Handbook of Research on Equity in Computer Science in P-16 Education Keengwe, Jared,Tran, Yune,2020-11-13

The growing trend for high quality computer science in school curricula has drawn recent attention in classrooms With an increasingly information based and global society computer science education coupled with computational thinking has become an integral part of an experience for all students given that these foundational concepts and skills intersect cross disciplinarily with a set of mental competencies that are relevant in their daily lives and work While many agree that these concepts should be taught in schools there are systematic inequities that exist to prevent students from accessing related computer science skills The Handbook of Research on Equity in Computer Science in P 16 Education is a comprehensive reference book that highlights relevant issues perspectives and challenges in P 16 environments that relate to the inequities that students face in accessing computer science or computational thinking and examines methods for challenging these inequities in hopes of allowing all students equal opportunities for learning these skills Additionally it explores the challenges and policies that are created to limit access and thus reinforce systems of power and privilege The chapters highlight issues perspectives and challenges faced in P 16 environments that include gender and racial imbalances population of growing computer science teachers who are predominantly white and male teacher preparation or lack of faculty expertise professional development programs and more It is intended for teacher educators K 12 teachers high school counselors college faculty in the computer science department school administrators curriculum and instructional designers directors of teaching and learning centers policymakers researchers and students *Critical Research on Sexism and Racism in STEM Fields* Thomas, Ursula,Drake, Jill,2016-06-01 Despite a higher percentage of women entering various STEM fields issues of

discrimination and stereotyping continue to exist These difficulties create a potential hostile environment and a noticeable gap in opportunities advancements and compensation increases in comparison to their male counterparts Critical Research on Sexism and Racism in STEM Fields investigates the bias stereotyping and repression experienced by women within STEM based career fields Emphasizing the struggle felt by women within politics education systems business environments STEM careers as well as issues with advocacy and leadership this publication benefits professionals social activists researchers academics managers and practitioners interested in the institutionalized discrimination and prejudice women encounter in various fields *New Directions for Computing Education* Samuel B. Fee, Amanda M. Holland-Minkley, Thomas E.

Lombardi, 2017-04-17 Why should every student take a computing course What should be the content of these courses How should they be taught and by whom This book addresses these questions by identifying the broader reaches of computing education problem solving and critical thinking as a general approach to learning The book discusses new approaches to computing education and considers whether the modern ubiquity of computing requires an educational approach that is inherently interdisciplinary and distinct from the traditional computer science perspective The alternative approach that the authors advocate derives its mission from an intent to embed itself within an interdisciplinary arts and science context An interdisciplinary approach to computing is compellingly valuable for students and educational institutions alike Its goal is to support the educational and intellectual needs of students with interests in the entire range of academic disciplines It capitalizes on students focus on career development and employers demand for technical while also engaging a diverse student body that may not possess a pre existing interest in computing for computing s sake This approach makes directly evident the applicability of computer science topics to real world interdisciplinary problems beyond computing and recognizes that technical and computational abilities are essential within every discipline The book offers a valuable resource for computer science and computing education instructors who are presently re thinking their curricula and pedagogical approaches and are actively trying new methods in the classroom It will also benefit graduate students considering a future of teaching in the field as well as administrators in both higher education and high schools interested in becoming conversant in the discourse surrounding the future of computing education
