civilization at least in the conventional story of Rome's collapse. But a slight shift of perspective brings their history and ours shockingly alive. Alaric grew up near the river border that separated Gothic territory from Roman. He survived a border policy that separated migrant children from their parents and he was denied benefits he likely expected from military service. Romans were deeply conflicted over who should enjoy the privileges of citizenship. They wanted to buttress their global power but were insecure about Roman identity; they depended on foreign goods but scoffed at and denied foreigners their own voices and humanity. In stark contrast to the rising bigotry, intolerance, and zealotry among Romans during Alaric's lifetime, the Goths, as practicing Christians, valued religious pluralism and tolerance. The marginalized Goths, marked by history as frightening harbingers of destruction and of the Dark Ages, preserved virtues of the ancient world that we take for granted. The three nights of riots Alaric and the Goths brought to the capital struck fear into the hearts of the powerful, but the riots were not without cause. Combining vivid storytelling and historical analysis, Douglas Boin reveals the Goths' complex and fascinating legacy in shaping our world.

Archaeology, history and biosciences Susanne Brather-Walter, 2019-06-04. New scientific methods offer new insights in the past. Promising opportunities for archaeology and historiography are confronted with the challenges of interdisciplinary cooperation between the sciences and the humanities. The Battle Rhetoric of Crusade and Holy War, c. 1099-c. 1222 Connor Christopher Wilson, 2022-11-25. This book examines Latin narratives produced in the aftermath of the First Crusade and challenges the narrative of supposed brutality and amorality of warfare in this period, instead focusing on the moral and didactic concerns surrounding warfare and violence with which medieval authors wrestled. The battle oration, a rousing harangue exhorting warriors to deeds of valour, has been regarded as a significant aspect of warfare since the age of Xenophon and has continued to influence conceptions of campaigning and combat to the present day. While its cultural and chronological pervasiveness attests to the power of this trope, scholarly engagement with the literary phenomenon of the pre-battle speech has been limited. Moreover, previous work on medieval battle rhetoric has only served to reinforce the supposed brutality and amorality of warfare in this period, highlighting appeals to martial prowess, a hatred for the enemy, and promises of wealth and glory. This book, through an examination of Latin narratives produced in the aftermath of the First Crusade and the decades that followed, challenges this understanding and illuminates the moral and didactic concerns surrounding warfare and violence with which medieval authors wrestled. Furthermore, while battle orations form a clear mechanism by which the fledgling crusading movement could be explored ideologically, this comparative study reveals how non-crusading warfare in this period was also being reconceptualised in light of changing ideas about just war, authority, and righteousness in Christian society. This volume is perfect for researchers, students, and scholars alike interested in medieval history and

military studies **The Oxford Handbook of Medieval Latin Literature** Ralph Hexter, David Townsend, 2012-01-20 The twenty eight essays in this handbook represent the best current thinking in the study of Latin language and literature in the Middle Ages Contributing authors both senior scholars and gifted younger thinkers among them not only illuminate the field as traditionally defined but also offer fresh insights into broader questions of literary history cultural interaction world literature and language in history and society Their studies vividly illustrate the field s complexities on a wide range of topics including canonicity literary styles and genres and the materiality of manuscript culture At the same time they suggest future possibilities for the necessarily provisional and open ended work essential to the pursuit of medieval Latin studies The overall approach of The Oxford Handbook of Medieval Latin Literature makes this volume an essential resource for students of the ancient world interested in the prolonged after life of the classical period s cultural complexes for medieval historians for scholars of other medieval literary traditions and for all those interested in delving more deeply into the fascinating more than millennium long passage between the ancient Mediterranean world and what we consider modernity Constantine the Great General Elizabeth James, Stephen English, 2012-05-19 Constantine the Great is a titanic figure in Roman and indeed world history Most famed for making Christianity the official religion of the Roman Empire and thus ensuring its survival and spread and for moving the seat of imperial rule to New Rome Constantinople he is most often studied for his religious and political impact But it is often forgotten that his power and success was made possible by the use of armed force in an impressive military career which is well worthy of study in its own right Constantine won victories over external barbarian armies as well as defeating the Roman armies of his internal rivals in civil war Elizabeth James sets the scene with a discussion of the nature of the Roman army as it emerged and evolved from from the Third Century Crisis describing the make up of the armies their weapons and tactics and the impact of Constantine s policies and reforms She then examines each of Constantine s campaigns and battles including the British campaign which led to his proclamation as emperor at York to show that he deserves to be remembered as a great general as well as a great emperor This will be a welcome study of a neglected facet of this historical colossus **Journal of the Australian Early Medieval Association** Geoffrey D. Dunn, Darius von Guttner Sporzynski, 2015-12-31 The journal welcomes papers on historical literary archaeological cultural and artistic themes particularly interdisciplinary papers and those that make an innovative and significant contribution to the understanding of the early medieval world and stimulate further discussion For submission details please see the association website www.aema.net.au Submissions then may be sent to journal.aema.net.au
