**Transforming Otherness** Peter Nynas, 2017-07-28 Today people in different situations and contexts face intercultural challenges These are a result of increasing mobility Sometimes such challenges are brought about by crisis situations and an international labor market However people also come in contact with each other through forms of new technology such as the Internet and through literature and film In these multicultural encounters misunderstandings and sometimes clashes are experienced This volume presents studies in culture communication and language all of which strive through a variety of theoretical perspectives to develop understanding of such challenges and perhaps offer practical solutions Encountering otherness may evoke fears negative attitudes and a corresponding will to dismiss the otherness in front of us either consciously or unconsciously This denial of otherness may also be subtle Thinking about otherness as

described in this volume also raises questions about how otherness is represented and mediated and about the possible role of third parties in facilitating communication in such situations Sometimes a third party can play a crucial role in facilitating the communication process and serve as a channel of communication Trust in humanity as a bridge to community requires a subtle balance between representations of self and other Various problems arise in intercultural mediation which may be caused by cultural and political differences and these are sometimes used to validate stereotypical beliefs and images The editors argue that in both academic and art circles European perspectives have widely been understood as universal

**Female Mythologies in Contemporary Chicana Literature** Nadine Gebhardt, 2007-08 Thesis M A from the year 2005 in the subject American Studies Literature grade 1.0 Ernst Moritz Arndt

University of Greifswald language English abstract In Mexican American Chicano culture feminine archetypes from the Mexican tradition play an important role for woman s subjectivity Traditionally such archetypes epitomize Catholic patriarchal constructions of womanhood Idolized by the figures of the Virgin of Guadalupe La Malinche and La Llorona the most prevailing representations of female sexuality and motherhood evolve around the passive virgin the sinful seductress and the traitorous mother Along the lines of Chicana feminism the traditional definitions of these feminine archetypes can be seen as promoting an image of woman that is detrimental to female subjectivity Although there are three figures these archetypes evoke a binary opposition that defines woman as either good woman or bad woman virgin or whore As such they limit and circumscribe the Chicana s development of subjectivity But these cultural icons may also epitomize feminine power and hence provide the Chicana with possible feminist role models to back up her emancipation Chicana feminists have employed creative writing to counter the Catholic patriarchal discourse on the Virgin of Guadalupe Malinche and La Llorona As they explore these cultural archetypes in their novels short stories and poems Chicana feminists attempt to reveal the mechanisms by which the original images of these mythic figures have been subverted disempowered and distorted But most importantly they seek to deconstruct the virgin whore dichotomy by rewriting the mythic figures Through a revision of existing myths Chicana writers are able to create a feminist mythology that is rooted in cultural tradition but simultaneously serves as an act of resistance to the dominant discourse This Master s thesis will explore the mythic figures of Guadalupe Malinche and La Llorona in all
