World Development Report 2015 Mind Society And Behavior:

World Development Report 2015 World Bank,2014-12-04 Development economics and policy are due for a redesign In the past few decades research from across the natural and social sciences has provided stunning insight into the way people think and make decisions Whereas the first generation of development policy was based on the assumption that humans make decisions deliberatively and independently and on the basis of consistent and self interested preferences recent research shows that decision making rarely proceeds this way People think automatically when deciding they usually draw on what comes to mind effortlessly People also think socially social norms guide much of behavior and many people prefer to cooperate as long as others are doing their share And people think with mental models what they perceive and how they interpret it depend on concepts and worldviews drawn from their societies and from shared histories The World Development Report 2015 offers a concrete look at how these insights apply to development policy It shows how a richer view of human behavior can help achieve development goals in many areas including early childhood development household finance productivity health and climate change It also shows how a more subtle view of human behavior provides new tools for interventions Making even minor adjustments to a decision making context designing interventions based on an understanding of social preferences and exposing individuals to new experiences and ways of thinking may enable people to improve their lives The Report opens exciting new avenues for development work It shows that poverty is not simply a state of material deprivation but also a tax on cognitive resources that affects the quality of decision making It emphasizes that all humans including experts and policy makers are subject to psychological and social influences on thinking and that development organizations could benefit from procedures to improve their own deliberations and decision making It demonstrates the need for more discovery learning and adaptation in policy design and implementation The new approach to development economics has immense promise Its scope of application is vast This Report introduces an important new agenda for the development community The Open Society and Its Complexities Gerald Gaus,2021-08-06 The Open

Society is a society of free individuals cooperating while pursuing diverse ways of living The Open Society and Its Complexities marshals formal models and empirical evidence to show that our open society is grounded on the moral foundations of human cooperation originating in our distant evolutionary past but has built upon these foundation a complex society that requires us to rethink both the nature of moral justification and the meaning of democratic self governance Tools and Ethics for

World Development Report 2015 Paul Cammack, 2014 The World Bank has discovered that people are programmable and some poor people are more programmable than others So the 2015 World Development Report Mind Society and Behavior has ditched the rational actor model on which neo classical economics was built as an impediment to the purposive transformation of society It draws on a wide range of disciplines behavioural economics cognitive science psychology neuroscience to improve the design and implementation of development policies that target human choices and action or in other words to turn our own cognitive capacity and sociality against us with the transparent objective of implanting the whole of humanity with the gene of conformity in thought and behaviour to the logic of globally competitive capitalism

The World Food Problem Howard D. Leathers, Phillips Foster, 2017 The fifth edition of The World Food Problem reflects nearly a decade of new research on the causes and potential solutions to the problems of producing and distributing food in developing countries With extensively updated data and new case studies throughout this edition includes new or expanded discussions of such issues as genetically modified food the impact of climate change the quality of agricultural land and water the significance of globalization implications of changes in demographic policy such as the reversal of China's one child rule The result is an accessible comprehensive text as well as a provocative assessment of prospects for the future

Behavioral Insights for Development Oscar Calvo-González, Laura Zoratto, 2017-09-29 Behavioral Insights for Development Cases from Central America brings together a set of experiences that applied behavioral insights to different areas of public policy in some cases through randomized control trials and in others using surveys or behavioral games These experiences collectively show the promise of public policies that are informed by a better understanding of what drives individual behavior In Costa Rica for example informing households of how much water they consume relative to their neighbors reduced water consumption chapter 1 In Guatemala altering the way government communicates with taxpayers increased revenue collection chapter 2 In Nicaragua an analysis of a cash transfer program found that children in households receiving benefits exhibited significantly higher cognitive development a result influenced by parental behavior changes during the program chapter 3 In El Salvador we explore how different biases explain the apparent puzzle of a gas subsidy reform that benefited most of the population yet proved to be widely unpopular chapter 4 Chapter 5 also uses behavioral insights to analyze subsidy reforms in El Salvador this time using a different methodology a set of economic behavioral games designed to evaluate the willingness of individuals to accept subsidy reforms that would affect them directly Finally chapter 6 reflects on the progress made in applying behavioral insights in a

development context These cases illustrate in practice some of the findings of the World Development Report 2015 Mind Society and Behavior In particular they demonstrate the possibility of using nontraditional tools complementary to regulation in contexts where time and resources are limited The World Bank has since established a Mind Behavior and Development eMBeD Unit within the Poverty and Equity Global Practice to mainstream and scale up behavioral science in public policies and programs We hope these experiences will help to inform other practitioners about the potential of applying behavioral insights in a development context and will encourage them to consider such approaches as a complement to traditional policy measures
