The Wealth And Poverty Of Regions Why Cities Matter:

The Wealth & Poverty of Regions Mario Polèse, 2010-01-15 As the world becomes more interconnected through travel and electronic communication many believe that physical places will become less important But as Mario Polèse argues in *The Wealth and Poverty of Regions* geography will matter more than ever before in a world where distance is allegedly dead This provocative book surveys the globe from London and Cape Town to New York and Beijing contending that regions rise or fall due to their location not only within nations but also on the world map Polèse reveals how concentrations of industries and populations in specific locales often result in minor advantages that accumulate over time resulting in reduced prices improved transportation networks increased diversity and not least of all buzz the excitement and vitality that attracts ambitious people *The Wealth and Poverty of Regions* maps out how a heady mix of size infrastructure proximity and cost will determine which urban centers become the thriving metropolises of the future and which become the deserted cities of the past Engagingly written the book provides insight to the past present and future of regions

The Locavore's Dilemma Pierre Desrochers, Hiroko Shimizu, 2012-06-05 A new generation of food activists has come to believe that sustainable farming and eating local are the

way to solve a host of perceived problems with our modern food supply system By combining healthy eating and a high standard of environmental stewardship these locavores think we can also deliver important economic benefits and increase food security within local economies But after a thorough review of the evidence economic geographer Pierre Desrochers and policy analyst Hiroko Shimizu have concluded these claims are mistaken In *The Locavore's Dilemma* they explain the history science and economics of food supply to reveal what locavores miss or misunderstand the real environmental impacts of agricultural production the drudgery of subsistence farming and the essential role large scale industrial producers play in making food more available varied affordable and nutritionally rich than ever before in history At best they show locavorism is a well meaning marketing fad among the world's most privileged consumers At worst it constitutes a dangerous distraction from solving serious global food issues Deliberately provocative but based on scrupulous research and incontrovertible scientific evidence *The Locavore's Dilemma* proves that Our modern food supply chain is a superior alternative that has evolved through constant competition and ever more rigorous efficiency A world food chain characterized by free trade and the absence of agricultural subsidies would deliver lower prices and more variety in a manner that is both economically and environmentally more sustainable There is no need to feel guilty for not joining the locavores on their crusade Eating globally not only locally is the way to save the planet

City Power Richard Schragger, 2016-09-01 Reigning theories of urban power suggest that in a world dominated by footloose transnational capital cities have little capacity to effect social change In *City Power* Richard C Schragger challenges the existing assumptions arguing that cities can govern but only if we let them In the past decade city leaders across the country have raised the minimum wage expanded social services and engaged in social welfare redistribution These cities have not suffered capital flight In fact many are experiencing an economic renaissance Schragger argues that city policies are not limited by the demands of mobile capital but instead by constitutional restraints serving the interests of state and federal officials Maintaining weak cities is a political choice In this new era of global capital the power of cities is more relevant to citizen well being than ever before A dynamic vision of city politics for our new urban age *City Power* reveals how cities can govern despite these constitutional limits and why we should want them to
