Urban Environmental Policy Analysis:

Urban Environmental Policy Analysis Heather E. Campbell, Elizabeth A Corley, 2015-02-12 This timely book provides a wealth of useful information for following through on today's renewed concern for sustainability and environmentalism. It is designed to help city managers, policy analysts, and government administrators think comprehensively and communicate effectively about environmental policy issues. The authors illustrate a system-based framework model of the city that provides a holistic view of environmental media: land, air, and water, while helping decision makers to understand the extent to which environmental policy decisions are intertwined with the natural built and social systems of the city. They go on to introduce basic and environment-specific policy analytic models, methods, and tools. It presents numerous specific environmental policy puzzles that will confront cities and introduces methods for understanding and educating public opinions around urban environmental policy. The book is grounded in the policy analytic perspective rather than political science, economic, or planning frameworks. It includes both new scholarship and synthesis of existing policy analysis. Numerous tables, figures, checklists, and maps, as well as a comprehensive reference list, are included.

The Quest for Good Urban Governance Leon van den Dool, Frank Hendriks, Alberto Gianoli, Linze Schaap, 2015-06-09 This book demonstrates both successes and failures in attempts to get closer to the ideal of good urban governance in cities in North America, Europe, and Asia. It presents a value menu and deliberately does not come up with one best way for improving urban governance. Good urban governance is presented as a balancing act, an interplay between government, business, and civil society, in which the core values need careful and timely attention. The authors address questions such as: What is deemed good in urban governance and how is it being searched for? and What reconfigurations of interactions between government, private sector, and civil society are evolving and to what results?

Routledge Handbook of Urban Water Governance Thomas Bolognesi, Francisco Silva Pinto, Megan Farrelly, 2022-09-01 This handbook provides a comprehensive state-of-the-art overview of urban water governance. Of the many growing challenges presented by rapid urbanization, water governance is a critical one, and while urban water governance is now regarded as a critical field of research, the literature is fragmented. For the first time, this handbook brings together urban water governance research containing interdisciplinary contributions from established and emerging scholars, practitioners, and policymakers. It addresses the key questions of how urban water governance works, how it is shaped, and what the impacts are.

The handbook's structure offers a progressive entry into the complexity of urban water governance. Starting with technical dimensions, the handbook addresses supply and demand, wastewater and sanitation. It then considers regulation and economic factors, examining water utilities and services. Political processes and the actors involved are addressed, and the handbook finishes with a part focusing on governance and sustainability, where chapters address critically important topics such as access to water, water safety, and water security. This handbook is essential reading for students, scholars, and professionals interested in urban water governance, urban studies, and water resource management and sustainability more broadly.

Rethinking Environmental Justice in Sustainable Cities Heather E. Campbell, Yushim Kim, Adam M.

Eckerd, 2015-05-15 As the study of environmental policy and justice becomes increasingly significant in today's global climate, standard statistical approaches to gathering data have become less helpful at generating new insights and possibilities. None of the conventional frameworks easily allow for the empirical modeling of the interactions of all the actors involved or for the emergence of outcomes unintended by the actors. The existing frameworks account for the what but not for the why. Heather E. Campbell, Yushim Kim, and Adam Eckerd bring an innovative perspective to environmental justice research. Their approach adjusts the narrower questions often asked in the study of environmental justice, expanding to broader investigations of how and why environmental inequities occur. Using agent-based modeling (ABM), they study the interactions and interdependencies among different agents such as firms, residents, and government institutions. Through simulation, the authors test underlying assumptions in environmental justice and discover ways to modify existing theories to better explain why environmental injustice occurs. Furthermore, they use ABM to generate empirically testable hypotheses, which they employ to check if their simulated findings are supported in the real world using real data. The pioneering research on environmental justice in this text will have effects on the field of environmental policy as a whole. For social science and policy researchers, this book explores how to employ new and experimental methods of inquiry on challenging social problems, and for the field of environmental justice, the authors demonstrate how ABM helps illuminate the complex social and policy interactions that lead to both environmental justice and injustice. Transport and Mobility Futures in Urban Africa Ransford A.

Acheampong, Karen Lucas, Michael Poku-Boansi, Chinebuli Uzundu, 2022-11-02 This book provides a collection of insightful conceptual and empirical works that situate transport and mobility challenges in the unique context of individual countries and cities while highlighting commonalities across the African continent. Written from an interdisciplinary perspective, the book covers important themes in transport and mobility, including the links between urbanization, urban structure, and accessibility, transport equity and poverty, non-motorized transport, public transport, and the challenges and opportunities of new and emerging transport technologies and ICT-mediated mobility solutions. Each chapter engages with the normative imperatives that are critical to improving the transport and mobility situations of African urban areas now and in the future.
