

4. Use a tape measure to measure the distance from the top of the workbench to the top of the gauge pin, and record the dimension.

5. Install the appropriate straight gauge pin in the tube end bore.
 - a. Inspect the internal bore of the tube eye. If it is damaged, it may be difficult to install the gauge pin and/or can result in an inaccurate measurement. Repair the bore before installing the gauge pin.
 - b. Insert the straight gauge pin in the tube end bore.

NOTICE

Do not force the gauge pin into the bore, because damage to the pin and/or rod eye can occur. Damage may also cause the pin not to be perpendicular to the cylinder, resulting in an inaccurate measurement.

6. Rotate the gauge pin until the rod pin is oriented opposite the cylinder tube.

7. Slide the straight gauge pin into the tube end bore until the top of the gauge pin is the same distance from the top of the bench as the stopped gauge pin at the cylinder rod end. Refer to the measurement recorded in Step 4.)
8. In order to firmly hold the gauge pin in the center of the tube bore, expand the gauge pin by holding the slotted head bolt with a large screwdriver and tightening the nut.

NOTE: Do not over-tighten the nut. Only slight pressure is necessary to securely hold the pin.

Measuring the Cylinder

⚠ WARNING

Potential pinch point. Keep hands clear, and use caution when retracting the cylinder rod.

1. Connect a portable hydraulic pump, a hand-operated hydraulic pump, or a source of compressed air to the cylinder's hydraulic ports. This will enable manual retraction and extension of the cylinder rod.
2. Completely retract the cylinder rod into the cylinder. Complete retraction of the cylinder rod is critical for accurate measurements.

3. Use two technicians to measure the retracted length. Each technician should use the Pi Tape to measure the distance three times.

NOTE: Read the Pi Tape in the same manner as vernier caliper. For more information on how to read the Pi Tape, refer to "Reading the Pi Tape" later in this document.

4. Position the Pi Tape around the top of the two gauge pins, between the step on the gauge pins and the rod pins in the tip of the gauge pins. Pull the Pi Tape until it is tight.

5. Record this measurement.
6. Repeat to obtain three readings from each technician.
7. Determine the two closest measurements. Add these two readings and divide by two to determine an average measurement.
