The Waning Of Major War Theories And Debates Contemporary Security Studies:

The Waning of Major War Raimo Vayrynen, 2013-10-31 This book is a systematic effort by leading international scholars to map the trends in major power warfare and explore whether it is waxing or waning The main point of departure is that major power war as a historical institution is in decline This does not mean though that wars between states are in general disappearing While there is some convergence in the conclusions by individual authors they are by no means unanimous about the trend The articles explore different causes and correlates of the declining trend in major power warfare including the impact of the international structure nuclear weapons international law multilateral institutions sovereignty and value changes *Perils of Plenty* Jonathan N. Markowitz, 2020-04-02 Among scholars who focus on the politics of natural resources conventional wisdom asserts that resource scarce states have the strongest interest in securing control over resources Counterintuitively however in *Perils of Plenty* Jonathan N Markowitz finds that the opposite is true In actuality what states make influences what they want to take Specifically Markowitz argues that the more economically dependent states are on resource extraction rents for income the stronger their preferences will be to secure control over resources He tests the theory with a set of case studies that analyze how states reacted to the 2007 exogenous climate shock that exposed energy resources in the Arctic Given the dangerous potential for conflict escalation in the Middle East and the South China Sea and the continued shrinkage of the polar ice cap this book speaks to a genuinely important development in world politics that will have implications for understanding the political effects of climate change for many years to come

Rivalry And Cooperation In The Asia-Pacific: The Dynamics Of A Region In Transition (In 2 Volumes) Mark Beeson, 2019-09-23 *Rivalry and Cooperation in the Asia Pacific* provides a comprehensive and accessible introduction to the most important strategic and economic region in the world Asia Pacific is a region that is undergoing a major transformation largely as a consequence of the rise of China and its growing rivalry with the United States Whatever happens in the Asia Pacific will profoundly influence global events not just regional ones Looking ahead the region's future direction and even its name is contested and uncertain This two volume reference work by one of the world's leading analysts of regional affairs places these events in historical context and considers what they may mean for future political economic and strategic relations By focusing on the United States China and the region's most significant middle powers the book explains why and how the Asia Pacific has become the fulcrum of international events *Contemporary Military Theory* Jan Angstrom, J.J. Widen, 2014-07-17 The book aims to provide the reader with a state of the art introduction to classic and modern military theory The text accounts for the most important theories within the field by developing and analyzing these theories as well as problematizing both their normative and explanatory aims While focusing on military theory the book does not only reflect a single way of relating to knowledge of war and warfare but furthers learning by introducing contrasting perspectives as well as constantly criticizing the theories There is a clear need for an introductory text for the entire field of military theory

that focuses whole heartedly on the theories not on their context or how they are expressed in practice during war This book covers such questions as how we should understand the changing character of war the utility of force and how the pursuit of political ends is achieved through military means It draws upon and illustrates military thought through a wide ranging number of examples from the Napoleonic Wars to the current war in Afghanistan This book will be of great interest for students of military theory strategic studies security studies and defence studies *Psychology of a Superpower*

Christopher Fettweis, 2018-05-15 With the collapse of the Soviet Union the United States was left as the world's sole superpower which was the dawn of an international order known as unipolarity The ramifications of imbalanced power extend around the globe including the country at the center What has the sudden realization that it stands alone atop the international hierarchy done to the United States In *Psychology of a Superpower* Christopher J Fettweis examines how unipolarity affects the way U S leaders conceive of their role make strategy and perceive America's place in the world Combining security strategy and psychology Fettweis investigates how the idea of being number one affects the decision making of America's foreign policy elite He examines the role the United States plays in providing global common goods such as peace and security the effect of the Cold War's end on nuclear weapon strategy and policy the psychological consequences of unbalanced power and the grand strategies that have emerged in unipolarity Drawing on psychology's insights into the psychological and behavioral consequences of unchecked power Fettweis brings new insight to political science's policy analysis toolkit He also considers the prospect of the end of unipolarity offering a challenge to widely held perceptions of American indispensability and asking whether the unipolar moment is worth trying to save *Psychology of a Superpower* is a provocative rethinking of the risks and opportunities of the global position of the United States with significant consequences for U S strategy character and identity *The Future of War* Lawrence Freedman, 2017-10-10 An award winning military

