

GUIDE FOR TRANSIT-ORIENTED DEVELOPMENT

OVERVIEW

Across the country, communities are “putting two and two together” and getting more than the usual answer. Over the past several decades, cities have been combining clusters of mixed land uses with transit stations and producing prime examples of efficient and livable growth patterns that make walking and transit use more convenient.

These transit-oriented developments (TODs) have appeared in urban and suburban settings from Seattle to Atlanta, from Chicago to Dallas.

This guide highlights key ideas about transit-oriented development and shows how local Twin Cities projects have put these ideas to work.

The suggestions outlined in this guide are advisory only and are not part of requirements of the Metropolitan Land Planning Act.

Please direct comments about this guide to [Connie Kozlak](#) at the Metropolitan Council.

What’s in a name?

“Transit-oriented development” is the term most commonly used, but several others are also in play – “transit-supportive development” and “transit-friendly development.”
