we have the skeletons to prove it **What's So Special about Planet Earth?** Robert E. Wells, 2009-09-01 Move to another planet Sounds interesting In our imaginary spaceship let s check out the planets in our solar system Mercury is closest but it has no air and it s either sizzling hot or bitterly cold The atmosphere on Venus is poisonous plus human beings would cook there Mars might work but you d always have to be in a protective shelter And if you got to the outer planets you couldn t even land as they are mostly made of gas Our home planet is looking good Why is Earth so comfortable for plants animals and people As Robert E Wells explains it s because of our just right position form the sun marvelous atmosphere and abundant water Our planet is very special and perfect for us and that s why we must do all we can to keep Earth healthy *How Do You Know What Time It Is?* Robert E. Wells, 2002-01-01

Oppenheim Toy Portfolio Gold Seal Award 2003 What would life be like with no clocks and no calendars How would you know when to get up in the morning How would you know when baseball season was about to start Long long ago all people could do was watch the sun and moon and try to figure things out Eventually they made simple clocks like sundials And as time marched on people came up with more ways to measure it Today quartz crystal watches and atomic clocks tell us EXACTLY what time it is at any moment all over the world *Polar Bear, Why Is Your World Melting?* Robert E. Wells, 2008-09-01 Recommended Book to Teach Children about Climate Change Time Magazine In the Arctic the summer ice is melting making it hard for polar bears and their cubs to survive Why is the world getting warmer The heat of the sun is trapped by the greenhouse gases that surround Earth carbon dioxide methane nitrous oxide and water vapor If there is just the right amount of these trapped gases the air is warm enough for plants animals and people to thrive But now there is too much greenhouse gas especially carbon dioxide Polar bears and all of us are in trouble Robert E Wells shows why so much carbon dioxide is going into the air and what we can do to help keep Earth cool *Why Do Elephants Need the Sun?* Robert E. Wells, 2012-09-01 There are trillions of stars in the universe but we rely on our sun to provide or contribute to most of what we need to survive and thrive heat light plants animals wind and water Complete with fun cartoon illustrations this book give kids plenty of information about our sun in an easy to read and digest format By focusing on the needs of an elephant Wells makes clear just how important the sun is to life on Earth *Did a Dinosaur Drink This Water?* Robert E. Wells, 2006-01-01 It s hard to imagine the molecules in the glass of water you just finished might have once been part of a water hole that dinosaurs drank from In this fascinating new book about the water cycle readers will find that while it might be hard to imagine it s true The author Robert E Wells explains the complete water cycle and also discusses ocean currents ocean and lake habitats and hydroelectricity He also touches on water pollution and our responsibility to keep our water clean The author s bright cartoon illustrations make this information especially appealing to kids