historian professor and political adviser delivers the definitive story of warfare in all its guises and applications showing what has driven and continues to drive this uniquely human form of political violence Questions about the future of war are a regular feature of political debate strategic analysis and popular fiction Where should we look for new dangers What cunning plans might an aggressor have in mind What are the best forms of defense How might peace be preserved or conflict resolved From the French rout at Sedan in 1870 to the relentless contemporary insurgencies in Iraq and Afghanistan Lawrence Freedman a world renowned military thinker reveals how most claims from the military futurists are wrong But they remain influential nonetheless Freedman shows how those who have imagined future war have often had an idealized notion of it as confined brief and decisive and have regularly taken insufficient account of the possibility of long wars hence the stubborn persistence of the idea of a knockout blow whether through a dashing land offensive nuclear first strike or cyberattack He also notes the lack of attention paid to civil wars until the West began to intervene in them during the 1990s and how the boundaries between peace and war between the military the civilian and the criminal are becoming increasingly

blurred Freedman's account of a century and a half of warfare and the often misconceived thinking that precedes war is a challenge to hawks and doves alike and puts current strategic thinking into a bracing historical perspective South Asia's Cold War Rajesh M. Basrur, 2008-04-28 This book is a groundbreaking analysis of the India Pakistan nuclear confrontation as a form of cold war that is a hostile relationship between nuclear rivals Drawing on nuclear rivalries between similar pairs the work examines the rise process and potential end of the Cold War between India and Pakistan **Nostalgic Virility as a Cause of War** Matthieu Grandpierron, 2024-03-12 Why do great powers go to war Why are non violent diplomatic options not prioritized Nostalgic Virility as a Cause of War argues that world leaders react to status decline by going to war guided by a nostalgic virile understanding of what it means to be powerful This nostalgic virility a system of subjective beliefs about power bravery strength morality and health acts as a filter through which leaders articulate glorified interpretations of history and assess their power and their country's status on the international stage In this rigorous study of France the United Kingdom and the United States Matthieu Grandpierron tests the theory of nostalgic virility against the two more common theoretical frameworks of realism and the diversionary theory of war Consulting thousands of newly declassified government documents at the highest levels of decision making Grandpierron examines three specific cases the early years of the Indochina War 1945-47 the British reconquest of the Falklands in 1982 and the US invasion of Grenada in 1983 convincingly contending that status seeking behaviour and nostalgic virility are more relevant in explaining why a leader chooses war and conflict over non violent diplomatic options than the dominant frameworks Looking to the recent past Nostalgic Virility as a Cause of War considers how this new model can be applied to current conflicts from the Russian war in Ukraine to Chinese actions in the South China Sea and provides surprising ways of thinking about the relationship between power decision makers and causes of war **The British National Bibliography** Arthur James Wells, 2006 Only the Dead Bear F. Braumoeller, 2019-07-25 The idea that war is going out of style has become the conventional wisdom in recent years But in Only the Dead award winning author Bear Braumoeller demonstrates that it shouldn't have With a rare combination of historical expertise statistical acumen and accessible prose Braumoeller shows that the evidence simply doesn't support the decline of war thesis propounded by scholars like Steven Pinker He argues that the key to understanding trends in warfare lies not in the spread of humanitarian values but rather in the formation of international orders sets of expectations about behavior that allow countries to work in concert as they did in the Concert of Europe and have done in the postwar Western liberal order With a nod toward the American sociologist Charles Tilly who argued that war made the state and the state made war Braumoeller shows argues that the same is true of international orders while they reduce conflict within their borders they can also clash violently with one another as the Western and communist orders did throughout the Cold War Both highly readable and rigorous Only the Dead offers a realistic assessment of humanity's quest to abolish warfare While pessimists have been too quick to discount the successes of our attempts to reduce international conflict

optimists are prone to put too much faith in human nature Reality lies somewhere in between While the aspirations of humankind to govern its behavior with reason and justice have had shocking success in moderating the harsh dictates of realpolitik the institutions that we have created to prevent war are unlikely to achieve anything like total success as evidenced by the multitude of conflicts in recent decades As the old adage advises us only the dead have seen the end of war

