Japan's Foreign Aid Policy in Africa Pedro Amakasu Raposo, 2014-11-20 Japan's Foreign Aid Policy in Africa seeks to evaluate TICAD's intellectual contribution to and its development practices regarding Africa over the past 20 years. A central conclusion is that while TICAD bureaucrats lacked agency to support Japanese companies in Africa, the model of emerging powers partnerships has expanded in Africa.

Reconciliation Discourse Annelies Verdoolaege, 2008 This volume is a research monograph analysing the South African Truth and Reconciliation Commission (TRC) from an ethnographic linguistic point of view. The central proposition of this book is that the TRC can be regarded as a mechanism that leads to the hegemony of specific discourses thus exercising power. The analysis illustrates how through a certain type of reconciliation discourse constructed at the TRC hearings a reconciliation oriented reality took shape in post-TRC South Africa. Basically, the study points to the long-term implications a truth commission can exert on a traumatised post-conflict society. The book is unique on several levels. TRC discourse is explored in depth on the basis of personal stories from TRC testifiers. A combination of Poststructuralist and Critical Discourse Analysis approaches form the theoretical foundations and an extensive bibliography provides an impressive database of TRC publications.

Truth and Reconciliation Commission Processes Karen Brounéus, 2018-11-27 After war, does truth telling lead to more peaceful attitudes between former enemies? This book is the first to study the over-time effect of a Truth and Reconciliation Commission (TRC) process on people's attitudes towards peace. Focusing on the Solomon Islands TRC process, one of the least known or studied TRC processes in the world, and using surveys, focus groups, and in-depth interviews, the book reveals some critical issues for peacebuilding. For example, while support of the TRC was consistently quite strong over the two years of the study, there was a sharp decline in trust in the process as well as a significant increase in distrust and suspicion towards ex-combatants over the two-year period. The book shows that the ex-combatants did not feel safe to tell the truth in the TRC and had therefore decided beforehand what to say in the hearings. A systematic telling of untruths thereby took place, severely undermining relationships and peacebuilding in the country. The book weaves the findings from the Solomon Islands with experiences of other post-conflict truth-telling processes around the world and suggests practical guidelines for future TRC processes after war.

Radiation Source Use and Replacement National Research Council, Division on Earth and Life Studies, Nuclear and Radiation Studies Board, Committee on Radiation Source Use and Replacement, 2008-05-25 In the United States, there are several thousand devices containing high-activity radiation sources licensed for use in areas ranging from medical uses such as cancer therapy to safety uses such as testing of structures and industrial equipment. Those radiation sources are licensed by the U.S. Nuclear Regulatory Commission and state agencies. Concerns have been raised about the safety and security of the radiation sources, particularly amid fears that they could be used to create dirty bombs or radiological dispersal devices (RDD). In response to a request from Congress, the U.S. Nuclear

Regulatory Commission asked the National Research Council to conduct a study to review the uses of high risk radiation sources and the feasibility of replacing them with lower risk alternatives The study concludes that the U S government should consider factors such as potential economic consequences of misuse of the radiation sources into its assessments of risk Although the committee found that replacements of most sources are possible it is not economically feasible in some cases The committee recommends that the U S government take steps to in the near term to replace radioactive cesium chloride radiation sources a potential dirty bomb ingredient used in some medical and research equipment with lower risk alternatives The committee further recommends that longer term efforts be undertaken to replace other sources The book presents a number of options for making those replacements
