Untangling The Web A Guide To Internet Research:

Untangling the Web, 2014 *Untangling the Web* National Security Administration, 2014-01 One of the most famous stories about libraries tells of the tenth century Grand Vizier of Persia Abdul Kassem Ismael who in order not to part with his collection of 17 000 volumes when traveling had them carried by a caravan of 400 camels trained to walk in alphabetical order However charming this tale may be the actual event upon which it is based is subtly different According to the original manuscript now in the British Museum the great scholar and literary patron Sahib Isma il b Abbad so loved his books that he excused himself from an invitation by King Nuh II to become his prime minister at least in part on the grounds that four hundred camels would be required for the transport of his library alone A 21st Century version of the story might feature any number of portable electronic devices a laptop a PDA or even a mobile phone designed to overcome this difficulty Today 1000 years later the Persian scholar statesman would have to find a new excuse for declining the job offer Abdul Kassem Ismael aka Sahib Isma il b Abbad would be hard pressed to explain why he couldn't just find what he needed on the Internet The message seems to be that books are passe replaced by ones and zeroes the real world replaced by a virtual one knowledge supplanted by information at best and chaotic data at worst Have we shrunk the world or expanded it Or have we in some way replaced it *Untangling the Web* for 2007 is the twelfth edition of a book that started as a small handout After more than a decade of researching reading about using and trying to understand the Internet I have come to accept that it is indeed a Sisyphean task Sometimes I feel that all I can do is to push the rock up to the top of that virtual hill then stand back and watch as it rolls down again The Internet in all its glory of information and misinformation is for all practical purposes limitless which of course means we can never know it all see it all understand it all or even imagine all it is and will be The more we know about the Internet the more acute is our awareness of what we do not know The Internet emphasizes the depth of our ignorance because our knowledge can only be finite while our ignorance must necessarily be infinite My hope is that *Untangling the Web* will add to our knowledge of the Internet and the world while recognizing that the rock will always roll back down the hill at the end of the day I will end this beginning with another story and a word of warning Tion Uqbar *Orbis Tertius* describes the discovery of an encyclopedia of an unknown planet This unreal world is the creation of a secret society of scientists and gradually the imaginary world of Tlon replaces and obliterates the real world Substitute the Internet for Tlon and listen Does this sound familiar *Untangling the Web*, 2013 Use the internet like a real spy *Untangling the Web* is the National Security Agency's once classified guide to finding information on the internet From the basic to the advanced this 650 page book offers a fascinating look at tricks the real spies use to uncover hidden and not so hidden information online Chapters include Google hacks Metasearch sites Custom search engines Maps mapping Uncovering the invisible internet Beyond search engines Specialized research tools Email lookups Finding people Researching companies A plain english guide to interworking Internet toolkits Finding ISPs Cybergeography Internet privacy and security and over a

hundred more chapters This quote from the authors hints at the investigative power of the techniques this book teaches Nothing I am going to describe to you is illegal nor does it in any way involve accessing unauthorized data but involves using publicly available search engines to access publicly available information that almost certainly was not intended for public distribution From search strings that will reveal secret documents from South Africa filetype xls site za confidential to tracking down tables of Russian passwords filetype xls site ru login this is both an instructive and voyeuristic look at how the most powerful spy agency in the world uses Google
