Venerable Trees History Biology And Conservation In The Bluegrass:

Venerable Trees Tom Kimmerer, 2015-10-23 Will likely become a classic among books about Kentucky's natural history and environment because it covers so much new information Lexington Herald Leader When the first settlers arrived in the Bluegrass region of Kentucky they found an astonishing landscape of open woodland grazed by vast herds of bison Farmers quickly replaced the bison with cattle sheep and horses but left many of the trees to shade their pastures Today central Kentucky and central Tennessee still boast one of the largest populations of presettlement trees in the nation found in both rural and urban areas In *Venerable Trees History Biology and Conservation in the Bluegrass* Tom Kimmerer showcases the beauty age size and splendor of these ancient trees and the remaining woodland pastures Documenting the distinctive settlement history that allowed for their preservation Kimmerer explains the biology of Bluegrass trees and explores the reasons why they are now in danger He also reveals the dedication and creativity of those fighting to conserve these remarkable three hundred to five hundred year old plants from innovative conscientious developers who build around them rather than clearing the land to farmers who use lightning rods to protect them from natural disasters Featuring more than one hundred color photographs this beautifully illustrated book offers guidelines for conserving ancient trees worldwide while educating readers about their life cycle *Venerable Trees* is an informative call to understand the challenges faced by the companions so deeply rooted in the region's heritage and a passionate plea for their preservation A fascinating book about a unique landscape in the Bluegrass Region of Kentucky Frans Vera author of *Grazing Ecology and Forest History*

Venerable Trees Tom Kimmerer, 2015 Central Kentucky and central Tennessee still boast one of the largest populations of presettlement trees in the US found in both rural and urban areas In *Venerable Trees* Tom Kimmerer showcases the beauty age size and splendour of these ancient trees and the remaining woodland pastures **Making Bourbon** Karl Raitz, 2020-03-17 Raitz examines the rich story of distilling in its Kentucky heartland and traces its maturation from a local craft to an enduring industry William Wyckoff author of *How to Read the American West* While other industries chase after the new and improved bourbon makers celebrate traditions that harken back to an authentic frontier craft Distillers enshrine local history in their branding and time tested recipes and rightfully so Kentucky's unique geography shaped the whiskeys its settlers produced and for more than two centuries distilling bourbon fundamentally altered every aspect of Kentucky's landscape and culture *Making Bourbon A Geographical History of Distilling in Nineteenth Century Kentucky* illuminates how the specific geography culture and ecology of the Bluegrass converged and gave birth to Kentucky's favorite barrel aged whiskey Expanding on his fall 2019 release *Bourbon's Backroads* Karl Raitz delivers a more nuanced discussion of bourbon's evolution by contrasting the fates of two distilleries in Scott and Nelson Counties In the nineteenth century distilling changed from an artisanal craft practiced by farmers and millers to a large scale mechanized industry The resulting infrastructure farms mills turnpikes railroads steamboats lumberyards and cooperage shops left its permanent mark on the

land and traditions of the commonwealth Today multinational brands emphasize and even construct this local heritage This unique interdisciplinary study uncovers the complex history poured into every glass of bourbon A gem The depth of Raitz's research and the breadth of his analysis have produced a masterful telling of the shift from craft to industrial distilling And in telling us the story of bourbon Raitz also makes a terrific contribution to our understanding of America's nineteenth century economy David E Hamilton author of *From New Day to New Deal* *Bourbon's Backroads* Karl Raitz, 2019-11-05 This history of bourbon explores how the shift from home distillers to commercial producers changed the culture and landscape of nineteenth century Kentucky As one of the commonwealth's signature industries bourbon distilling has influenced the landscape and heritage of the region for more than two centuries Blending several topics tax revenue railroads the mechanics of brewing geography landscapes and architecture this primer and geographical guide presents a detailed history of Kentucky's distilling industry Nineteenth century distilling changed from an artisanal craft practiced by farmers and millers to a large scale mechanized industry that practiced increasingly refined production techniques Based on extensive archival research that includes private paper collections newspapers and period documents this work places the distilling process in its environmental geographical and historical context *Bourbon's Backroads* reveals the places where bourbon's heritage was made from old and new distilleries storage warehouses railroad yards and factories where copper fermenting vessels are made and why the industry continues to thrive

Prior Art Peter H. Christensen, 2024-05-07 A groundbreaking text on the history of the use of patents in architecture Although patents existed in Renaissance Italy and even in Confucian thought it was not until the middle third of the nineteenth century that architects embraced the practice of patenting in significant numbers Patents could ensure as they did for architects engineering brethren the economic and cultural benefits afforded by exclusive intellectual property rights But patent culture was never directly translatable to the field of architecture which tended to negotiate issues of technological innovation in the context of the more abstract issues of artistic influence and formal expression In *Prior Art* scholar Peter Christensen offers the first full scale monographic treatment of this complex relationship between art and invention Christensen's method a site oriented approach steeped in multinational and multilingual archival work is geared toward unifying fractured global histories of architectural patents through the distinct union of architectural cultural and legal history *Prior Art* offers a record of the marriage of intellectual property and architectural invention a momentous understudied and still underutilized aspect of architectural culture in the nineteenth and twentieth centuries and the ways in which it influenced how buildings are conceived designed engineered constructed and promoted

Lost Bluegrass Ronnie Dreistadt, 2011-04-20 The Bluegrass region has come to define what makes Kentucky a place unlike any other What began as the homeland of native tribes developed into ideal farmland for early settlers Development continued as the region evolved into the premier breeding grounds for world famous thoroughbreds helping to bring the Bluegrass international recognition as the epicenter of American horseracing and equestrian culture Yet

development of the region has never stopped The rolling hills limestone fences and legendary horse farms that once defined the landscape continue to vanish as suburban sprawl stretches into the far reaches of the Bluegrass Join author Ronnie Dreistadt as he tracks the history of the Bluegrass what's been lost and the ongoing efforts to save what remains

Elderflora Jared Farmer, 2022-10-27 The epic story of the planet's oldest trees and the making of the modern world Humans have always revered long lived trees But as historian Jared Farmer reveals in *Elderflora* our veneration took a modern turn in the eighteenth century when naturalists embarked on a quest to locate and precisely date the oldest living things on earth The new science of tree time prompted travellers to visit ancient specimens and conservationists to protect sacred groves Exploitation accompanied sanctification as old growth forests succumbed to imperial expansion and the industrial revolution Taking us from Lebanon to New Zealand to California Farmer surveys the complex history of the world's oldest trees including voices of Indigenous peoples religious figures and contemporary scientists who study elderflora in crisis In a changing climate a long future is still possible Farmer shows but only if we give care to young things that might grow old Combining rigorous scholarship with lyrical writing *Elderflora* chronicles the complex roles ancient trees have played in the modern world and illuminates how we might need old trees now more than ever Historian Jared Farmer tells the globe spanning story of humanity's deep fascination with the oldest living trees the lessons in survival they offer us and how to alter our behaviour so that the young trees of today can become ancient themselves
