*When Experiments Travel* Adriana Petryna, 2024-11-01 The phenomenal growth of global pharmaceutical sales and the quest for innovation are driving an unprecedented search for human test subjects particularly in middle and low income countries Our hope for medical progress increasingly depends on the willingness of the world's poor to participate in clinical drug trials While these experiments often provide those in need with vital and previously unattainable medical resources the outsourcing and offshoring of trials also create new problems In this groundbreaking book anthropologist Adriana Petryna takes us deep into the clinical trials industry as it brings together players separated by vast economic and cultural differences Moving between corporate and scientific offices in the United States and research and public health sites in Poland and Brazil *When Experiments Travel* documents the complex ways that commercial medical science with all its benefits and risks is being integrated into local health systems and emerging drug markets Providing a unique perspective on globalized clinical trials *When Experiments Travel* raises central questions Are such trials exploitative or are they social goods How are experiments controlled and how is drug safety ensured And do these experiments help or harm public health in the countries where they are conducted Empirically rich and theoretically innovative the book shows that neither the language of coercion nor that of rational choice fully captures the range of situations and value systems at work in medical experiments today *When Experiments Travel* challenges conventional understandings of the ethics and politics of transnational science and changes the way we think about global medicine and the new infrastructures of our lives

Evidence, Ethos and Experiment P. Wenzel Geissler, Catherine Molyneux, 2017-05 Medical research has been central to biomedicine in Africa for over a century and Africa along with other tropical areas has been crucial to the development of medical science At present study populations in Africa participate in an increasing number of medical research projects and clinical trials run by both public institutions and private companies Global debates about the politics and ethics of this research are growing and local concerns are prompting calls for social studies of the trial communities produced by this scientific work Drawing on rich ethnographic and historiographic material this volume represents the emergent field of anthropological inquiry that links Africanist ethnography to recent concerns with science the state and the culture of late capitalism in Africa

*Randomized Control Trials in the Field of Development* Florent Bédécarrats, Isabelle Guérin, François Roubaud, 2020-09-17 In October 2019 Abhijit Banerjee Esther Duflo and Michael Kremer jointly won the 51st Sveriges Riksbank Prize in Economic Sciences in Memory of Alfred Nobel for their experimental approach to alleviating global poverty But what is the exact scope of their experimental method known as randomized control trials RCTs Which sorts of questions are RCTs able to address and which do they fail to answer The first of its kind *Randomized Control Trials in the Field of Development A Critical Perspective* provides answers to these questions explaining how RCTs work what they can achieve why they sometimes fail how they can be improved and why other methods are both useful and necessary Bringing together

leading specialists in the field from a range of backgrounds and disciplines economics econometrics mathematics statistics political economy socioeconomics anthropology philosophy global health epidemiology and medicine it presents a full and coherent picture of the main strengths and weaknesses of RCTs in the field of development Looking beyond the epistemological political and ethical differences underlying many of the disagreements surrounding RCTs it explores the implementation of RCTs on the ground outside of their ideal theoretical conditions and reveals some unsuspected uses and effects their disruptive potential but also their political uses The contributions uncover the implicit worldview that many RCTs draw on and disseminate and probe the gap between the method's narrow scope and its success while also proposing improvements and alternatives Without disputing the contribution of RCTs to scientific knowledge Randomized Control Trials in the Field of Development warns against the potential dangers of their excessive use arguing that the best use for RCTs is not necessarily that which immediately springs to mind Written in plain language this book offers experts and laypeople alike a unique opportunity to come to an informed and reasoned judgement on RCTs and what they can bring to development

*The SAGE Encyclopedia of Pharmacology and Society* Sarah E. Boslaugh, 2015-09-15 The SAGE Encyclopedia of Pharmacology and Society explores the social and policy sides of the pharmaceutical industry and its pervasive influence in society While many technical STM works explore the chemistry and biology of pharmacology and an equally large number of clinically oriented works focus on use of illegal drugs substance abuse and treatment there is virtually nothing on the immensely huge business Big Pharma of creating selling consuming and regulating legal drugs With this new Encyclopedia the topic of socioeconomic business and consumer and legal and ethical issues of the pharmaceutical industry in contemporary society around the world are addressed Key Features 800 signed articles authored by prominent scholars are arranged A to Z and published in a choice of electronic or print formats Although arranged A to Z a Reader's Guide in the front matter groups articles by thematic areas Front matter also includes a Chronology highlighting significant developments in this field All articles conclude with Further Readings and Cross References to related articles Back matter includes an annotated Resource Guide to further research a Glossary Appendices e.g. statistics on the amount and types of drugs prescribed etc and a detailed Index The Index Reader's Guide and Cross References combine for search and browse capabilities in the electronic edition The SAGE Encyclopedia of Pharmacology and Society is an authoritative and rigorous source addressing the pharmacology industry and how it influences society making it a must have reference for all academic libraries as a source for both students and researchers to utilize

**Science and Narratives of Nature** Jobin M. Kanjirakkat, Gordon McQuat, Sundar Sarukkai, 2017-07-05 The discourse and practice of science are deeply

connected to explicit and implicit narratives of nature. However, nature has been understood in diverse ways by cultures across the world. Could these different views of nature generate the possibility of alternate views on science? Part of the innovative series *Science and Technology Studies*, this volume looks at different conceptualizations of nature and the manner in which they structure the practice of the sciences. The essays draw upon philosophy, history, sociology, religion, feminism, mathematics, and cultural studies and establish a dialogue between cultures through a multi-disciplinary exploration of science. With contributions from major scholars in the field, this volume will deeply interest scholars and students of science and technology studies, sociology, history, and philosophy of science, as also environmental studies.
