US Heavy Cruisers 1943-75 Wartime And Post War Classes New Vanguard:

US Heavy Cruisers 1943-75 Mark Stille, 2014-09-20 This title follows on from a companion book covering the US heavy cruisers that were built prior to the war together forming the definitive guide to the US's heavy cruiser classes Versatile warships the heavy cruisers of the Baltimore class and their successors in the Oregon City and Des Moines classes commonly acted as carrier escorts throughout World War II but also performed bombardment duties in support of amphibious landings Post World War II the heavy cruisers continued to see service chiefly in Korea and Vietnam Even after the heyday of the heavy cruiser had passed the ships continued to serve several were converted into the earliest examples of guided missile cruisers and created an enduring legacy in the US Navy From an established expert on the US and Pacific naval history this is an invaluable resource richly illustrated with artwork and photographs

US Navy Light Cruisers 1941-45 Mark Stille, 2016-07-28 During World War II the United States built 72 light cruisers of various classes In response to the severe air threat that surface ships faced new cruisers were designed with increasingly heavy anti-aircraft weaponry as well as the traditional 6in guns With the speed and range to keep up with aircraft carriers and their considerable anti-aircraft capability they were a mainstay of the carrier escorts This book examines every US light cruiser produced including those of the Fargo and Worcester classes which were actually complete after World War II had ended tracing their design development and evolution throughout the war and beyond

Soviet Cold War Guided Missile Cruisers Edward Hampshire, 2017-01-26 Heavily armed and formidable guided missile cruisers formed the core of the Soviet Navy during the Cold War From the last class of conventional Sverdlov class cruisers through to increasingly complex and formidable missile cruisers these ships ensured that NATO took the Soviet naval threat seriously Soviet Cold War Guided Missile Cruisers covers all classes of these impressive warships from the early Sverdlov through the Kynda Kresta Kara and Slava to the enormous Kirov classes Together these vessels marked the apogee of Soviet naval technology and capability and they remain today the largest non-aircraft carrier warships built since 1945 Containing material previously only available in Russian and fully researched from specialist defence journals this comprehensive volume examines the design development and intended role of these impressive hi-tech warships and recounts their dramatic operational history as NATO and Soviet warships faced off against each other during the long Cold War at sea

Ships Monthly, 2001 **Army-Navy-Air Force Register and Defense Times**, 1948 **US Heavy Cruisers 1941-45** Mark Stille, 2014-04-20 Designed and produced under the regulations of the Washington Naval Treaty the heavy cruisers of the Pensacola Northampton Portland New Orleans and Wichita classes were exercises in compromise While they possessed very heavy armament the Pensacolas for example carrying a main battery of ten 8 guns this came at the cost of protection armor was the same thickness as a gun cruiser and incapable of protecting the vessels from enemy 8 fire As the classes evolved these flaws began to be corrected with the main battery being reduced and increased protection being added to the vital areas of the ship Despite these drawbacks the pre-war heavy cruiser classes

served with distinction throughout World War II Imperial Japanese Navy Heavy Cruisers 1941-45 Mark Stille, 2012-05-20 Designed with little more than a passing nod to the international naval treaties of the inter war period the Imperial Japanese Navy's heavy cruisers were fast and heavily armed Like the other vessels of the Japanese Navy the heavy cruisers were technologically superior to and far more innovative than their Allied rivals whom they met in many of the major Pacific Theatre battles including Midway and Leyte Gulf Mark Stille continues his study of the IJN of WWII with this fascinating topic addressing the design and development of all 18 ships in the six heavy cruiser classes from pre war construction and mid war alterations to their operational histories and eventual fates **US Destroyers 1942-45** Dave McComb, 2011-03-15 Few if any 20th century warships were more justly acclaimed than the destroyers of the U S Navy's Fletcher class Admired as they were for their advanced and rakish design it was their record as workhorses of the Pacific War that placed them among the most battle tested and successful fighting ships of all time This title describes the Fletchers and their Allen M Sumner and Gearing class derivatives their machinery armament and construction with a listing of all 343 ships by hull number and builder It features an operational history of the 287 ships commissioned during World War II which traces the evolution of night surface action tactics in the Solomon Islands and the parallel development of the Combat Information Center the drive across the Pacific and liberation of the Philippines with tables showing the rapid introduction of new squadrons and the radar pickets climactic stand against kamikaze aircraft at Okinawa With summaries of losses and decorations and specially commissioned artwork this is a definitive book on the wartime US destroyer classes *US Navy Light Cruisers 1941-45* Mark Stille, 2016-07-28 During World War II the United States built 72 light cruisers of various classes In response to the severe air threat that surface ships faced new cruisers were designed with increasingly heavy anti-aircraft weaponry as well as the traditional 6in guns With the speed and range to keep up with aircraft carriers and their considerable anti-aircraft capability they were a mainstay of the carrier escorts This book examines every US light cruiser produced including those of the Fargo and Worcester classes which were actually complete after World War II had ended tracing their design development and evolution throughout the war and beyond **US Navy Armored Cruisers 1890-1933** Brian Lane Herder, 2022-10-27 A new history of the large fast and long ranged armored cruisers of the US Navy and the roles that these warships played in the fleet as America developed into a great naval power At the dawn of the Steel Navy era the rapidly expanding US Navy's fleet of capital ships consisted not only of battleships but also armored cruisers the forerunner of the battlecruiser Armored cruisers sacrificed the battleship's superlative firepower and protection for superior speed and range but as this study shows their role was not always easy to define Controversial because they were as large and expensive as battleships but not able to withstand a battleship in battle contemporary strategists pointed out that naval wars are not won by running away from stronger ships Despite being produced at great expense tactically they never really had a legitimate mission traditional deployments were commerce raiding and protection but despite this author Brian

Lane Herder illustrates how successful the use of armored cruisers was for the US Navy After 1906 some replaced US battleships in the Pacific functioning as oversized gunboats most notably the modified armored cruiser Pennsylvania which witnessed the first landing of an airplane on a ship On November 5 1915 North Carolina became the first cruiser to launch an aircraft from a catapult while underway After the war surviving US armored cruisers represented the US Navy on their Asiatic station until the final cruiser was scuttled in 1946 Using detailed color artwork and photos this fascinating book describes the development and deployment of these controversial but intriguing ships providing examples of the key service they played in the US Navy in a variety of defensive and escorting roles
