National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1993 **Euro-Par' 99 Parallel Processing** Patrick Amestoy, Philippe Berger, Michel Dayde, Iain Duff, Valerie Fraysse, Luc Giraud, Daniel Ruiz, 2003-05-21 Euro-Par is an international conference dedicated to the promotion and advancement of all aspects of parallel computing The major themes can be divided into the broad categories of hardware software algorithms and applications for parallel computing The objective of Euro-Par is to provide a forum within which to promote the development of parallel computing both as an industrial technique and an academic discipline extending the frontier of both the state of the art and the state of the practice

This is particularly important at a time when parallel computing is undergoing strong and sustained development and experiencing real industrial take up. The main audience for and participants in Euro Par are seen as researchers in academic departments, government laboratories and industrial organisations. Euro Par's objective is to become the primary choice of such professionals for the presentation of new results in their specific areas. Euro Par is also interested in applications which demonstrate the effectiveness of the main Euro Par themes. There is now a permanent Web site for the series <http://brahms.fmi.uni-passau.de/ci/europar> where the history of the conference is described. Euro Par is now sponsored by the Association of Computer Machinery and the International Federation of Information Processing. Euro Par 99 follows that of the past four conferences and consists of a number of topics each individually monitored by a committee of four. There were originally 23 topics for this year's conference. The call for papers attracted 343 submissions of which 188 were accepted. Of the papers accepted 4 were judged as distinguished, 111 as regular and 73 as short papers.

Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1963

Proceedings of the Seventh Euromicro Workshop on Parallel and Distributed Processing IEEE Computer Society, 1999. Annotation includes one of the two keynote addresses on matching architecture and software technology for high performance computing systems; perhaps the other was not passed by the review committee. The other 29 full papers and 18 short presentations cover models and architectures for parallel processing; architectures and applications; computer supported cooperative work; load balancing; design environments for parallel and distributed processing; models and tools; applications; SIMD as computational engines; performance modeling and scheduling; and heterogeneous systems. Among specific topics are the collective computing model; optimal versus robust design to optimize network throughput; a proxy based approach to supporting cooperative World Wide Web browsing; the performance of nearest neighbor load balancing algorithms in parallel systems; and a framework backbone for software fault tolerance in embedded parallel applications. No subject index. Annotation copyrighted by Book News Inc. Portland, OR.