Escaping the Deadly Embrace Andrea Bartoletti, 2022-11-15 Encirclement Andrea Bartoletti argues is an essential strategic possibility of the international system and a key trigger of major war Using historical case studies *Escaping the Deadly Embrace* examines how great powers try to escape the two front war problem and seek to preserve their security Encirclement is a geographic variable that occurs in the presence of one or two great powers on two different borders of the surrounded great power The surrounding great powers may not have the capacity to initiate a joint invasion Yet their threatening presence triggers a double security dilemma for the encircled great power which has to disperse its army to secure its borders When the surrounding great powers become capable of launching a two front attack the encircled great power initiates war This situation disastrous in itself can also lead to war contagion when other great powers intervene in the new conflict owing to the rival based network of alliances Combining archival work and historiographical analysis *Escaping the Deadly Embrace* demonstrates the efficacy of this by assessing three major wars the Italian Wars the Thirty Years War and World War I These findings Bartoletti shows have important implications for future major wars Challenging the current focus on the US China rivalry he argues that the most concerning strategic scenario is the encirclement of China by India and Russia

Small states in world politics Matthias Maass, 2017-11-01 What is the story behind the paradoxical survival of small and weak states in a world of great powers and crude power politics And what explains the dramatic rise and fall in the number of states overtime following no consistent trend and not showing an immediately obvious direction or pattern The answers lie at the system level Small states survival is shaped by the international states system Small state survival and proliferation is determined first and foremost by features of and dynamics created at the states system As the states system changes and evolves the chances for small states to survive or proliferate change as well In fact a quantitative investigation confirms this showing that over the course of more than 31 2 centuries the number of small states did fluctuate widely and at times dramatically

Manual relating to Non International Armed Conflicts prepared by a Drafting Committee under the aegis of the San Remo International Institute of Humanitarian Law This is a sequel to the well known San Remo Manual on International Law Applicable to Armed Conflicts at Sea published in 1995 The new Manual reflects the results of a larger Project launched by the Institute the background papers of which were printed in full in volume 30 2000 of the Yearbook The sphere of non international armed conflicts is gaining increasing importance and attention due to the growing frequency and menace of internal wars The imperative need to come up with an authoritative restatement of the law governing these conflicts has become obvious This is a first attempt of its kind and it is bound to arouse interest and debate

War, Armed Force, and the People Walter C. Opello Jr., 2016-10-18 Throughout history innovations in military technology have transformed warfare which in turn affected state formation This interplay between warfare military technology and state formation is the focus of this text Theoretically grounded in the bellicist approach to the study of war and state which posits that war is a normal part of human experience the book argues that the threat of war by powerful predatory neighbors has been until relatively recently the prime mover of state formation Using a historical approach it explains how advances in military technology have transformed war and how new modes of war in turn have transformed forms of politico military rule especially with regard to the relationship between the state armed force and the people

Responding to the unprecedented violence of our times and the corresponding interest in nonviolent solutions this book takes up the heart of pacifism its critique of what pacifists have termed the war system Pacifism as War Abolitionism provides an account of the war system that draws on contemporary sociology history and political philosophy The core of its critique of that system is that war begets war and hence war will not be ended or even constrained by finding more principled ways to fight war as many imagine War can only be ended by ending the war system which can only be done nonviolently This has been the message of pacifism s great voices like Gandhi Dr Martin Luther King Jr and Dorothy Day It is the principal message of this book Key Features Draws extensively on the sociological and historical research on war to expand the usual philosophical discussion beyond hypothetical accounts Expands the dialogues on the ethics of war beyond just war theory to its principal alternative pacifism Engages discussion of empire and imperialism in relation to the logic and development of the war system Presents pacifism s response to the reality of war today including the idea of never ending war Why Nations Fight Richard Ned Lebow,2010-09-02 Four generic motives have historically led states to initiate war fear interest standing and revenge Using an original data set Richard Ned Lebow examines the distribution of wars across three and a half centuries and argues that contrary to conventional wisdom only a minority of these were motivated by security or material interest Instead the majority are the result of a quest for standing and for revenge an attempt to get even with states who had previously made successful territorial grabs Lebow maintains that today none of these motives are effectively served by war it is increasingly counterproductive and that there is growing recognition of this political reality His analysis allows for more fine grained and persuasive forecasts about the future of war as well as highlighting areas of uncertainty
