

Introduction

We make an assumption that every graph is well ordered according to their positions below. When some properties are more substantially used, the above assumption is used. Therefore, these two are considered equivalent to each other. Additionally, you should know that a [Finite Set](#), [Inductive](#), and [Induction](#) are all different from each other and cannot be changed. Therefore, the above [Induction](#) is the operation and order of the graph that is used in the induction.
