Redbrick William Whyte, 2016-08-11 In the last two centuries Britain has experienced a revolution in higher education with the number of students rising from a few hundred to several million Yet the institutions that drove and still drive this change have been all but ignored by historians Drawing on a decade's research and based on work in dozens of archives many of them used for the very first time this is the first full scale study of the civic universities new institutions in the nineteenth century reflecting the growth of major Victorian cities in Britain such as Liverpool Manchester Birmingham York and Durham for more than 50 years Tracing their story from the 1780s until the 2010s it is an ambitious attempt to write the Redbrick revolution back into history William Whyte argues that these institutions created a distinctive and influential conception of the university something that was embodied in their architecture and expressed in the lives of their students and staff It was this Redbrick model that would shape their successors founded in the twentieth century ensuring that the normal university experience in Britain is a Redbrick one Using a vast range of previously untapped sources Redbrick is not just a new history but a new sort of university history one that seeks to rescue the social and architectural aspects of education from the disregard of previous scholars and thus provide the richest possible account of university life It will be of interest to students and scholars of modern British history to anyone who has ever attended university and to all those who want to understand how our higher education system has developed and how it may evolve in the future

Planning Cities with Nature Fabiano Lemes de Oliveira, Ian Mell, 2019-02-02 This book explores novel theories strategies and methods for re-naturing cities It enables readers to learn from best practice and advances the current theoretical and empirical understanding in the field The book also offers valuable insights into how planners and policymakers can apply this knowledge to their own cities and regions exploring top down bottom up and mixed mechanisms for the systemic re-naturing of planned and existing cities There is considerable interest in naturalising cities since it can help address multiple global societal challenges and generate various benefits such as the enhancement of health and well-being sustainable urbanisation

ecosystems and their services and resilience to climate change This can also translate into tangible economic benefits in terms of preventing health hazards positively affecting health related expenditure new job opportunities i e urban farming and the regeneration of urban areas There is thus a compelling case to investigate integrative approaches to urban and natural systems that can help cities address the social economic and environmental needs of a growing population How can we plan with nature What are the models and approaches that can be used to develop more sustainable cities that provide high quality urban green spaces University Trends Jonathan Coulson,Paul Roberts,Isabelle Taylor,2017-11-13 The campus has a deep rooted prestige as a place of teaching learning and nurturing Conjuring images of cloistered quadrangles of sunny lawns of wood panelled libraries it is a word viscerally charged with centuries of scholarly tradition And yet it is also a place of cutting edge science vibrancy and energy It is this dual nature this concurrent adherence to tradition and innovation which renders the physical environment of the university such a redolent enduring and dynamic realm However it also means that the twenty first century campus is a highly challenging and exacting landscape to design and manage successfully Today the scale of the pressures and the rate of change facing higher education institutions are greater than ever Squeezed public spending growing societal expectations and the broadening education ambitions of developing nations are set against a backdrop of rapid technological progress and changing pedagogies What are the repercussions for the physical realities of university planning and architecture And how are university campuses adapting to contend with these pressures University Trends Contemporary Campus Design introduces the most significant widespread and thought provoking trends that are currently shaping the planning and architecture of higher education institutions across the world Within this completely revised second edition Part One identifies current patterns such as hub buildings large scale expansions adaptive reuse and innovation buildings Part Two profiles these through recent well illustrated global case studies The essential guide to current and future trends in campus design **The Routledge Handbook of Architecture, Urban Space and Politics, Volume II** Nikolina Bobic,Farzaneh Haghighi,2024-11-22 Architecture and the urban are connected to challenges around violence security race and ideology spectacle and data The first volume of this handbook extensively explored these oppressive roles This second volume illustrates that escaping the corporatized and bureaucratized orders of power techno managerial and consumer oriented capitalist economic models is more urgent and necessary than ever before Herein lies the political role of architecture and urban space including the ways through which they can be transformed and alternative political realities constituted The volume explores the methods and spatial practices required to activate the political dimension and the possibility for alternative practices to operate in the existing oppressive systems while not being swallowed by these structures Fostering new political consciousness is explored in terms of the following themes Events and Dissidence Biopolitics Ethics and Desire Climate and Ecology Urban Commons and Social Participation Marginalities and Postcolonialism Volume II embraces engagement across disciplines and offers a wide range of projects and

critical analyses across the so called Global North and South This multidisciplinary collection of 36 chapters provides the reader with an extensive resource of case studies and ways of thinking for architecture and urban space to become more emancipatory Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license

Design as Communication Yinrui Xie, 2025-10-29 This book explores the architectural history of Christian universities in China revealing how quasi colonial power interaction and cross cultural communication of meaning were channelled through religious and educational architecture in modern China The Christian universities in China witnessed an experimental representation of Chinese architectural identity as the country subject to an informal version of colonialism struggled to become a modern nation state and to rethink its identity This book offers new knowledge to the prospering postcolonial studies of the architectural history of Asian countries deepening our understanding of the scope and content of the nuanced colonial encounters between the East and the West and the relationship between architecture and power Borrowing ideas from architectural semiotics this book explores how architectural meaning has been interpreted and sometimes modified by its audience s whose voice has been largely ignored in traditional architectural historical studies It provides a unique scope to further understand the communicative function of architecture throwing light upon the broader socio cultural dialogue between China and the Western world in the twentieth century **Design as Communication** will be an enriching reference for those interested in the architectural dialogue between China and the West architecture and postcolonialism and the localisation of Christianity in the world

Utopian Universities Miles Taylor, Jill Pellew, 2020-11-12 In a remarkable decade of public investment in higher education some 200 new university campuses were established worldwide between 1961 and 1970 This volume offers a comparative and connective global history of these institutions illustrating how their establishment intellectual output and pedagogical experimentation sheds light on the social and cultural topography of the long 1960s With an impressive geographic coverage using case studies from Europe the Americas Africa and Asia the book explores how these universities have influenced academic disciplines and pioneered new types of teaching architectural design and student experience From educational reform in West Germany to the establishment of new institutions with progressive interdisciplinary curricula in the Commonwealth the illuminating case studies of this volume demonstrate how these universities shared in a common cause the embodiment of utopian ideals of living learning and governance At a time when the role of higher education is fiercely debated **Utopian Universities** is a timely and considered intervention that offers a wide ranging historical dimension to contemporary predicaments
