The White Bird John Berger:

The White Bird John Berger, 1985 **The Ethnographer's Eye** Anna Grimshaw, 2001-04-30 Grimshaw's exploration of the role of vision within modern anthropology engages with current debates about ocularcentism investigating the relationship between vision and knowledge in ethnographic enquiry Using John Berger's notion of ways of seeing the author argues that vision operates differently as a technique and theory of knowledge within the discipline In the first part of the book she examines contrasting visions at work in the so called classical British school reassessing the legacy of Rivers Malinowski and Radcliffe Brown through the lens of early modern art and cinema In the second part of the book the changing relationship between vision and knowledge is explored through the anthropology of Jean Rouch David and Judith MacDougall and Melissa Llewelyn Davies Vision is foregrounded in the work of these contemporary ethnographers focusing more general questions about technique and epistemology whether image based media are used or not in ethnographic enquiry

Critical Reading Across the Curriculum, Volume 1 Robert DiYanni, Anton Borst, 2017-05-01 Powerful strategies tools and techniques for educators teaching students critical reading skills in the humanities Every educator understands the importance of teaching students how to read critically Even the best teachers however find it challenging to translate their own learned critical reading practices into explicit strategies for their students Critical Reading Across the Curriculum Humanities Volume 1 presents exceptional insight into what educators require to facilitate critical and creative thinking skills Written by scholar educators from across the humanities each of the thirteen essays in this volume describes strategies educators have successfully executed to develop critical reading skills in students studying the humanities These include ways to help students focus actively re read and reflect to re think and re consider understand the close relationship between reading and writing become cognizant of the critical importance of context in critical reading and of making contextual connections learn to ask the right questions in critical reading and reasoning appreciate reading as dialogue debate and engaged conversation In addition teachers will find an abundance of innovative exercises and activities encouraging students to practice their critical reading skills These can easily be adapted for and applied across many disciplines and course curricula in the humanities The lifelong benefits of strong critical reading skills are undeniable Students with properly developed critical reading skills are confident learners with an enriched understanding of the world around them They advance academically and are prepared for college success This book arms educators librarians high school teachers university lecturers and beyond with the tools to teach a most paramount lesson *Art, History, and Postwar Fiction* Kevin Brazil, 2018 Art History and Postwar Fiction explores the ways in which twenty century novelists responded to visual art and how writing about art was often a means of commenting on historical developments of the period **Evidence, History, and the Great War** Gail Braybon, 2003 In the English speaking world the Great War maintains a tenacious grip on the public imagination and also continues to draw historians to an event which has been interpreted variously as a symbol of modernity

the midwife to the twentieth century and an agent of social change Although much common knowledge about the war and its aftermath has included myth simplification and generalisation this has often been accepted uncritically by popular and academic writers alike While Britain may have suffered a surfeit of war books many telling much the same story there is far less written about the impact of the Great War in other combatant nations Its history was long suppressed in both fascist Italy and the communist Soviet Union only recently have historians of Russia begun to examine a conflict which killed maimed and displaced so many millions Even in France and Germany the experience of 1914-18 has often been overshadowed by the Second World War The war's social history is now ripe for reassessment and revision The essays in this volume incorporate a European perspective engage with the historiography of the war and consider how the primary textual oral and pictorial evidence has been used or abused Subjects include the politics of shellshock the impact of war on women the plight of refugees food distribution in Berlin and portrait photography all of which illuminate key debates in war history
