China's Green Religion James Miller, 2017-05-16 How can Daoism China s indigenous religion give us the aesthetic ethical political and spiritual tools to address the root causes of our ecological crisis and construct a sustainable future In China s Green Religion James Miller shows how Daoism orients individuals toward a holistic understanding of religion and nature Explicitly connecting human flourishing to the thriving of nature Daoism fosters a green subjectivity and agency that transforms what it means to live a flourishing life on earth Through a groundbreaking reconstruction of Daoist philosophy and religion Miller argues for four key green insights a vision of nature as a subjective power that informs human life an anthropological idea of the porous body based on a sense of qi flowing through landscapes and human beings a tradition of knowing founded on the experience of transformative power in specific landscapes and

topographies and an aesthetic and moral sensibility based on an affective sensitivity to how the world pervades the body and the body pervades the world Environmentalists struggle to raise consciousness for their cause Miller argues because their activism relies on a quasi Christian concept of saving the earth Instead environmentalists should integrate nature and culture more seamlessly cultivating through a contemporary intellectual vocabulary a compelling vision of how the earth materially and spiritually supports human flourishing *Ultimates* Robert Cummings Neville,2013-10-01 A new theology of ultimate realities and a new theory of religion to back it up addressed to believers unbelievers and scholars of all traditions

New Society ,1980 *A Work and Its Shapers: The "Most High Scripture of the Rectifying Methods of the Three*

Heavens" in Early Medieval China Timothy Charles Swanger,2019 Religions following Max Müller have often been seen by scholars in religious studies as uniform collections of beliefs and practices encoded in stable sacred books that direct the conduct of religious actors These texts were the chief focus of academic students of religion through much of the 20th century and this approach remains strong in the 21st However a growing chorus of dissidents has begun to focus on the lived experience of practitioners and the material objects that structure that experience and some textual scholars have begun extending this materialist framework to the study of texts This dissertation is a contribution in that vein from the field of Daoist studies Now split between two separate texts the Most High Scripture of the Rectifying Methods of the Three Heavens began as a 4th century collection of apocalyptic predictions and apotropaic devices designed to deliver a select group of Chinese literati to the heavens of Highest Clarity Later editors during the early medieval period ca 220-589 CE took one of two paths for their own reasons they altered the Rectifying Methods to emphasize either the world's end or its continuation Detailed study of these alterations and their contexts shows how individuals and groups used and modified the Rectifying Methods in ways that challenge the conventional relationship between religious text and religious actor **Strange**

Writing Robert Ford Campany,1996-01-25 Between the Han dynasty founded in 206 B C E and the Sui which ended in 618 C E Chinese authors wrote many thousands of short textual items each of which narrated or described some phenomenon deemed strange Most items told of encounters between humans and various denizens of the spirit world or of the miraculous feats of masters of esoteric arts some described the wonders of exotic lands or transmitted fragments of ancient mythology This genre of writing came to be known as zhiguai accounts of anomalies Who were the authors of these books and why did they write of these strange matters Why was such writing seen as a compelling thing to do In this book the first comprehensive study in a Western language of the zhiguai genre in its formative period Campany sets forth a new view of the nature of the genre and the reasons for its emergence He shows that contemporaries portrayed it as an extension of old royal and imperial traditions in which strange reports from the periphery were collected in the capital as a way of ordering the world He illuminates how authors writing from most of the religious and cultural perspectives of the times including Daoists

Buddhists Confucians and others used the genre differently for their own persuasive purposes in the process fundamentally altering the old traditions of anomaly collecting Analyzing the accounts of anomalies both in the context of Chinese religious and cultural history and as examples of a cross culturally attested type of discourse Campany combines in depth Sinological research with broad ranging comparative thinking in his approach to these puzzling rich texts
